Crossroads (afterlife Book 1) QPM

Our current food system has decimated rural communities and confined the choices of urban consumers. Even while America continues to ramp up farm production to astounding levels, net farm income is now lower than at the onset of the Great Depression, and one out of every eight Americans faces hunger. But a healthier and more equitable food system is possible. In Building Community Food Webs, Ken Meter shows how grassroots food and farming leaders across the U.S. are tackling these challenges by constructing civic networks. Overturning extractive economic structures, these inspired leaders are engaging low-income residents, farmers, and local organizations in their quest to build stronger communities. Community food webs strive to build health, wealth, capacity, and connection. Their essential element is building greater respect and mutual trust, so community members can more effectively empower themselves and address local challenges. Farmers and researchers may convene to improve farming practices collaboratively. Health clinics help clients grow food for themselves and attain better health. Food banks engage their customers to challenge the root causes of poverty. Municipalities invest large sums to protect farmland from development. Developers forge links among local businesses to strengthen economic trade. Leaders in communities marginalized by our current food system are charting a new path forward. Building Community Food Webs captures the essence of these efforts, underway in diverse places including Montana, Hawai'i, Vermont, Arizona, Colorado, Indiana, and Minnesota. Addressing challenges as well as opportunities, Meter offers pragmatic insights for community food leaders and other grassroots activists alike.

Focusing on the art and literary form of manga, this volume examines the intercultural exchanges that have shaped manga during the twentieth century and how manga's culturalization is related to its globalization. Through

contributions from leading scholars in the fields of comics and Japanese culture, it describes "manga culture" in two ways: as a fundamentally hybrid culture comprised of both subcultures and transcultures, and as an aesthetic culture which has eluded modernist notions of art, originality, and authorship. The latter is demonstrated in a special focus on the best-selling manga franchise, NARUTO.

Urban Climate Change Crossroads Independently Published
Using primary and secondary sources, Wilma Henrickson assembles a collection of documents related to decisive moments in the history of Detroit and the region, spanning the time from before statehood to the present. These were turning points for the region—life for the residents took a new direction, definitely closing off some options while accepting others. Some were brought about by accident; others were made by conscious decision. The consequences of some decisions were immediate, others appeared only after the accumulation of years. Among Henrickson's recurring themes are the destruction of the environment and its natural beauty, the lure of wealth, urban expansion and sprawl and civil rights. Selections include Lewis Cass' position paper on "Indian Removal," Jorge de Castellanos' article of "Black Slavery in Early Detroit," and excerpts from the writings of historian and mapmaker Silas farmer.
