Proceedings of the 6th Working Meeting of the Crocodile Specialist Group of the Species Survival Commission of the International Union for Conservation of Nature and Natural Resources Convened at Victoria Falls, Zimbabwe and St. Lucia Estuary, South Africa, 19 to 30 September 1982 Skyhorse

A born naturalist and a fearless traveler, Vladimir Dinets wrote travel guides, conducted field research, and lived a couple of lives before he was accepted into the PhD program in zoology at the University of Miami. He thought crocodiles were a dead-end research topic—survivors from the age of the dinosaurs but not much else—until he witnessed groups of up to seventy alligators performing mating choruses that included infrasound vibrations—a form of communication extremely rare in nature—and a “dance” unknown in the scientific literature but that resembled a scene from Jurassic Park. To prove his thesis about the language of crocodiles, he spent the next six years traveling around the world on shoestring budgets and in extreme circumstances, studying almost every living species. At the same time, as a man desiring companionship in life, he sought love. With adventures on

five continents, Dragon Songs is his account of this quest. It includes an escape from a boiling lava lake in the Afar Desert, being chased up a tree by a tiger in India, hitching a ride with a cocaine smuggler in Bolivia, and diving with giant Greenland sharks—all in the name of studying crocodiles, among which he routinely paddled in his inflatable kayak. Of course, not everything went according to plan. But, in the end, his ground-breaking research helped change the field. And during the course of his adventures, he met and courted his future wife.

Amazing Alligators and Other Story Hour Friends Disha Publications  
Val Plumwood was an eminent environmental philosopher and activist who was prominent in the development of radical ecophilosophy from the early 1970s until her death in 2008. Her book *Feminism and the Mastery of Nature* (1992) has become a classic. In 1985 she was attacked by a crocodile while kayaking alone in the Kakadu national park in the Northern Territory. She was death rolled three times before being released from the crocodile’s jaws. She crawled for hours through swamp with appalling injuries before being rescued. The experience made her well placed to write about cultural responses to death and predation. The first section of *The Eye of the Crocodile* consists of chapters intended for a book on crocodiles that remained unfinished at the time of Val’s death. The remaining chapters are previously published papers brought together to form an overview of Val’s ideas on death, predation and nature.

The book (re)publishes and newly interprets five accounts from the second century BCE Menches Papers, giving insight in the reception of Ptolemaic officials in the Egyptian village Kerkeosiris.

*Primary Australian History* Houghton Mifflin Harcourt

Amelia Peabody is Elizabeth Peters' most brilliant and best-loved creation, a thoroughly Victorian feminist who takes the stuffy world of archaeology by storm with her shocking men's pants and no-nonsense attitude! In this first adventure, our headstrong heroine decides to use her substantial inheritance to see the world. On her travels, she rescues a gentlewoman in distress - Evelyn Barton-Forbes - and the two become friends. The two companions continue to Egypt where they face mysteries, mummies and the redoubtable Radcliffe Emerson, an outspoken archaeologist, who doesn't need women to help him solve mysteries -- at least that's what he thinks!

Monday Morning Books

What animal has the most powerful bite of any living creature? What animal has compounds within its blood that can combat diseases for which humans have no medicines? Which animal breathes air, but can stay submerged for hours at a time? The answer is of course the crocodilians - crocodiles, alligators and their cousins the caimans and the gharial. This book aims to be more than an introduction or overview of crocodiles: it will provide the reader with details only available previously in the scientific journals,

specialist publications or much more technical books. The information is presented in clear language without the need for technical knowledge. The author has painstakingly ensured that the information is based on the most recent studies. The text is accompanied by photos that further illuminate the true nature of these incredible predators. Whether casually interested or deeply fascinated by crocodiles, your needs are met in this book.
