Organizations that prioritize environmental, health, and safety (EHS) issues are well placed to attract better customers, better talent, and today's growing number of socially responsible investors. But, to gain these benefits, companies must choose the right sustainability strategies, and then manage and measure them well. Now, leading business sustainability consultant Peter Soyka offers a complete and actionable guide to driving greater value through sustainability. In *Creating a Sustainable Organization*, Soyka bridges the disparate worlds of the EHS/sustainability professional and the investor/analyst. Readers will learn what the evidence

says about linkages between sustainability and value... how to manage key stakeholder relationships influencing corporate response to EHS and social equity issues... how to effectively manage sustainability throughout the business... how to evaluate sustainability posture and performance from the standpoint of external investors and internal management... how to maximize the influence of organizational actors focused on sustainability, and much more. This book will be invaluable for all environmental, health, and safety decision-makers and professionals concerned with improving sustainability and value; for executives and strategists seeking long-term competitive advantage; for stock analysts evaluating

potential investments; and for researchers and MBA candidates currently studying the techniques and potential of corporate sustainability.

From the activist who coined the term comes a primer on intersectional environmentalism for the next generation of activists looking to create meaningful, inclusive, and sustainable change.

The Intersectional Environmentalist examines the inextricable link between environmentalism, racism, and privilege, and promotes awareness of the fundamental truth that

we cannot save the planet without uplifting the voices of its people -- especially those most often unheard.

Written by Leah Thomas, a prominent voice in the field and the activist who coined the term "Intersectional Environmentalism," this book is simultaneously a call to action, a guide to instigating change for all, and a pledge to work towards the empowerment of all people and the betterment of the planet. Thomas shows how not only are Black, Indigenous and people of color unequally and unfairly impacted by environmental injustices, but she argues that the fight for the planet lies in

tandem to the fight for civil rights; and in fact, that one cannot exist without the other. An essential read, this book addresses the most pressing issues that the people and our planet face, examines and dismantles privilege, and looks to the future as the voice of a movement that will define a generation.

* Beyond the Corporation is a book for our times. Offering inspiration and vision in the wake of financial Armageddon, it is the story of ordinary people who share the ownership of the businesses where they work. *

The enterprises come in all sizes: from companies employing just a few dozen people, to large corporations: John Lewis in the UK, employing 70,000 'partners'; Mondragon, a highly entrepreneurial group of over 100 businesses in Spain, employing more than 100,000; and many examples in the US, some employing tens of thousands. It would be hard to imagine a better informed, more involved or more enthusiastic set of employees - sharing the efforts of making their companies successful, and sharing all of the rewards. Unusually in the corporate world, they control their own destinies - a situation beyond the dreams of most working people. * Erdal takes a hard look

at those who insist, in the teeth of the evidence, that shared ownership will never work - a sorry tale, he argues, of prejudice masquerading as economic thinking. The book contains detailed case studies as well as interviews with a range of people, whose inspiring stories of success fly in the face of received wisdom. These successes include: high levels of productivity; sustained rapid growth; fast-moving, innovative responses to changing worlds; high levels of investment aimed at long-term prosperity; and, above all, the sheer happiness employees experience in working together in businesses that they own together, sharing the wealth that they create. * At a time when the 'orthodox' corporate economy has been badly shaken, Beyond the Corporation makes essential reading.

With this question, the relations of technology and art appear in a new light. Especially the notion of "progress" takes on a new meaning and must be distinguished from innovation. The discussion of particular educational approaches, the exploration of digital technologies and the presentation of best practice examples conclude the book. University teachers show how the teaching of creativity reinforces the teaching of other subjects, especially foreign languages.

"The Monkey Wrench Gang Meets the Third Industrial Revolution" "An existential environmental time bomb threatens to explode an entire way of life for the people of New Hampshire's North Country.

Nine unlikely heroes are all that stand between the people and their worst fears . . . This is their story. "

Sasha Brandt, an Iroquois woman from Canada, is hiking the Mahoosuc Range with her companion, a wolf named Cochise. There she meets Daniel Roy, a guide and outdoorsman. After a unique first encounter the three continue their trip together ultimately finding themselves camping with an unusual assortment of people including a former Olympic paddler, a deer farmer, a retired spook - the first US victim of Lyme disease - and an iconoclast named Thomas who lives in multiple backwoods abodes in the Great North Woods and rides a moose named Metallak. They discover that they have one very important thing in common . . . a deep concern about a private consortium proposing to bring a powerline with massive 150 foot towers through the most beautiful parts of the state, transporting electricity from Canada to the toney suburbs of Boston and beyond, posing an existential threat to an entire way of life. Determined to do more than shuffle papers and employ lawyers, the compatriots form a band of brothers and sisters - along with Cochise and Metallak

- calling themselves "The Trust." Armed with only their wits and a lot of heart they embark on a rollicking campaign of civil disobedience that would make Thoreau proud. Teachers and professors will find this novel a great resource. Adding a new dimension and lively discussion to classes on sustainability, or the American tradition of protest. In the coming "Age of Electricity" a principal battleground will be over who controls the production and distribution of electric power. Across America today, the battle lines are being drawn. Utility companies, many in an existential battle for survival, are pitted against advocates of a new distributed energy paradigm where small, renewable power replaces today's large electricity generation plants. Most Americans notice that things are changing, but have yet to put together the full picture of what will be a sea change in life for every American. "Sacred Trust" tells this story in a novel about citizens banding together to stop one especially egregious powerline proposed in the small state of NH where the people deeply cherish

their environment. The power company behind the transmission line proposes to bypass the state - like a giant extension cord - bringing power directly from Canada to the larger cities and suburbs. Like the oligarchs of a previous age, they intend to reap 100% of the benefits and to pass off a large portion of their costs through the generations-long visual pollution of the public commons. The citizens who stand to lose most are dead set against the project . . . but the political winds are against them. It is in this setting nine unlikely compatriots from across the political spectrum come together to take on the consortium. Calling themselves The Trust, they engage in creative civil disobedience to stop the project. A second group of citizen activists, writing in the style of the Federalist Papers, produce a series of essays in opposition to Granite Skyway in support of the actions of The Trust. One business writer, in a series of articles scattered throughout the novel, leads his readers through a virtual primer on the battle over a post-carbon energy paradigm, beginning with the 1972 election of

Carter and the passage of the National Energy Policy Act including an 8 word amendment added by NH Senator John Durkin that changed everything. "Sacred Trust" is a hilarious and vicarious, high voltage campaign to stop Granite Skyway, that leads the reader through the hijinks of The Trust, and the series of choices with which we all are currently confronting, or will be, in this new "Age of Electricity."

Large Scale Organizational

Change provides the principles by which large scale organizations reinvent themselves not once, but on an ongoing basis. Continual reinvention allows leading companies to learn, adapt, and innovate faster than competitors in complex and fast changing environments. These action principles are based on first-hand experience at the world's leading Fortune 500 companies using emergent models of living systems. The context for large scale organizations is one of information overload, complexity and constant change. This book reduces the sense of vulnerability felt by managers. It provides a guide to piloting change in ways that lead to constant renewal and a capacity to survive frequent and often brutal changes in the operating environment. It describes a leadership concerned with the capacity to learn, inflection points, emergent strategies, knowledge management, the ability to anticipate, and tapping into the distributed intelligence resident in the organization. Large Scale Organizational Change provides managers with a framework for

making their organizations highly adaptive in the complex market systems in which they operate, thereby reducing or eliminating the need for periodic episodes of traumatic restructuring and sometimes fatal reengineering processes.
