Fundamentals of Nursing Simon and Schuster

"Provides instructors with a comprehensive, in-depth guide to creating effective classroom exams. Nurse educators will learn how to craft reliable and valid assessment materials ranging from multiple-choice exams and true-false tests to matching exercises and essay responses. Hundred of sample test questions, as well as detailed scoring rubrics, serve as invaluable resources for educators preparing their students for successful careers in nursing. Additionally, the text delves into the pedagogy behind Bloom's taxonomy, how to gauge the difficulty level of questions, and how to revise questions to increase their cognitive challenge. This revised edition is an essential guide for developing questions that require students to think critically and features a chapter on NCLEX test question development"--

Critical Thinking and Writing for Nursing Students F A Davis Company

Now in its Third Edition, this book meets the needs of practical/vocational nurses and nursing faculty, as they work together to smooth the transition from the LPN to the RN role. The text provides interactive student exercises and strategies to "socialize" the LPN nurse/student into an RN program, taking into consideration its philosophy and curricular framework. This Third Edition includes an expanded chapter on communication and a new chapter on the NCLEX®.

Breakthrough Nursing Exams-Critical Thinking Strategies Springer Publishing Company

An Australian text designed to address the key area of clinical reasoning in nursing practice. Using a series of authentic scenarios, Clinical Reasoning guides students through the clinical reasoning process while challenging them to think critically about the nursing care they provide. With scenarios adapted from real clinical situations that occurred in healthcare and community settings, this edition continues to address the core principles for the provision of quality care and the prevention of adverse patient outcomes.

Nursing Health Assessment Jones & Bartlett Learning

Critical Thinking Activities for Nursing Elsevier India

About: To prepare you for real world practice, this book will highlight content areas most relevant to the bedside and why they must be mastered and understood. To help visualize the professional development that is needed as you transition to the responsibilities of the professional nurse, I use the metaphor of building a house; not a static structure, but a unique, vibrant "living" house that is a reflection of how you choose to build and add to it over time. Nursing is a living and vibrant practice that requires your personal involvement and engagement to promote the well-being of those you care for. The components of this "living" home include: Foundation: A house must have a firm and stable foundation. The ethical comportment or the art of nursing is this foundation for every nurse. Caring behaviors, nurse engagement, and professionalism in practice must be present or your nursing practice could be on shaky ground before it even begins! Walls: The applied sciences of nursing: pharmacology, fluid and electrolytes, and anatomy and physiology. I contextualize these sciences to the bedside so the relevance of mastering this content becomes apparent. Roof: Critical thinking and clinical reasoning, which is the thinking that is required by the nurse that completes the house and ties everything together. Skeletons in the closet: Every house has closets and some have a few skeletons in them! Incivility and men in nursing will be explored in detail!

Medical Surgical Nursing Care Prentice Hall

Fundamentals Lippincott Williams & Wilkins

#1 Best Seller in Clinical Pharmacology on Amazon! Course review now. NCLEX-prep later. 1,000+ critical-thinking questions (both multiple choice and alternate format) organize the seemingly huge volume of pharmacology information you must master into manageable sections divided by body systems and specific diseases. You'll not only learn to associate the medication with the disease process, making learning easier, but also be able to evaluate your knowledge before you take your exams. All of the questions encompass the basic concepts of medication administration, including why the client is taking the medication...when the nurse would question administering the medication...how the nurse knows the medication is effective...and what interventions the nurse needs to teach the client concerning the medication. See what students are saying about the Success Series... Great book! "If you are taking pharmacology, you MUST get this book! It is amazing and helps prepare you for those critical thinking NCLEX style questions. Such a great buy, would recommend to ALL nursing students!" --Samantha, Student Amazon Reviewer A must-have for Nursing Pharmacology "This book is a must have for finishing nursing pharmacology! I wouldn't had been able to finish the class without this book & I did receive an A. Great questions with clear and concise rationales. I prefer the FA Davis Success Series to any other NCLEX test-prep books out there." --Nursing Student and Amazon Reviewer "I love that the questions come with rationales and that the books are filled with relevant questions! Tons of people in my class use them and without fail we rave about them after each test!" --Taryn Van Rensburg, Student Nurse, Naugatuck Valley Community College, CT.

Fundamentals of Nursing Lippincott Williams & Wilkins

Helping today's nursing professional acquire essential critical thinking skills for solving both common and more complex health problems, this innovative and insightful workbook contains 92 real-life cases which address all aspects of nursing care (i.e., assessment, analyzing data, planning care, evaluating benefits and possible consequences of care), and demonstrate the cognitive and affective components that influence critical thinking. KEY TOPICS: Contains an introduction to critical thinking, an historical overview of critical thinking, and an in-depth discussion on the affective and cognitive components of critical thinking. Uses critical thinking language throughout; bases all material on critical thinking theory; and fosters both attitude and cognitive critical thinking within each case. Organizes case studies by major nursing specialties--adult health, community and home-care, maternal-newborn, pediatrics, and mental health nursing--and presents many activities and questions within each case to stimulate critical thinking skills. Includes practice sessions, detailed chapter summaries, and a book/Internet link that provides regularly updated material. MARKET: For nurses specializing in adult health, community and home-care, maternal-newborn, pediatrics, and mental health.

Med-Surg Success Jones & Bartlett Publishers

Assure your mastery of medical-surgical nursing knowledge while honing your critical thinking and test-taking skills. The 3rd Edition of this popular resource features over 2,300 questions (including 550 alternate-format questions) that reflect the latest advances in medical-surgical nursing and the latest NCLEX-RN® test plan. They organize the seemingly huge volume of information you must master into manageable sections divided by body systems and specific diseases

[NCLEX-RN Exam](#) Pearson Higher Ed

Medical Surgical Nursing Care 3e has an even stronger focus on the professional Practical nursing program and is a key component in the LPN/LVN series at Pearson. It has a clear and readable writing style, it provides a strong foundation for understanding common disorders that affect adults. Opening units of the book focus on concepts, issues, and foundational knowledge. The units that follow focus on common diseases and disorders organized by body system. Each unit begins with review of the system's structure and function, nursing assessment, and commonly used diagnostic tests for disorders of that system. To facilitate learning, disorder-specific content follows a consistent pattern, beginning with discussion about the disorder, its risk factors, causes, effects on the body, manifestations, and possible complications. Because nurses are integral members of the healthcare team, interdisciplinary care sections include nursing implications for medications, nutritional therapies, surgery and other treatments, including complementary therapies. Each disorder concludes with nursing care, including priorities of care, health promotion, assessment, nursing care measures, and a section addressing continuity of care to home or the community. This text provides more depth in common disease processes, their treatment, and related nursing care. Although organized by body systems for clarity, the book retains a nursing focus throughout. Rationales are provided for nursing interventions to help the student understand the "why," not just the "what."

[You CAN Teach Med-Surg Nursing!](#) Taylor & Francis

Prioritization, Delegation, and Assignment: Practice Exercises for the NCLEX(R) Examination is the only review book on the market with a focus on prioritization and management of care-just like the current NCLEX Examination itself! The workbook's unique approach establishes your foundational knowledge and then provides exercises of increasing difficulty to help you build confidence in your prioritization, delegation, and patient assignment skills. It offers unique preparation for the NCLEX Examination and effectively equips you to practice in today's fast-paced healthcare environment. The only workbook available that provides in-depth practice with prioritization, delegation, and assignment questions similar to those you'll see on the NCLEX Examination, including questions in alternate item formats Unique three-part organization that (1) equips you with foundational skills to make sound decisions, then helps you apply those skills (2) in straightforward scenarios and (3) then in complex health scenarios In-depth Answer Key at the back of the book that provides not only the correct answer but also a detailed rationale and an indication of the focus of the question, whether prioritization, delegation, supervision, or patient assignment. Expanded content focus to include psychiatric/mental health, OB/maternity, and pediatrics along with med-surg areas New chapters on infection control and obstetrics and maternity Greater emphasis on questions involving core body systems and related health problems, such as diabetes and cancer, to best prepare you for the conditions you are most likely to encounter on the NCLEX Examination and in clinical practice Four new unfolding cases addressing long-term care, pediatrics, psychiatric/mental health nursing, and OB/maternity Additional emphasis on medication safety equips you to take appropriate actions to prevent or remediate medication errors Multiple-select questions revised to include at least 5 response choices each, keeping you up to date with the full range of NCLEX Examination item formats

If you are embarking on a university criminology, policing or other law enforcement professional degree, the books in this series will help you acquire and develop the knowledge, skills and strategies you need to achieve your goals. They provide support in all areas important for university study, including institutional and disciplinary policy and practice, self-management, and research and communication. Tasks and activities are designed to foster aspects of learning which are valued in higher education, including learner autonomy and critical thinking, and to guide you towards reflective practice in your study and work life. Critical Thinking Skills for your Policing Degree provides you with a sound knowledge and understanding of: the nature of critical thinking, and of its relevance and importance in HE how to adopt a critical approach to all aspects of your policing studies the importance of active, critical reading, and how it allows you an efficient, principled, effective assessment of the literature in your field the need to adopt a critical approach to writing, characterised by analytical and evaluative use of sources and the development of your own 'voice'.

[Critical Thinking in Nursing](#) Springer Publishing Company

This extensively-updated text is designed to promote excellence in pediatric nursing care, in both acute care settings and in the community. CHILD HEALTH NURSING, 3/e focuses on helping students synthesize new knowledge, apply evidence-based findings, collaborate with children, families, and other healthcare professionals, and use clinical reasoning to plan superior care. It views families as integral participants in all care, and recognizes that all children need health promotion and maintenance interventions, wherever they seek care or whatever conditions they are experiencing. This edition uses current NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020 recommendations. Sample nursing care plans help students apply developmental, psychosocial, and physiologic concepts to the care of children with specific conditions. Research, clinical reasoning, and evidence-based practice are emphasized and integrated throughout, and coverage of contemporary topics ranges from genomics to new pharmacological treatment options.

[Critical Thinking Skills for Your Policing Degree](#) Learning Matters

The road to nursing success begins here! A complete review of core concepts. More than 2,265 classroom-tested, NCLEX®-style questions. (Alternate-item format, too!) Test-taking hints and rationales for correct and incorrect answers. TWO BOOKS IN ONE! Course review now. NCLEX®-prep later. Assure your mastery of medical surgical nursing knowledge while honing your critical thinking and test-taking skills. The 2nd Edition of this popular resource features 2,000 questions that reflect the latest advances in medical-surgical nursing and the new, 2010 NCLEX-RN® test plan. For each practice question, you'll find the answer, rationales for correct and incorrect responses, and a test-taking tip. The comprehensive exam at the end of each chapter assesses your strengths and weaknesses, identifying areas for further study. The bonus CD-ROM, featuring 265 questions, offers an interactive approach to course review and exam preparation.

"The success books have helped me so much in many of my nursing courses, specifically in my med-surg nursing class. I found that the success books helped me to know where to focus my studying and also gave me a lot of great review questions that really prepared me for my exams! By using the med-surg success book, my grades shot up from an 89 to a 96. Also through the med-surg success book, my grades were consistently in the mid to high 90's range. I encourage all my friends to use the success books and they can agree that it has really helped them as well." - Esther Hung, Student Nurse at Molloy College, Rockville Centre, NY [Click Here for a Special Mail-In Rebate Offer](#)
