Blending science with an evocative narrative, Christopher Dewdney takes readers on a fascinating journey to the most elusive and fluid of the dimensions lying within human perception: time. As he did with the hours between dusk and dawn in *Acquainted with the Night*, Dewdney unlocks all of today, tomorrow and yesterday through his wide-ranging narrative. He shows how time has been imagined through the ages in mythology, philosophy, art and science, answering the questions that have engaged inquiring minds since before recorded history. Why does time flow in only one direction? Is time travel actually possible? Why does time go faster the higher you are from the earth's surface? Spun out across the seasons of a year and through encounters with friends, family and strangers, *Soul of the World* offers extraordinary insights into the nature of time and its influence on us.

From the acclaimed author of *Miracle Cure* and *The Third Horseman*, the epic story of the collision between one of nature's smallest organisms and history's mightiest empire During the golden age of the Roman Empire, Emperor Justinian reigned over a territory that stretched from Italy to North Africa. It was the zenith of his achievements and the last of them. In 542 AD, the bubonic plague struck. In weeks, the glorious classical world of Justinian had been plunged into the medieval and modern Europe was born. At its height, five thousand people died every day in Constantinople. Cities were completely depopulated. It was the first pandemic the world had ever known and it left its indelible mark: when the plague finally ended, more than 25 million people were dead. Weaving together history, microbiology, ecology, jurisprudence, theology, and epidemiology, *Justinian's Flea* is a unique and sweeping account of the little known event that changed the course of a continent.

Robo Sacer engages the digital humanities, critical race theory, border studies, biopolitical theory, and necropolitical theory to interrogate how technology has been used to oppress people of Mexican descent—both within Mexico and in the United States—since the advent of the North American Free Trade Agreement (NAFTA) in 1994. As the book argues, robo-sacer identity emerges as transnational flows of bodies, capital, and technology become an institutionalized state of exception that relegates people from marginalized communities to the periphery. And yet the same technology can be utilized by the oppressed in the service of resistance. The texts studied here represent speculative stories about this technological empowerment. These texts theorize different means of techno-resistance to key realities that have emerged within Mexican and Chicano/a/x communities under the rise and reign of neoliberalism. The first three chapters deal with dehumanization, the trafficking of death, and unbalanced access to technology. The final two chapters deal with the major forms of violence—femicide and drug-related violence—that have grown exponentially in Mexico with the rise of neoliberalism. These stories theorize the role of technology both in oppressing and in providing the subaltern with necessary tools for resistance. *Robo Sacer* builds on the previous studies of Sayak Valencia, Irmgard Emmelhainz, Guy Emerson, Achille Mbembe, and of course Giorgio Agamben, but it differentiates itself from them through its theorization on how technology—and particularly cyborg subjectivity—can amend the reigning biopolitical and necropolitical structures of power in potentially liberatory ways. *Robo Sacer* shows how the cyborg can denaturalize constructs of zo? by providing an outlet through which the oppressed can tell their stories, thus imbuing the oppressed with the power to combat imperialist forces.

In his second book of narrative, lyric poetry, Richard Blanco explores the familiar, unsettling journey for home and connections, those anxious musings about other lives: ÓShould I live here? Could I live here?Ó Whether the exotic (ÓIÓm struck with Maltese fever ÓI dream of buying a little Maltese farmÓ) or merely different (ÓToday, home is a cottage with morning in the yawn of an open windowÓ), he examines the restlessness that threatens from merely staying put, the fear of too many places and too little time. The words are redolent with his Cuban heritage: Marina making mole sauce; T'a Ida bitter over the revolution, missing the sisters who fled to Miami; his father, especially, Óhis hair once as black as the black of his oxfordsÓ Yet this is a volume for all who have longed for enveloping arms and words, and for that sanctuary called home. ÓSo much of my life spent like this-suspended, moving toward unknown places and names or returning to those I know, corresponding with the paradox of crossing, being nowhere yet here.Ó Blanco embraces juxtaposition. There is the Cuban Blanco, the American Richard, the engineer by day, the poet by heart, the rhythms of Spanish, the percussion of English, the first-world professional, the immigrant, the gay man, the straight world. There is the ennui behind the question: why cannot I not just live where I live? Too, there is the precious, fleeting relief when he can write "ÓI am, for a moment, not afraid of being no more than what I hear and see, no more than this:..." It is what we all hope for, too.

This time he was not disappointed. As she passed the box, adrenaline kicked in, he could smell the salt from the sweat underneath his armpits. A humming, drowning noise coming from inside the walls of the café lasted for several minutes; John gulped and held his breath as the object of his first project walked passed her destiny. She was less than six, no five feet away from her fate. The next time would be her last, the next time would be his first. Definitely dark, mean and thought-provoking, *The Secret to Being Frank* has that extra middle finger of Hannibal Lector right on the pulse of the reader's guilty pleasure. This rollercoaster of a novel has ignored all the ground rules as it careers down the track towards the evil beyond insanity. In-depth character profiling enables the reader to enter the dark tunnel of the psychotic brain and believe. Authentic and nerve-fraying writing graphically depicts dark, harrowing scenes and spine-chilling moments. The scream machine is launched into mid-air in Wales during the middle of the 20th century, when an inexperienced, belligerent detective Frank Macleod encounters Samuel John, a mission-orientated serial killer. Even with the hereditary gift of damashealladh, second sight, Macleod, headstrong, unorthodox and carrying his own psychological baggage, appears totally out of his depth against John. Can he stop this death drive and prevent the body count from spiralling out of control? Will he take up the challenge, and can he control his relentless sexual appetite? Look out for the banked curve, the unusual death-defying twists and conflict in the plot. Hold onto your sanity or you could be the next victim. *The Secret to Being Frank* has been inspired by novels that balance a fine line between a psychological thriller and a horror, including those by Jo Nesbo, SJ Bolton and Karin Fossum.
