Critique of Everyday

Life Verso Books

Henri Lefebvre is recognised as one of the influential social theorists of the Twentieth Century.

This book presents a range of Lefebvre's thought. It reinforces the centrality of Lefebvre to debates in social and spatial theory, but also sets Lefebvre's work in the context of his philosophical and political concerns.

Toward an Architecture of Enjoyment Critique of Everyday Life The Three-Volume Text

Leading French thinker with his key work on philosophical thought In *Metaphilosophy*, Henri Lefebvre works through the implications of Marx's revolutionary thought to consider philosophy's engagement with the world. Lefebvre takes Marx's notion

of the "world becoming philosophical and philosophy becoming worldly" as a leitmotif, examining the relation between Hegelian – Marxist supersession and Nietzschean overcoming. *Metaphilosophy* is conceived of as a transformation of philosophy, developing it into a programme of radical worldwide change. The book demonstrates Lefebvre's threefold debt to Hegel, Marx and Nietzsche, but it also brings a number of other figures into the conversation, including Sartre, Heidegger and Axelos. A key text in Lefebvre's oeuvre, *Metaphilosophy* is also a milestone in contemporary thinking about philosophy's relation to the world.

Recent years have witnessed a burgeoning interest in the study of everyday life within the social sciences and humanities. In *Critiques of Everyday Life* Michael Gardiner proposes that there exists a counter-tradition within everyday life theorising. This counter-tradition has sought not

merely to describe lived experience, but to transform it by elevating our understanding of the everyday to the status of a critical knowledge. In his analysis Gardiner engages with the work of a number of significant theorists and approaches that have been marginalized by mainstream academe, including: *The French tradition of everyday life theorising, from the surrealists to Henri Lefebvre, and from the Situationist International to Michel de Certeau *Agnes Heller and the relationship between the everyday, rationality and ethics *Carnival, prosaics and intersubjectivity in the work of Mikhail Bakhtin *Dorothy E. Smith's feminist perspective on everyday life. Critiques of Everyday Life demonstrates the importance of an alternative,

multidisciplinary everyday life paradigm and offers a myriad of new possibilities for critical social and cultural theorising and empirical research.

Henri Lefebvre and the Critique of Everyday Life University of Georgia Press The Routledge Handbook of Henri Lefebvre, The City and Urban Society is the first edited book to focus on Lefebvre's urban theories and ideas from a global perspective, making use of recent theoretical and empirical developments, with contributions from eminent as well as emergent global scholars. The book provides international comparison of Lefebvrian research and theoretical conjecture and aims; to engage with and critique Lefebvre's ideas in the context of contemporary urban, social and environmental upheavals;

to use Lefebvre's spatial triad as a research tool as well as a point of departure for the adoption of ideas such as differential space; to reassess Lefebvre's ideas in relation to nature and global environmental sustainability; and to highlight how a Lefebvrian approach might assist in mobilising resistance to the excesses of globalised neoliberal urbanism. The volume draws inspiration from Lefebvre's key texts (*The Production of Space*; *Critique of Everyday Life*; and *The Urban Revolution*) and includes a comprehensive introduction and concluding chapter by the editors. The conclusions highlight implications in relation to increasing spatial inequalities; increasing diversity of needs including those of migrants; more authoritarian approaches; and asymmetries of access to urban space. Above all, the book illustrates the continuing relevance of Lefebvre's ideas for contemporary urban issues and shows – via global case studies – how resistance to spatial domination by powerful interests might be achieved. The Handbook helps the reader navigate the complex terrain of spatial research inspired by Lefebvre. In particular the Handbook focuses on: the series of struggles globally for the 'right to the city' and the collision of debates around the urban age, 'cityism' and planetary urbanisation. It will be a guide for graduate and advanced undergraduate teaching, and a key reference for academics in the fields of Human Geography, Sociology, Political Science, Applied Philosophy, Planning, Urban Theory and Urban Studies.

Practitioners and activists in the field will also find the book of relevance.

Feminism or Death U of Minnesota Press

Originally published in 1962, when Lefebvre was beginning his career as a lecturer in sociology at the University of Strasbourg, it established his position in the vanguard of a movement which was to culminate in the events of May 1968. A classic analysis of the modern world using Marxist dialectic, it is a book which supersedes the conventional divisions between academic disciplines. With dazzling skill, Lefebvre moves from philosophy to sociology, from literature to history, to present a profound analysis of the social, political and

cultural forces at work in France and the world in the aftermath of Stalin's death—an analysis in which the contours of our own “postmodernity” appear with startling clarity.

Henri Lefebvre has been celebrated as one of the most influential social theorists of the twentieth

century. Understanding Henri Lefebvre places Lefebvre in his historical and intellectual context and analyzes the extraordinary range of his work, across politics, philosophy, history, literature and culture. Particular emphasis is given to Lefebvre's trilogy of inspirational thinkers—Hegel, Marx and Nietzsche; his links to contemporaries such as Heidegger, Axelos and the Situationalists; and his critiques of existentialism and structuralism. Analysis of his writings on cities are balanced with those on rural communities, the production of space connected to ideas of time and history, and everyday life linked to the festival and cultural revolution. Understanding Henri Lefebvre offers the most wide-ranging and reliable account of this central theorist available.

Metaphilosophy Walther König Verlag

Henri Lefebvre's three-volume Critique of Everyday Life is perhaps the richest, most prescient work by one of the twentieth century's greatest philosophers. Written at the birth of post-war consumerism, the Critique was a philosophical inspiration for the 1968 student revolution in France and is considered to be the founding text of all that we know as cultural studies, as well as a major influence on the fields of contemporary philosophy, geography, sociology, architecture, political theory and urbanism. A work of enormous range and subtlety, Lefebvre takes as his starting-point and guide the "trivial" details of quotidian experience: an experience colonized by the commodity, shadowed by inauthenticity, yet one which remains the only source of resistance and change. This is an enduringly radical text, untimely today only in its intransigence and

optimism. Volume One is a groundbreaking analysis of the alienating phenomena of daily life under capitalism.

Space, history, theory

Routledge

Toward an Architecture of Enjoyment is the first publication in any language of the only book devoted to architecture by Henri Lefebvre. Written in 1973 but only recently discovered in a private archive, this work extends Lefebvre's influential theory of urban space to the question of architecture. Taking the practices and perspective of habitation as his starting place, Lefebvre redefines architecture as a mode of imagination rather than a specialized process or a collection of monuments. He calls for an architecture of jouissance—of pleasure or enjoyment—centered on the body and its rhythms and based on the

possibilities of the senses.

Examining architectural examples from the Renaissance to the postwar period, Lefebvre investigates the bodily pleasures of moving in and around buildings and monuments, urban spaces, and gardens and landscapes. He argues that areas dedicated to enjoyment, sensuality, and desire are important sites for a society passing beyond industrial modernization. Lefebvre's theories on space and urbanization fundamentally reshaped the way we understand cities. Toward an Architecture of Enjoyment promises a similar impact on how we think about, and live within, architecture.

The passionately argued,

incendiary French feminist work that first defined “eco-feminism”—now available for the first time in English Originally published in French in 1974, radical feminist Francoise d’Eaubonne surveyed women’s status around the globe and argued that the stakes of feminist struggle was not about equality but about life and death—for humans and the planet. In this wide-ranging manifesto, d’Eaubonne first proposed a politics of ecofeminism, the idea that the patriarchal system’s claim over women’s bodies and the natural world destroys both, and that feminism and environmentalism must bring about a new “mutation”—an overthrow of not just male power but the system of power itself. As d’Eaubonne prophesied, “the planet placed in the feminine will flourish for all.” Never before published in English, and translated here by French feminist scholar Ruth Hottell, this edition includes an introduction from scholars of ecology and feminism situating d’Eaubonne’s work within current feminist theory, environmental justice organizing, and anticolonial feminism.

Social Theory and Its Discontents Wiley-Blackwell

During his lifetime Henri Lefebvre (1901-1991) was renowned in France as a philosopher, sociologist and activist. Although he published more than 70 books, few were available in English until *The Production of Space* was translated in 1991. While this work - often

associated with geography - has influenced educational theory's 'spatial turn,' educationalists have yet to consider Lefebvre's work more broadly. This book engages in an educational reading of the selection of Lefebvre's work that is available in English translation. After introducing Lefebvre's life and works, the book experiments with his concepts and methods in a series of five 'spatial histories' of educational theories. In addition to *The Production of Space*, these studies develop themes from Lefebvre's other translated works: *Rhythmanalysis*, *The Explosion*, the three volumes of *Critique of Everyday Life* and a range of his writings on cities, Marxism, technology and the bureaucratic state. In the course of these inquiries, Lefebvre's own passionate interest in education is uncovered: his critiques of bureaucratized schooling and universities, the analytic concepts he devised to study

educational phenomena, and his educational methods. Throughout the book Middleton demonstrates how Lefebvre's conceptual and methodological tools can enhance the understanding of the spatiotemporal location of educational philosophy and theory. Bridging disciplinary divides, it will be key reading for researchers and academics studying the philosophy, sociology and history of education, as well as those working in fields beyond education including geography, history, cultural studies and sociology. *Spatial Politics, Everyday Life and the Right to the City* Routledge

Henri Lefebvre's three-volume *Critique of Everyday Life* is perhaps the richest, most prescient work by one of the twentieth century's greatest philosophers. The first volume presented an introduction to the concept of everyday life. Written twenty years later, this second volume attempts to establish the necessary

formal instruments for analysis, of grassroots democracy under and outlines a series of theoretical categories within everyday life such as the theory of the semantic field and the theory of moments.

The moment at which the book appeared—1961—was significant both for France and for Lefebvre himself: he was just beginning his career as a lecturer in sociology at Strasbourg, and then at Nanterre, and many of the ideas which were influential in the events leading up to 1968 are to be found in this critique. In its impetuous, often undisciplined prose, the reader may catch a glimpse of how charismatic a lecturer Lefebvre must have been.

The Geography of the Everyday Verso Books

Making the political aspect of Lefebvre's work available in English for the first time, this book contains essays on philosophy, political theory, state formation, spatial planning, and globalization, as well as provocative reflections on the possibilities and limits

advanced capitalism.

Sullivan makes the case for geography as a powerful conceptual framework for seeing the everyday anew and for pushing back against its "givenness" its capacity to so fade into the background that it controls us in dangerously unexamined ways. He ranges across time, space, history, Marxian reproduction, the body, and the geographical mind.

Toward an Understanding of the Given Routledge

Rhythmanalysis displays all the characteristics which made Lefebvre one of the most important Marxist thinkers of the twentieth century. In the analysis of rhythms -- both biological and social -- Lefebvre shows the interrelation of space and time in the understanding

of everyday life. With dazzling skills, Lefebvre moves between discussions of music, the commodity, measurement, the media and the city. In doing so he shows how a non-linear conception of time and history balanced his famous rethinking of the question of space. This volume also includes his earlier essays on "The Rhythmanalysis Project" and "Attempt at the Rhythmanalysis of Mediterranean Towns." *Species of Spaces and Other Pieces* Verso Books

Henri Lefebvre's magnum opus: a monumental exploration of contemporary society. Henri Lefebvre's three-volume *Critique of Everyday Life* is perhaps

A work of enormous range and subtlety, Lefebvre takes as his starting-point and guide the "trivial" details of quotidian experience: an experience colonized by the commodity, shadowed by inauthenticity, yet one

Everyday Life in the Modern World Verso Books

One of the most influential Marxist theorists of the twentieth century, Henri Lefebvre first published *Marxist Thought and the City* in French in 1972, marking a pivotal point in his evolution as a thinker and an important precursor to his groundbreaking work of urban sociology, *The Production of Space*. *Marxist Thought and the City* in which he reviews the work of Karl Marx and Friedrich Engels for commentary and analysis on the life and growth of the city now appears in English for the first time. Rooted in

orthodox Marxism's analyses of capitalism and the capitalist mode of production, with extensive quotations from the works of Marx and Engels, this book describes the city's transition from life under feudalism to modern industrial capitalism. In doing so it highlights the various forces that sought to maintain power in the struggles between the medieval aristocracy and the urban guilds, amid the growth of banking and capital. Providing vital background and supplementary material to Lefebvre's other books, including *The Urban Revolution* and *Right to the City*, *Marxist Thought and the City* is indispensable for students and scholars of urbanism, Marxism, social geography, early modern history, and the history of economic thought. "

Spatial Dialectics Verso

When Henri Lefebvre published *The Urban Revolution* in 1970, he sketched a research itinerary on the emerging tendency towards planetary urbanization. Today, when this tendency has become reality, Lefebvre's ideas on everyday life, production of space, rhythm analysis and the right to the city are indispensable for the understanding of urbanization processes at every scale of social practice. This volume is the first to develop Lefebvre's concepts in social research and architecture by focusing on urban conjunctures in Barcelona, Belgrade, Berlin, Budapest, Copenhagen, Dhaka, Hong Kong, London, New Orleans, Nowa Huta, Paris, Toronto, São Paulo, Sarajevo, as well as in Mexico and Switzerland.

With contributions by historians and theorists of architecture and urbanism, geographers, sociologists, political and cultural scientists, *Urban Revolution* Now reveals the multiplicity of processes of urbanization and the variety of their patterns and actors around the globe.
