This edition is not just a rehash of old, albeit classic and still important, stuff. Instead, it provides a fresh perspective on a topic of perennial interest for those working in the field that has been variously called training and development, human resource development, performance technology, and workplace learning and performance. The fresh perspective takes into consideration two additional instructor settings to the traditional face-to-face environments that most instructors and trainers know -- that is, online and blended settings. These settings are, of course, becoming more critical as instruction moves beyond classroom settings to include virtual and combinations of classroom and other media delivery methods. The ibstpi instructor competencies match up well to Mapping the Future (Bernthal, Colteryahn, Davis, Naughton, Rothwell, & Wellins 2004), the current ASTD competency study of the field now known as Workplace Learning and Performance (WLP) and previously known as Training and Development (T&D). WLP is more than a new name for an old subject and represents a fundamental paradigm shift in what it means to be a professional in the field formerly known as training. WLP is all about getting improved performance -- and therefore improved results -- in organizational settings through planned and unplanned learning interventions.

Instruction is thus a means to an end and not an end in itself. The ibstpi instructor competencies dovetail well with that philosophy.

The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the Framework for Teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the Framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.

" McGonigal is a clear, methodical writer, and her ideas are well argued. Assertions are backed by countless psychological studies. " —The Boston Globe " Powerful and provocative . . . With 174 million gamers in the United States alone, we now live in a world where every generation will be a gamer generation. But why, Jane McGonigal asks, should games be used for escapist entertainment alone? In this groundbreaking book, she shows how we can leverage the power of games to fix what is wrong with the real world—from social problems like depression and obesity to global issues like poverty and climate change—and introduces us to cutting-edge games that are already changing the business, education, and nonprofit worlds. A research-based guide for educators to the practical methods of understanding, evaluating and facilitating the change process. Significantly revised based on student and instructor feedback, the new third edition of Implementing Change continues to examine the ways in which change processes are experienced by those "on the ground" while adding new features, new material and the most current research. Based primarily on the Concerns Based Adoption Model (CBAM), this user-friendly text focuses on introducing constructs that can be used by those engaged in facilitating change processes as well as those who are evaluating and studying change. Rather than maintaining a bird's eye view of change processes, each chapter introduces a research-based, research-verified construct about change that captures the complexity of implementing change and the diversity of reactions to it. With a stress on pedagogical aids, each chapter incorporates practical examples, sample research, case studies, reflection questions and examples of common roadblocks to change.
