EI-Hi Textbooks & Serials in Print, 2003

... Presents activities to help students develop their

thinking and problem-solving skills. Mathematics curriculum specialists have identified from ten to fifteen strategies that can help students solve nonroutine math problems. Often students may need to use more than one such strategy to arrive at the solution for a given problem. Some of these strategies require that students use skills such as thinking visually, recognizing patterns, using logical reasoning, and doing organized counting ...
