What is the purpose of studying history? How do we reflect on contemporary life from a historical perspective, and can such reflection help us better understand ourselves, the world around us, and the God we worship and serve? Written by an accomplished historian, award-winning author, public evangelical spokesman, and respected teacher, this introductory textbook shows why Christians should study history, how faith is brought to bear on our understanding of the past, and how studying the past can help us more effectively love God and others. John Fea shows that deep historical thinking can

relieve us of our narcissism; cultivate humility, hospitality, and love; and transform our lives more fully into the image of Jesus Christ. The first edition of this book has been used widely in Christian colleges across the country. The second edition provides an updated introduction to the study of history and the historian's vocation. The book has also been revised throughout and incorporates Fea's reflections on this topic from throughout the past 10 years.

The Jester Bantam

In Regions of Unlikeness Thomas Gardner explores the ways a number of quite different twentieth-century American poets, including Elizabeth Bishop, John Ashbery, Robert Hass, Jorie Graham, and Michael Palmer, frame their work as taking place within, and being brought to life by, an acknowledgment of the limits of language. Gardner approaches their poetry in light of philosopher

Stanley Cavell's remarkably similar engagement with the issues of skepticism and linguistic finitude. The skeptic's refusal to settle for anything less than perfect knowledge of the world, Cavell maintains, amounts to a refusal to accept the fact of human finitude. Gardner argues that both Cavell and the poets he discusses reject skepticism's world-erasing conclusions but nonetheless honor the truth about the limits of knowledge that skepticism keeps alive. In calling attention to the limits of such acts as describing or remembering, the poets Gardner examines attempt to renew language by teasing a charged drama out of their inability to grasp with certainty. ø Juxtaposed with Gardner's readings of the work of the younger poets are his interviews with them. In many ways, these conversations are at the core of Gardner's book, demonstrating the wide-ranging implications of the struggles and mappings enacted in the poems. The interviews are themselves examples of the charged intimacy Gardner deals with in his readings.
