The present collection of essays grew out of a conference, held in Dresden in December 2001, exploring the relationship between the public sphere and legal culture. The conference was held in connection with the ongoing research undertaken by the Sonderforschungsbereich 537 'Institutionalisation and Historical Change' and, in particular, by the project 'Circulation of Legal Norms and Values in British Culture

from 1688 to 1900'. The conference papers include essays on the theory of the public sphere from a systematic and historical point of view by Gert Melville, by Peter Uwe Hohendahl and by Jürgen Schlaeger, all of whom try to re-evaluate and/or improve upon Jürgen Habermas' seminal contribution to the discussion of the emergence of modernism. Alastair Mann's contribution investigates the situation in Scotland, particularly censorship and the oath of allegiance; Annette Pankratz focuses on the king's body as a site of the public sphere; Heinz-Joachim Müllenbrock looks into the widespread 'culture of contention' at the beginning of the eighteenth century; and Eckhart Hellmuth considers the reform movement at the end of the century and the radical democrats' insistence on the right to discuss the constitution. Ian Bell, who took part in the conference, suggested the inclusion of part of

the first chapter of his seminal study *Literature and Crime in Augustan England* (1991). Beth Swan, Anna-Christina Giovanopoulos, and Christoph Houswitschka respectively analyse the ideologies of justice, the interrelation between journalism and crime, and the juridical evaluation of the crime of incest and its representation in public. Greta Olson investigates keyholes as liminal spaces between the public and the private, Juliet Wightman focuses on theatre and the bear pit, Uwe Böker examines the court room and prison as public sites of discourse, and York-Gothart Mix discusses the German emigrant culture in North America.

The first full-length study of the impact of the discovery of the Americas on Italian Renaissance art and culture, *Imagining the Americas in Medici Florence* demonstrates that the Medici grand dukes of Florence were not only great patrons of artists but also early conservators of American culture. In collecting New World objects such as featherwork, codices, turquoise, and live plants and animals, the Medici grand dukes undertook a “ vicarious conquest ” of the Americas. As a result of their efforts, Renaissance Florence boasted one of the largest collections of objects from the New World as well

as representations of the Americas in a variety of media. Through a close examination of archival sources, including inventories and Medici letters, Lia Markey uncovers the provenance, history, and meaning of goods from and images of the Americas in Medici collections, and she shows how these novelties were incorporated into the culture of the Florentine court. More than just a study of the discoveries themselves, this volume is a vivid exploration of the New World as it existed in the minds of the Medici and their contemporaries. Scholars of Italian and American art history will especially welcome and benefit from Markey ’ s insight.

This book offers a comprehensive introduction to juvenile delinquency by defining and describing juvenile delinquency, examining explanations for delinquent behavior, and considering contemporary efforts to control delinquency through prevention and juvenile justice. The text cultivates an understanding of juvenile delinquency by examining and linking key criminological theories and research. Coverage includes: the historical origins and transformation of "juvenile delinquency" and juvenile justice; the nature of delinquency, addressing the extent of delinquent offenses, the social correlates of offending and victimization (age, gender, race and ethnicity, and social class), and the developmental patterns of offending; theoretical explanations of delinquency, with insights from biosocial criminology, routine activities, rational choice, social control, social learning, social structure, labeling, and critical criminologies; evidence-based practice in delinquency prevention and contemporary juvenile justice. Fully revised and updated, the new edition incorporates the latest theory and research in the field of juvenile delinquency and provides expanded discussion of contemporary juvenile justice reform, evidence-based practice in delinquency prevention, and disproportionate minority contact throughout the juvenile justice process. This book is essential reading for courses on juvenile delinquency and juvenile justice. The book is supported by a range of compelling pedagogical features. Each chapter includes key terms, learning objectives, an opening

case study, box inserts that provide practical application of theory and research, critical thinking questions, suggested reading, useful websites, and a glossary of key terms. A companion website offers an array of resources for students and instructors. For students, this website provides chapter overviews, flashcards of key terms, and useful websites. The instructor site is password protected and offers a complete set of PowerPoint slides and an extensive test bank for each chapter—all prepared by the authors.

Drawing on a rich trove of documents, including correspondence not seen for 300 years, this study explores the emergence and growth of a remarkable global trade network operated by Armenian silk merchants from a small outpost in the Persian Empire. Based in New Julfa, Isfahan, in what is now Iran, these merchants operated a network of commercial settlements that stretched from London and Amsterdam to Manila and Acapulco. The New Julfan Armenians were the only Eurasian community that was able to operate simultaneously and successfully in all the major empires of the early modern world—both land-based Asian empires and the emerging sea-borne empires—astonishingly without the benefits of an imperial network and state that accompanied and facilitated European mercantile expansion during the same period. This book brings to light for the first time the trans-imperial cosmopolitan world of the New Julfans. Among other topics, it explores the effects of long distance trade on the organization of community life, the ethos of trust and cooperation that existed among merchants, and the importance of information networks and communication in the operation of early modern mercantile communities.
