Endorsed by the Australian College of Critical Care Nurses (ACCCN) ACCCN is the peak professional organisation representing critical care nurses in Australia Written by leading critical care nursing clinicians, Leanne Aitken, Andrea Marshall and Wendy Chaboyer, the 4th edition of Critical Care Nursing continues to encourage and challenge critical care nurses and students to develop world-class practice and ensure the delivery of the highest quality care. The text addresses all aspects of critical care nursing and is divided into three sections: scope of practice, core components and specialty practice, providing the most recent research, data, procedures and guidelines from expert local and international critical care nursing academics and clinicians. Alongside its strong focus on critical care nursing practice within Australia and New Zealand, the 4th edition brings a stronger emphasis on international practice and expertise to ensure students and clinicians have access to the most contemporary practice insights from around the world. Increased emphasis on practice tips to help nurses care for patients within critical care Updated case studies, research vignettes and learning activities to support further learning Highlights the role of the critical care nurse within a multidisciplinary environment and how they work together Increased global

considerations relevant to international context of critical care nursing alongside its key focus within the ANZ context Aligned to update NMBA RN Standards for Practice and NSQHS Standards

Critical Care Nursing W.B. Saunders Company

"This text provides the reader with evidence-informed content about the care of critically ill patients and their families. Written by nursing experts, this book sets a standard for critical care nursing education, supports preparation for national certifications, and can be a resource to address uncertainty in patient care delivery. The organization of the text recognizes the learner's need to assimilate foundational knowledge before attempting to master more complex critical care nursing concepts. In addition, the American Association of Critical-Care Nurses affirms this book's value to the AACN community and especially to clinicians at the point of care. As the editor, I am grateful for the time and effort that AACN's team put forth in providing this validation. The title continues to carry AACN's name, as it has since the first edition. As critical care continues to evolve, the skills and knowledge that nurses leverage will also change. The constant element will be nurses' profound commitment to learning and translating that learning to optimal patient outcomes. This 5th edition, like its predecessors, meets nurses in their journey to learn, supports their pursuit of validation through certification, and offers a resource for direct patient care"--
