From the author of *Last Horizons*, Peter Hathaway Capstick now presents *Death in a Lonely Land*, a second volume of his hunting, fishing, and shooting adventures on five continents—stories collected from such magazines as *Outdoor Life*, *NRA's American Hunter*, *Guns & Ammo*, and *Petersen's Hunting*. The stockbroker-turned-outdoorsman recalls his days as an African pro hunter in “*The Killer Baboons of Vlackfontein*.” “*Four Fangs in a Treetop*” records a foray into British Honduras for the jaguar, “a gold-dappled teardrop of

motion.” Capstick narrowly escapes the Yellow Beard, Central America's deadly tree-climbing snake, and cows “*The Black Death* (Cape buffalo) in the kind of article that makes this author “the guru of American hunting fans” (*New York Newsday*). On Brazil's forsaken Marajo Island, he bags the pugnacious red buffalo, which has the “temperament of a constipated Sumo wrestler and the tenacity of an IRS man.” The author discusses 12- and 20-gauge shotgun loads; recalls the pleasures of “biltong” (African beef jerky); describes the irresistible homemade lures of snook fishing expert John Gorbach; and kills a genteel take of Atlantic salmon with the brilliantly simple tube fly. Featuring more than thirty gorgeous drawings by famous wildlife artist Dino Paravano, *Death in a Lonely Land* is another collector's item by a writer who “keeps the tradition of great safari adventure alive in each of his books” (*African Expedition*

*Gazette*).

This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-

friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

"Riflecraft has been completely ignored since World War II", said Jeff Cooper, America's foremost rifle instructor. To remedy this situation, he took it upon himself to set down the fine art of the rifle before it was lost forever. In his no-holds-barred style, Cooper instructs you in everything you need to know about shooting the rifle, while entertaining you with tales of marksmanship, combat and big-game hunting.

When this book was published in 1984, it reframed the debate on the French Revolution, shifting the discussion from the Revolution's role in wider, extrinsic processes (such as modernization, capitalist development, and the rise of twentieth-century totalitarian regimes) to its central political significance: the discovery of the potential of political action to consciously transform society by molding character, culture, and social relations. In a new preface to this twentieth-anniversary edition, Hunt reconsiders her work in the light of the past twenty years' scholarship.

### Biographical Register of the Officers

The law is full of stories, ranging from the competing narratives presented at trials to the Olympian historical narratives set forth in Supreme Court opinions. How those stories are told and listened to makes a crucial difference to those whose lives are reworked in legal storytelling. The public at large has increasingly been drawn to law as an area where vivid human stories are played out with distinctively high stakes. And scholars in several fields have recently come to recognize that law's stories need to be

studied critically. This notable volume--inspired by a symposium held at Yale Law School--brings together an exceptional group of well-known figures in law and literary studies to take a probing look at how and why stories are told in the law and how they are constructed and made effective. Why is it that some stories--confessions, victim impact statements--can be excluded from decisionmakers' hearing? How do judges claim the authority by which they impose certain stories on reality? Law's Stories opens new perspectives on the law, as narrative exchange, performance, explanation. It provides a compelling encounter of law and literature, seen as two wary but necessary interlocutors. Contributors: J. M. Balkin, Peter Brooks, Harlon L. Dalton, Alan M. Dershowitz, Daniel A.
