Managing Projects provides proven strategies for making sure any size task achieve its goal - on time and on budget. Covering the gamut of tasks involved in managing any project, this portable guide develops ideas about planning, team building, motivation, mid-course assessment and correction, and after-project review. It helps managers determine whether and how to make the

critical tradeoffs between time, cost, and quality that are the essence of project management. Managers at any level can use this portable guide to become more efficient and effective multi-taskers. Key features Instructs readers how to: Scope out a project and identify resources needed. Develop schedules and set deadlines. Monitor budgets and keep projects on track.

Critical Path Methods in Construction Practice John Wiley & Sons

The subject of this book is the nested partitions method (NP), a relatively new optimization method that has been found to be very effective solving discrete optimization problems. Such discrete problems are common in many practical applications and the NP method is thus useful in diverse application areas. It can be applied to both operational and planning problems

and has been demonstrated to effectively solve complex problems in both manufacturing and service industries. To illustrate its broad applicability and effectiveness, in this book we will show how the NP method has been successful in solving complex problems in planning and scheduling, logistics and transportation, supply chain design, data mining, and health care. All of these diverse applications have one characteristic in common: they all lead to complex large-scale discrete optimization problems that are intractable using traditional optimization methods.

### 1.1 Large-Scale Optimization

In developing the NP method we will consider optimization problems that can be stated mathematically in the following

generic form:  $\min f(x), (1.1) x \in X$  where the solution space or feasible region  $X$  is either a discrete or bounded set of feasible solutions. We denote a solution to this problem  $x$  and the objective function value  $f = f(x)$ .

Claiming 1.5 million lives in 2015, tuberculosis is the world's most deadly infectious disease.

Because of the population it overwhelmingly affects, however, pharmaceutical companies are uninterested in

---

developing better drugs for the disease. Compound Solutions examines Product Development Partnerships (PDPs), which arose early in the twenty-first century to develop new drugs and vaccines for infectious diseases in low-income countries. Here, for the first time, is a sustained examination of PDPs: the work they do, the partnerships they form, their mission, and their underlying philosophy of addressing global health

needs—with implications that extend well beyond tuberculosis. Focusing on two PDPs for tuberculosis—the Global Alliance for TB Drug Development (TB Alliance) and Aeras (a nonprofit focused on vaccine development)—Susan Craddock argues that PDPs do much more than product development. As innovative sites of humanitarian pharmaceutical production, they are contravening mainstream

pharmaceutical production by tying drug and vaccine research to global health needs rather than shareholder demand. In largely untethering the profit incentive from pharmaceutical production, Craddock shows, PDPs exhibit more creative and efficient scientific practices, reshaping regulatory norms and implementing more ethical forms of clinical trials that enhance community engagement and capacity building. An unparalleled,

---

interdisciplinary analysis of PDPs as politically, socially, scientifically, and economically innovative sites of pharmaceutical production, Compound Solutions is a must for readers in the fields of public health, science and technology studies, and medical social science.

proud to present the The Oil & Gas Year Ghana 2019, published in collaboration with Ghana Oil Club. This third edition covers the lessons learned from the global oil price downturn and the opportunities that are becoming available as commodity prices recover. The book also provides readers with a complete perspective of the country ' s main energy projects and steps the government is taking to draw in more foreign investment. Due to a prospective upswing in oil and gas activity, Ghana ' s offshore industry continues to expand, with capacities being renovated at the main ports of Tema and Takoradi. Meanwhile, companies continue bringing in new technologies to advance Ghana ' s E&P and renewables potential as the country modernises. Moreover, Ghana ' s downstream sector is hugely competitive. As Ghana works to promote investment in its oil and gas industry, surrounding sectors are being hit with massive changes. Ensuring the competence of next generations, major firms and universities have launched courses or research chairs in petroleum studies. Extensive in-depth analysis is supported by comprehensive maps, illustrations and graphs to create a market guide essential for players seeking to either expand their operations or enter the Ghanaian oil and gas

market. 9781783021963 The Oil & Gas Year (TOGY), in partnership with Abu Dhabi National Oil Company (ADNOC) and the Ministry of Energy and Industry, proudly presents The Oil & Gas Year Abu Dhabi 2019. This eighth edition covers the emirate's new comprehensive strategy – termed Oil and Gas 4.0 – and key investments as projects and partnerships begin to pick up pace. ADNOC made history in 2018 by opening its first bid round. The NOC is moving in the direction of becoming an IOC and in doing so has opened up Abu Dhabi to more collaboration with multinationals, including BHGE, Eni and OMV. The strategy shows that the NOC knows that in order to meet its ambitious target of 5 million bopd by 2030, it will need to harness the power of collaboration over competition. Looking beyond the upstream, the edition touches upon major themes such as the regional competition to secure market share in petrochemicals, to which Abu Dhabi is responding by building what is slated to be the area's largest integrated downstream facility at Ruwais. The edition also discusses digitisation drives being spearheaded in the UAE in the private and public sectors, as well as the introduction of new technologies such as inspection drones and digital twins. Extensive in-depth analysis is supported by

comprehensive maps, illustrations and graphs to create a market guide essential for players seeking to either expand their operations in Abu Dhabi or enter this dynamic market.

There are some events in life that are inevitable, and the emergence of problems in the workplace is one.

Solutions sets out to provide remedies that are accessible, practical,

meaningful, and final. Well organized, and referenced to specific operations, this book provides troubleshooting and other assistance, and serves as an encyclopedic reference for answers to organizational problems for managers and practitioners. All the functional activities and operations of organizations are included, so that almost any problem or issue that may occur will be addressed in one or more chapters. Readers will be

able to quickly locate, understand and use a specific tool or technique to solve a problem. The different tools available are described, or a single most useful tool indicated. The tool is then explained in depth with an example of how it can be used. The strengths and weaknesses of individual tools are identified and there are suggestions for further help. Solutions is essential for anyone wanting to learn the basics of business problem solving and those
