Thanks to the success of franchises such as The Hunger Games and Twilight, young adult literature has reached a new level of prominence and popularity. Teens and adults alike are drawn to the genre's coming-of-age themes, fast pacing, and vivid emotional portrayals. The essays in this volume suggest ways high school and college instructors can incorporate YA texts into courses in literature, education, library science, and general education. The first group of essays explores key issues in YA literature, situates works in cultural contexts, and addresses questions of text selection and censorship. The second section discusses a range of genres within YA literature, including both realistic and speculative fiction as well as verse narratives, comics, and film. The final section offers ideas for assignments, including interdisciplinary and digital projects, in a variety of courses.

Teacher Commentary on Student Papers SAGE

This eBook is the fourth in a series of books on the critical earthquake response of elastic or elastic-plastic structures under near-fault or long-duration ground motions, and includes six original research papers which were published in the specialty section Earthquake Engineering in ' Frontiers in Built Environment ' . Several extensions of the first eBook, the second eBook and the third eBook are included here. The first article is on the comparison of earthquake resilience of various building structures including innovative base-isolation systems and control systems. Pulse-type ground motions and resonant harmonic ground motions are used for investigating the earthquake resilience of those innovative building structures. The second article is concerned

with the performance of an innovative seismic response controlled system with shear walls and concentrated dampers in lower stories. The resonant one-cycle sine waves and resonant harmonic waves are used as the input ground motions. The third article is related to the robustness evaluation of a base-isolation building-connection hybrid controlled building structure under the critical long-period and long-duration ground motion. The multi impulse is used as a substitute for a long-period and long-duration ground motion and the model reduction to a single-degree-of-freedom (SDOF) system is conducted to propose a simple response evaluation method. The fourth article is an extension of the previously proposed energy balance approach to a damped bilinear hysteretic SDOF system under a double impulse as a substitute for a near-fault ground motion. The energy absorption through viscous damping is incorporated appropriately in the energy balance and the application of the proposed method to actual recorded ground motions is presented. The fifth article is on the robustness evaluation of base-isolation building-connection hybrid controlled building structures considering uncertainties in deep ground. The earthquake ground motion amplitude at the earthquake bedrock is evaluated by the Boore ' s stochastic method in 1983 including the fault rupture and the wave propagation into the earthquake bedrock. Then the phase angle property at the earthquake bedrock is investigated by introducing the concept of phase difference which is defined for each earthquake type. A wave at the ground surface nearly resonant to the base-isolation building-connection hybrid controlled building structure is produced by considering uncertainties in deep ground. The sixth article is concerned with the critical response of nonlinear base-isolated buildings considering soil-structure interaction under a double impulse as a substitute for a near-fault ground motion. The complicated model of a nonlinear base-isolated building on ground is modeled into an SDOF system after a few model reduction processes. The approach presented in this eBook, together with the previous eBooks, is an epoch-making accomplishment to open the door for simpler and deeper understanding of structural reliability and resilience of built environments in the elastic-plastic and nonlinear range.

*Critical Reading and Writing for Postgraduates* Random House

"Always preach to broken hearts and you will never lack for a congregation," an old saying goes. And for that reason, this book is for everyone--because there are many, many things that break our hearts. Sicknesses, spiritual depression, disabilities, painful memories, strained relationships... all of these weigh on Christians' hearts at one time or another. And even when our hearts feel light, there is a longing that runs through us--a crying of the soul for eternity, for a new heavens and a new earth. Yet even in the midst of our heartache, we know there is a faith that comes from Jesus Christ that not only encourages us through our pain, but can even transform our pain... as long as we let it. And here is a collection of warm, pastoral messages, filled with personal illustration, that does just that: helps the brokenhearted Christian to locate the God of all comfort in the center of all pain. We are not left there, either; Mike Milton takes us a step further to see how the gospel actually transforms our private pain into personal praise. So read and discover how God uses the things that seek to destroy us to become the very things that bring us salvation, bring us hope, bring us to prayer, bring us together, and ultimately bring us to heaven.

*Critical Intercultural Communication Pedagogy* Pitchstone Publishing (US&CA)

This new edition of the classic guide offers a thorough and accessible introduction to contemporary critical theory. It provides in-depth coverage of the most common approaches to literary analysis today: feminism, psychoanalysis, Marxism, reader-response theory, new criticism, structuralism and semiotics, deconstruction, new historicism, cultural criticism, lesbian/gay/queer theory, African-American criticism, and postcolonial criticism. The chapters provide an extended explanation of each theory, using examples from everyday life, popular culture, and literary texts; a list of specific questions critics who use that theory ask about literary texts; an interpretation of F. Scott Fitzgerald's *The Great Gatsby* through the lens of each theory; a list of questions for further practice to guide readers in applying each theory to different literary works; and a bibliography of primary and secondary works for further reading. This book can be used as the only text in a course or as a precursor to the study of primary theoretical works. It motivates readers by showing them what critical theory can offer in terms of their practical understanding of literary texts and in terms of their personal understanding of themselves and the world in which they live. Both engaging and rigorous, it is a "how-to" book for undergraduate and graduate students new to critical theory and for college professors who want to broaden their repertoire of critical approaches to literature.

A beautiful commemorative edition of Dr. Martin Luther King's essay "Letter from Birmingham Jail," part of Dr. King's archives published exclusively by HarperCollins. With an afterword by Reginald Dwayne Betts On April 16, 1923, Dr. Martin Luther King Jr., responded to an open letter written and published by eight white clergymen admonishing the civil rights demonstrations happening in Birmingham, Alabama. Dr. King drafted his seminal response on scraps of paper smuggled into jail. King criticizes his detractors for caring more about order than justice, defends nonviolent protests, and argues for the moral responsibility to obey just laws while disobeying unjust ones. "Letter from Birmingham Jail" proclaims a message - confronting any injustice is an acceptable and righteous reason for civil disobedience. This beautifully designed edition presents Dr. King's speech in its entirety, paying tribute to this extraordinary leader and his immeasurable contribution, and inspiring a new generation of activists dedicated to carrying on the fight for justice and equality.
