The first canning manual and cookbook authored by Michelin-starred chef and Vie restaurant owner Paul Virant, featuring more than 100 recipes Pairing science with art, Paul Virant presents expert preserving techniques, sophisticated recipes, and seasonal menus inspired by the award-winning fare at his restaurant, Vie, in Western Springs, Illinois. Imaginative tangy jams, brandied fruits, zesty relishes, cured meats, and sweet and savory preserves are the focus of the first half of this book, while seasonal menus pairing these preserves with everything from salads and cocktails to poached fish and braised meat compose the second. Brandied Cherries used in Cherry Clafoutis, or as a garnish for the Beer-Jam Manhattan, are a sweet reminder of the summer harvest. And the Chicken Fried Steak with Smoked Spring Onion Relish anticipates warmer days when you ' re still deep in winter. Alongside recipes and menus, Virant draws on his extensive technical knowledge and experience to provide detailed and comprehensive guidelines for safe canning practices, testing pH, pressure canning, water bath processing, and storing. But no matter how precise the science, Virant never forgets the art in each handcrafted preserve and thoughtfully developed recipe. His unique approach re-imagines seasonal eating by harmonizing opposite or unusual partnerships: the brightness of summer fruit may be tempered with the earthiness of meats and winter produce, or the delicacy of spring vegetables might be enriched by the robust herbs and spices more typical of fall. The Preservation Kitchen not only demonstrates and instructs, it encourages and explores the limitless possibilities of capturing the seasons in a jar.

In *A Girl and Her Pig*, April Bloomfield takes home cooks on an intimate tour of the food that has made her a star. Thoughtful, voice-driven recipes go behind the scenes of Bloomfield's lauded restaurants—The Spotted Pig, The Breslin, and The John Dory—and into her own home kitchen, where her attention to detail and reverence for honest ingredients result in unforgettable dishes that reflect her love for the tactile pleasures of cooking and eating. Bloomfield's innovative yet refreshingly straightforward recipes, which pair her English roots with a deeply Italian influence, offer an unfailingly modern and fresh sensibility and showcase her bold flavors, sensitive handling of seasonal produce, and nose-to-tail ethos. A cookbook as delightful and lacking in pretention as Bloomfield herself, *A Girl and Her Pig* combines exquisite food with charming narratives on Bloomfield's journey from working-class England to the apex of the culinary world, along with loving portraits of the people who have guided her along the way.

Postharvest Handling: A Systems Approach introduces a new concept in the handling of fresh fruits and vegetable. Traditional treatments have been either physiologically based with an emphasis on biological tissue or technologically based with an emphasis on storage and handling. This book integrates all processes from production practices through consumer consumption with an emphasis on understanding market forces and providing fresh product that meets consumer expectations. Postharvest physiologists and technologists across the disciplines of agricultural economics, agricultural engineering, food science and horticulture along with handlers of minimally-processed products within the fresh produce fruit and vegetable processing industries will find this to be an invaluable source of information. Uses a systems approach that provides a unique perspective on the handling of fresh fruits and vegetables Designed with the applied perspective to complement the more basic perspectives provided in other treatments Provides the integrated, interdisciplinary perspective needed in research to improve the quality of fresh and minimally processed products Emphasizes that the design of handling systems should be market-driven rather than concentrating on narrow specifics

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to

management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

Decontamination in Hospitals and Healthcare brings an understanding of decontamination practices and the development of technologies for cleaning and control of infection to a wide audience interested in public health, including healthcare specialists, scientists, students or patients. Part one highlights the importance and history of decontamination in hospitals and healthcare before exploring the role of standards in decontamination, infection control in Europe, and future trends in the area. Part two focuses on decontamination practices in hospitals and healthcare. It considers the role of the nurse in decontamination, the issues of microbial biofilm in waterlines, control of waterborne microorganisms, and the use of gaseous decontamination technologies. Further chapters explore decontamination of prions, the use of protective clothing, no-touch automated room disinfection systems, and controlling the presence of microorganisms in hospitals. Part three discusses practices for decontamination and sterilization of surgical instruments and endoscopes. These chapters examine a range of guidance documents, including the choice framework for local policy and procedures for decontamination of surgical instruments, as well as novel technologies for cleaning and detection of contamination. *Decontamination in Hospitals and Healthcare* provides a reference source on decontamination for public health professionals and students concerned with healthcare. It is particularly useful for scientists in microbiology and disinfection/decontamination laboratories, healthcare workers who use disinfectants, students in microbiology, clinicians, members of the Institute of Decontamination Sciences/Central Sterilising Club, and those employed in the Central Sterile Services departments of healthcare facilities. Discusses decontamination processes in Europe Provides an in-depth understanding into decontamination in healthcare settings, specifically hospitals and dental practices Examines the decontamination of surgical equipment and endoscopes
