Going Home to the Fifties CRC Press

A collections of stories and recipes from renowned Georgia chef Vera Stewart [The Very Vera Cookbook](#) MIT Press Liberty Street Sugar House was a tall, narrow building five stories in height, and with dismal underground dungeons. In this gloomy abode jail fever was ever present. In the hot weather of July, 1777, companies of twenty at a time would be sent out for half an hour's outing, in the court yard. Inside groups of six stood for ten minutes at a time at the windows for a breath of air.

Laser Science and Technology Pantheon Electronics is an ever-changing field with an entrepreneurial spirit and a rich history, populated by some of the world's most famous companies and personalities. The Business of Electronics details the field's complex ecosystem in all its trials and tribulations. It looks at companies such as Apple, IBM, Samsung, and Nokia, as well as now-extinct companies such as Honeywell Bull (France) and Sinclair Computers (UK) that contributed to technology and business. Sethi shows us how a handful of US companies led the charge in designing equipment that could make millions of small, reliable components; how Nokia started in the timber business; the history of inventors like J.C. Bose, a pioneer in radio communication (who inadvertently made Guglielmo Marconi famous); and why there are numerous companies and creators that never made it or that we have never heard of. This all-encompassing book not only explores the vibrant history of electronics, it uses case studies to examine the companies and people that made history and explain how we ended up

where we are today.

Gas Cleaning at High Temperatures John Wiley & Sons

The soft crash of waves that blissfully block out all other noise, the smell of two-stroke and lawn clippings, the first sip of cold beer, the laboured whir of the ceiling fan, the sound of a bag of ice hitting the pavement, that feeling of salt on skin and even the smell of prawns on bin night. Comedian Tim Ross uses the Australian Summer as a back drop for a new collection of nostalgic short stories.

American Prisoners of the Revolution Penguin

From the best-selling coauthor of The Disaster Artist and "one of America's best and most interesting writers" (Stephen

King), a new collection of stories that range from laugh-out-loud funny to disturbingly dark—unflinching portraits of women and men struggling to bridge the gap between art and life. A young and ingratiating assistant to a movie star makes a blunder that puts his boss and a major studio at grave risk. A long-married couple hires an escort for a threesome in order to rejuvenate their relationship. An assistant at a prestigious literary journal reconnects with a middle school frenemy and finds that his carefully constructed world of refinement cannot protect him from his past. A Bush administration lawyer wakes up on an abandoned airplane, trapped in a nightmare of his own making. In these and other stories, Tom Bissell vividly renders the complex worlds of characters on the brink of artistic and personal crises—writers, video-game developers, actors, and other creative types who see things slightly differently from the rest of us. With its surreal, poignant, and sometimes squirm-inducing stories, *Creative Types* is a brilliant new offering from one of the most versatile and talented writers working in America today.

The Grace Walk Experience Hp Books

"This is a book that is full of things I have never seen before, and full of new things to say about things I thought I knew well. It is a book about houses and about culture and about how each affects the other, and it must stand as one of the major works on the history of modern housing." - Paul Goldberger, *The New York Times Book Review*

Long before Betty Friedan wrote about "the problem that had no name" in *The Feminine Mystique*, a group of American feminists whose leaders included Melusina Fay Peirce, Mary Livermore, and Charlotte Perkins Gilman campaigned against women's isolation in the home and confinement to domestic life as the basic cause of their unequal position in society. *The Grand Domestic Revolution* reveals the innovative plans and visionary strategies of these persistent women,

who developed the theory and practice of what Hayden calls "material feminism" in pursuit of economic independence and social equality. The material feminists' ambitious goals of socialized housework and child care meant revolutionizing the American home and creating community services. They raised fundamental questions about the relationship of men, women, and children in industrial society. Hayden analyzes the utopian and pragmatic sources of the feminists' programs for domestic reorganization and the conflicts over class, race, and gender they encountered. This history of a little-known intellectual tradition challenging patriarchal notions of "women's place" and "women's work" offers a new interpretation of the history of American feminism and a new interpretation of the history of American housing and urban design. Hayden shows how the material feminists' political ideology led them to design physical space to create housewives' cooperatives, kitchenless houses, day-care centers, public kitchens, and community dining halls. In their insistence that women be paid for domestic labor, the material feminists won the support of many suffragists and of novelists such as Edward Bellamy and William Dean Howells, who helped popularize their cause. Ebenezer Howard, Rudolph Schindler, and Lewis Mumford were among the many progressive architects and planners who promoted the reorganization of housing and neighborhoods around the needs of employed women. In reevaluating these early feminist plans for the environmental and economic transformation of American society and in recording the vigorous and many-sided arguments that evolved around the issues they raised, Hayden brings to light basic economic and spacial contradictions which outdated forms of housing and inadequate community services still create for American women and for their families.

Design of Gas Burners for Domestic Use W.E. Upjohn Institute

This is the first major study of a neglected yet extremely significant subject: the London middle classes in the period between 1660 and 1730, a period in which they created a society and economy that can be seen with hindsight to have ushered in the modern world. Using a wealth of material from contemporary sources--including wills, business papers, inventories, marriage contracts, divorce hearings, and the writings of Daniel Defoe and Samuel Pepys--Peter Earle presents a fully rounded picture of the "middling sort of people," getting to the hearts of their lives as men and women struggling for success in the biggest, richest, and most middle-class city in contemporary Europe. He examines in fascinating and convincing detail the business life of Londoners, from apprenticeship through the problems and potential rewards of different occupational groups, going on to look at middle-class family, social, political and material life--from relationships with spouses, children, servants, and neighbors, to food and clothes and furniture, to sickness, death, and burial. Stimulating, scholarly, and constantly illuminating, this book is an important and impressive contribution to English social history.

Testing Adhesive Joints Gibbs Smith
Joining techniques such as welding, brazing, riveting and screwing are used by industry all over the world on a daily basis. A further method of joining has also proven to be highly successful: adhesive bonding.

Adhesive bonding technology has an extremely broad range of applications. And it is difficult to imagine a product - in the home, in industry, in transportation, or anywhere else for that matter - that does not use adhesives or sealants in some manner.

The book focuses on the methodology used for fabricating and testing adhesive and bonded joint specimens. The text covers a wide range of test methods that are used in the field of adhesives, providing vital information for dealing with the range of adhesive properties that are of interest to the adhesive community. With contributions from many experts in the field, the entire breadth of industrial laboratory examples, utilizing different best practice techniques are discussed. The core concept of the book is to provide essential information vital for producing and characterizing adhesives and adhesively bonded joints.

A complete update to a classic, respected resource Invaluable reference, supplying a comprehensive overview on how to undertake and present research ABC Street Springer Science & Business Media The conference "Laser Science and Technology" was held May 11-19, 1987 in Erice, Sicily. This was the 12th conference organized by the International School of Quantum Electronics, under the auspices of the "Ettore Majorana" Center for Scientific Culture. This volume contains both the invited

and contributed papers presented at the conference, covering current research work in two areas: new laser sources, and laser applications. The operation of the first laser by Dr. Theodore Maiman in 1960 initiated a decade of scientific exploration of new laser sources. This was followed by the decade of the 1970s, which was characterized by "technology push" in which the discoveries of the 1960s were seeking practical application. In the 1980s we are instead seeking "applications pull," in which the success and rapid maturing of laser applications provides both inspiration and financial resources to stimulate additional work both on laser sources and applications. The papers presented in these Proceedings attest to the great vitality of research in both these areas: New Laser Sources. The papers describe current developments in ultra violet excimer lasers, X-ray lasers, and free electron lasers. These new lasers share several characteristics: each is a potentially important coherent source; each is at a relatively short wavelength (below 1 micrometer); and each is receiving significant development attention today.

In **Homemaking for the Apocalypse**, Jill E. Anderson interrogates patterns of Atomic Age conformity that controlled the domestic practices and private activities of Americans. Used as a way to promote security in a period rife with anxieties about nuclear annihilation and **The Bomb**, these narratives of domesticity were governed by ideals of compulsory normativity, and their circulation upheld the wholesale idealization of homemaking within a white, middle-class nuclear family and all that

came along with it: unchecked reproduction, constant consumerism, and a general policing of practices deemed contradictory to normative American life. Homemaking for the apocalypse seeks out the disruptions to the domestic ideals found in memoirs, Civil Defense literature, the fallout shelter debate, horror films, comics, and science fiction, engaging in elements of horror in order to expose how closely domestic practices are tied to dread and anxiety.

Homemaking for the Apocalypse offers a narrative of the Atomic Age that calls into question popular memory 's acceptance of the conformity thesis and proposes new methods for critiquing the domestic imperative of the period by acknowledging its deep tie to horror.
