The Handbook on Risk and Need Assessment: Theory and Practice covers risk assessments for individuals being considered for parole or probation. Evidence-based approaches to such decisions help take the emotion and politics out of community corrections. As the United States begins to back away from ineffective, expensive policies of mass incarceration, this handbook will provide the resources needed to help ensure both public safety and the effective rehabilitation of offenders. The ASC Division on Corrections & Sentencing Handbook Series will publish volumes on topics ranging from violence risk assessment to specialty courts for drug users, veterans, or the mentally ill. Each thematic volume focuses on a single topical issue that intersects with corrections and sentencing research.

History and Crime Rowman & Littlefield Publishers

Crime, Shame and Reintegration is a contribution to general criminological theory. Its approach is as relevant to professional burglary as to episodic delinquency or white collar crime. Braithwaite argues that some societies have higher crime rates than others because of their different processes of shaming wrongdoing. Shaming can be counterproductive, making crime problems worse. But when shaming is done within a cultural context of respect for the offender, it can be an extraordinarily powerful, efficient and just form of social control. Braithwaite identifies the social conditions for such successful shaming. If his theory is right, radically different criminal justice policies are needed - a shift away from punitive social control toward greater emphasis on moralizing social control. This book will be of interest not only to criminologists and sociologists, but to those in law, public administration and politics who are concerned with social policy and social issues.

Surveys administered to high school students, studies carried out on jail and prison inmates, and interviews conducted with substance abusers undergoing treatment all point to the same conclusion: drugs and crime are strongly connected. Why they are connected is less well understood, however. Written for middle to upper-level undergraduate courses on drugs and crime or substance abuse and crime, this book examines the drug-crime connection in a systematic and comprehensive way. This book covers the entire drug-crime spectrum, starting with a review of drug and crime terminology, classification and theory, and ending with policy implications for prevention, harm reduction, and macro-level management of the drug-crime problem. The opening chapters discuss drugs and crime separately for the purpose of setting the stage for later discussions on drug-crime relationships. As the book proceeds, the boundaries between drugs and crime blur, thus revealing the complex and intimate relationship that links these two behaviors.

How Do Judges Decide? Routledge

Young women bound for Islamic State, or "Free Speech" protests for Tommy

Robinson--radicalization spans ideologies. Though an often-used term, the process of radicalization is not well understood, and the role of gender within it is often ignored. This book reveals the centrality of gender to radicalization, using primary research among two of Britain's key extremist movements: the banned Islamist group al-Muhajiroun, and those networked to it; and the anti-Islam radical right, including the English Defence League and Britain First. Through interviews with leaders including Anjem Choudary, Jayda Fransen and Tommy Robinson, as well as their followers, Elizabeth Pearson explores the making of extreme men and women, showing both parallels and distinctions between the two movements. She argues that perceived gendered differences and boundaries are central to radicalization pathways, but rooted in local cultures and place; and challenges notions of radicalization as transformative, highlighting instead continuities between activist and non-activist practices of masculinity. She examines how extreme groups construct, collectivize, mobilize and legitimize--but also resist--ideas of masculinity and gender. Understanding the men and women involved in extreme movements will better equip us to counter them. This fascinating study offers invaluable insight into some of their lives and motivations.
