Deal With It. That's a strong phrase, right? One interpretation is; " here ' s how it is, you have to put up with it " . It can be a bratty, unilateral, condescending, dismissive statement. Another interpretation is; " let ' s cope with things how they are, but work hard to change them for the better " . An encompassing, generous, creative statement. This book is about choosing which of these two statements you want to embrace as a software professional. It's about choosing how you, as a software developer, deal with our industry and your day-to-day work.

Philosophy of the Text This text has been designed to be an introductory survey of the basic concepts and applied mathematical methods of nonlinear science. Students in engineering, physics, chemistry, mathematics, computing science, and biology should be able to successfully use this text. In an effort to provide the students with a cutting edge approach to one of the most dynamic, often subtle, complex, and still rapidly evolving, areas of modern research—nonlinear physics—we have made extensive use of the symbolic, numeric, and plotting capabilities of Maple V Release 4 applied to examples from these disciplines. No prior knowledge of Maple or computer programming is assumed, the reader being gently introduced to Maple as an auxiliary tool as the concepts of nonlinear science are developed. The diskette which accompanies the text gives a wide variety of illustrative nonlinear examples solved with Maple. An accompanying laboratory manual of experimental activities keyed to the text allows the student the option of "hands on" experience in

exploring nonlinear phenomena in the REAL world. Although the experiments are easy to perform, they give rise to experimental and theoretical complexities which are not to be underestimated. The Level of the Text The essential prerequisites for the first eight chapters of this text would normally be one semester of ordinary differential equations and an intermediate course in classical mechanics.

Like the day Elvis died or O.J. was acquitted, the Tuesday you wake up paralyzed is not a day you soon forget. For writer Allen Rucker—baby boomer, husband, father of two, aging Hollywood also-ran—life started over that Tuesday when, at the age of fifty-one, he was struck by a rare disorder—transverse myelitis—that left him paralyzed from the waist down. Why him? Was he being punished? Was it his stressful life? His frustrating career? Telling too many Christopher Reeve jokes? Dazed and paralyzed, he was forced to reevaluate everything, from the simplest bodily functions to the mysteries of the universe. In a style that is at once funny and moving, *The Best Seat in the House* offers an unpretentious and unapologetic account of learning to live with paralysis. Without trivializing his situation, and without sermons or clichés, Rucker invites all readers, whether disabled or not, to identify with him for better or for worse. This remarkably comic and heartfelt book speaks to the fragility of life and to the resilience and adaptability of a single, ordinary human being. Lucky for us, this human being has a sense of humor. At first, it may not look like the best seat in the house, but read on. You might be surprised.

The issues of the poor and oppressed in this world are not removed from our worship of God. In fact, to serve the poor is to worship. When we capture God's heart for the poor and broken, we begin to move toward action through worship. In *The Justice God Is Seeking*, David Ruis explores how drawing near to God softens our hearts and opens us up to the need for salvation that is all around us. Worship and compassion are linked in the Scriptures, and they must be woven throughout our lives. Here is a passionate exhortation to love like Jesus loves and to experience worship that is touched by brokenness and a longing for things to be set right. Therein lies the justice God is seeking.

Gatorade invented the sports drink 40 years ago, and it has been first in the marketplace (by a long shot) ever since. But it's more than just a thirst quencher and a dominant brand.

First in Thirst is the story of a phenomenon that grew from the practice fields of college football into a true icon of the way we play, watch, and experience sports--from the Pee Wees to the pros. Published to coincide with the 40th anniversary of Gatorade's invention, *First in Thirst* is equally a sports story, from its

invention and testing with the University of Florida Gators to the "Gatorade bath" and its near-universal appeal to athletes, coaches and sports fans everywhere.

For decades performers, instrumentalists, composers, technicians and sound engineers continue to manipulate sound material. They are trying with more or less success to create, to innovate, improve, enhance, restore or modify the musical message. The sound of distorted guitar of Jimi Hendrix, Pierre Henry's concrete music, Pink Floyd's rock psychedelic, Kraftwerk's electronic music, Daft Punk and rap T-Pain, have let emerge many effects: reverb, compression, distortion, auto-tune, filter, chorus, phasing, etc. The aim of this book is to introduce and explain these effects and sound treatments by addressing their theoretical and practical aspects.
