"This book provides an overview and assessment of green criminology. Based on a political-economic analysis, Green Criminology draws attention to the ways in which the political-economic organization of capitalism causes ecological destruction and disorganization. Focusing on real-world impact, chapters include political-economic examinations of ecological withdrawals, ecological additions, toxic towns, wildlife poaching and trafficking, environmental justice, environmental laws, and nongovernment environmental organizations. The book also explores how ecological footprint, planetary boundary analysis, and other scientific research applies to green criminological analysis"--Provided by publisher.

Rural crime has long been overlooked in the field of crime prevention. Sustained academic interrogation is necessary, therefore, to reduce the extensive economic and social costs of rural crime as well as to challenge some of the myths regarding the prevention of rural crime. Rural Crime Prevention: Theory, Tactics and Techniques critically analyses, challenges, considers and assesses a suite of crime prevention initiatives across an array of international contexts. This book recognises the diversity and distinct features of rural places and the ways that these elements impact on rates, experiences and responses. Crucially, Rural Crime Prevention also incorporates non-academic voices which are embedded throughout the book, linking theory and scholarship with practice. Proactive responses to rural offending based on sound evidence can serve to facilitate feelings of safety and security throughout communities, enhance individual wellbeing and alleviate pressure on the overburdened and typically under-resourced formal elements of the criminal justice system. This book provides an opportunity to focus on the prevention of crime in regional, rural and remote parts of the globe. An accessible and compelling read, this book will appeal to students and scholars of criminology, policing, sociology and practitioners interested in learning about the best-practice international approaches to rural crime prevention in the twenty-first century.

Handbook on Risk and Need Assessment Jones & Bartlett Publishers

Surveys administered to high school students, studies carried out on jail and prison inmates, and interviews conducted with substance abusers undergoing treatment all point to the same conclusion: drugs and crime are strongly connected. Why they are connected is less well understood, however. Written for middle to upper-level undergraduate courses on drugs and crime or substance abuse and crime, this book examines the drug-crime connection in a systematic and comprehensive way. This book covers the entire drug-crime spectrum, starting with a review of drug and crime terminology, classification and theory, and ending with policy implications for prevention, harm reduction, and macro-level management of the drug-crime problem. The opening chapters discuss drugs and crime separately for the purpose of setting the stage for later discussions on drug-crime relationships. As the book proceeds, the boundaries between drugs and crime blur, thus revealing the complex and intimate relationship that links these two behaviors.

This book deals with the historic transition to democracy in South Africa and its impact upon crime and punishment. It examines how the problem of crime has emerged as a major issue to be governed in post-apartheid South Africa. Having undergone a dramatic transition from authoritarianism to democracy, from a white minority to black majority government, South Africa provides rich material on the role that political authority, and challenges to it, play in the construction of crime and criminality. As such, the study is about the socio-cultural and political significance of crime and punishment in the context of a change of regime. The work uses the South African case study to examine a question of wider interest, namely the politics of punishment and race in neoliberalizing regimes. It provides interesting and illuminating empirical material to the broader

debate on crime control in post-welfare/neoliberalizing/post transition polities.

Over the past two centuries, many aspects of criminal behavior have been investigated. Finding this information and making sense of it all is difficult when many studies would appear to offer contradictory findings. The Handbook of Crime Correlates collects in one source the summary analysis of crime research worldwide. It provides over 400 tables that divide crime research into nine broad categories: Pervasiveness and intra-offending relationships Demographic factors Ecological and macroeconomic factors Family and peer factors Institutional factors Behavioral and personality factors Cognitive factors Biological factors Crime victimization and fear of crime Within these broad categories, tables identify regions of the world and how separate variables are or are not positively or negatively associated with criminal behavior. Criminal behavior is broken down into separate offending categories of violent crime, property crime, drug offenses, sex offenses, delinquency, general and adult offenses, and recidivism. Accompanying each table is a description of what each table indicates in terms of the positive or negative association of specific variables with specific types of crime by region. This book should serve as a valuable resource for criminal justice personnel and academics in the social and life sciences interested in criminal behavior.

Introduction to Criminology, Why Do They Do It?, Second Edition, by Pamela J. Schram Stephen G. Tibbetts, offers a contemporary and integrated discussion of the key theories that help us understand crime in the 21st century. With a focus on why offenders commit crimes, this bestseller skillfully engages students with real-world cases and examples to help students explore the fundamentals of criminology. To better align with how instructors actually teach this

course, coverage of violent and property crimes has been integrated into the theory chapters, so students can clearly understand the application of theory to criminal behavior. Unlike other introductory criminology textbooks, the Second Edition discusses issues of diversity in each chapter and covers many contemporary topics that are not well represented in other texts, such as feminist criminology, cybercrime, hate crimes, white-collar crime, homeland security, and identity theft. Transnational comparisons regarding crime rates and the methods other countries use to deal with crime make this edition the most universal to date and a perfect companion for those wanting to learn about criminology in context.

The Handbook on Risk and Need Assessment: Theory and Practice covers risk assessments for individuals being considered for parole or probation. Evidence-based approaches to such decisions help take the emotion and politics out of community corrections. As the United States begins to back away from ineffective, expensive policies of mass incarceration, this handbook will provide the resources needed to help ensure both public safety and the effective rehabilitation of offenders. The ASC Division on Corrections & Sentencing Handbook Series will publish volumes on topics ranging from violence risk assessment to specialty courts for drug users, veterans, or the mentally ill. Each thematic volume focuses on a single topical issue that intersects with corrections and sentencing research.
