According to Neil Gershenfeld, the renowned MIT scientist and inventor, the next big thing is personal fabrication—the ability to design and produce your own products, in your own home, with a machine that combines consumer electronics and industrial tools. Personal fabricators are about to revolutionize the world just as personal computers did a generation ago, and Fab shows us how.

Christmas Cards and Tags Clarkson Potter Amy Guglielmo, Jacqueline Tourville, and Giselle Potter come together to tell the inspiring story of autism advocate Dr. Temple Grandin and her brilliant invention: the hug machine. As a young girl, Temple Grandin loved folding paper kites, making obstacle courses, and building lean-tos. But she really didn't like hugs. Temple wanted to be held—but to her, hugs felt like being stuffed inside the scratchiest sock in the world; like a tidal wave of dentist drills, sandpaper, and awful cologne, coming at her all at once. Would she ever get to enjoy the comfort of a hug? Then one day, Temple had an idea. If she couldn't receive a hug, she would make one...she would build a hug machine!
