Site of the world's busiest and most lucrative harbor throughout the first half of the twentieth century, the Port of New York was also the historic preserve of Irish American gangsters, politicians, longshoremen's union leaders, and powerful Roman Catholic pastors. This is the demimonde depicted to stunning effect in Elia Kazan's *On the Waterfront* (1954) and into which James T. Fisher takes readers in this remarkable and engaging historical account of the classic film's backstory. Fisher introduces readers to the real "Father Pete Barry" featured in *On the Waterfront*, John M. "Pete" Corridan, a crusading priest committed to winning union democracy and social justice for the port's dockworkers and their families. A Jesuit labor school instructor, not a parish priest, Corridan was on but not of Manhattan's West Side Irish waterfront. His ferocious advocacy was resisted by the very men he sought to rescue from the violence and criminality that rendered the port "a jungle, an outlaw frontier," in the words of investigative reporter Malcolm Johnson. Driven off the waterfront, Corridan forged creative and spiritual alliances with men like Johnson and Budd

Schulberg, the screenwriter who worked with Corridan for five years to turn Johnson's Pulitzer Prize-winning 1948 newspaper exposé into a movie. Fisher's detailed account of the waterfront priest's central role in the film's creation challenges standard views of the film as a post facto justification for Kazan and Schulberg's testimony as ex-communists before the House Committee on Un-American Activities. On the Irish Waterfront is also a detailed social history of the New York/New Jersey waterfront, from the rise of Irish American entrepreneurs and political bosses during the World War I era to the mid-1950s, when the emergence of a revolutionary new mode of cargo-shipping signaled a radical reorganization of the port. This book explores the conflicts experienced and accommodations made by an insular Irish-Catholic community forced to adapt its economic, political, and religious lives to powerful forces of change both local and global in scope.

When a band of Norman adventurers arrived in southern Italy to fight in the Lombard insurrections against the Byzantine empire in the early 1000s, few would have predicted that within a generation these men would have seized control of Apulia, Calabria and Sicily. How did they make such extraordinary gains and then consolidate their power? Paul Brown, in this thoroughly researched and absorbing study, seeks to answer these questions and throw light onto the Norman conquests across the Mediterranean. Throughout he focuses on the military side of their progress, as they advanced from mercenaries to conquerors, then crusaders. The story of the campaigns they undertook in Italy, Sicily, the Balkans and the

Near East reveals their remarkable talent for war. The dominant role played by a succession of Norman leaders is a key theme of the narrative a line of ambitious and ruthless soldiers that ran from Robert Guiscard and Bohemond to Roger II and Tancred.

How were the Crusades made possible? This volume is the first to bring together experts from the fields of medieval Western, Byzantine and Middle Eastern studies specifically to address the logistics of Crusading. It deals with questions of manpower, types and means of transportation by land and sea, supplies, financial resources, roads and natural land routes, sea lanes and natural sailing routes. Of particular importance is the attention given to the horses and other animals on which transport of supplies and the movement of armies depended.

A major new history of the Crusades with an unprecedented wide scope, told in a tableau of portraits of people on all sides of the wars, from the author of *Powers and Thrones*. For more than one thousand years, Christians and Muslims lived side by side, sometimes at peace and sometimes at war. When Christian armies seized Jerusalem in 1099, they began the most notorious period of conflict between the two religions. Depending on who you ask, the fall of the holy city was either an inspiring legend or the greatest of horrors. In *Crusaders*, Dan Jones interrogates the many sides of the larger story, charting a deeply human and avowedly pluralist path through the crusading era. Expanding the usual timeframe, Jones looks to the roots of Christian-Muslim relations in the eighth century and tracks the influence of crusading to present day. He widens the geographical focus to far-flung regions home to so-called enemies of the Church, including Spain, North Africa, southern France, and the Baltic states. By telling intimate stories of individual journeys, Jones illuminates these centuries of war not only from the perspective of popes and kings, but from Arab-Sicilian poets, Byzantine princesses, Sunni scholars, Shi'ite viziers, Mamluk slave soldiers, Mongol chieftains, and barefoot friars. Crusading remains a rallying call to this day, but its role in the popular imagination ignores the cooperation and complicated coexistence that were just as much a feature of the period as warfare. The age-old relationships between faith,

conquest, wealth, power, and trade meant that crusading was not only about fighting for the glory of God, but also, among other earthly reasons, about gold. In this richly dramatic narrative that gives voice to sources usually pushed to the margins, Dan Jones has written an authoritative survey of the holy wars with global scope and human focus.

æIn the seven decades since the Second World War, 14 Squadron has operated a wide array of aircraft types (Mosquitoes, Vampires, Venoms, Hunters, Canberras, Phantoms, Jaguars and Tornados) in a fascinating variety of roles. For much of this time, the Squadron was based in Germany at the front line of the Cold War, but it also participated in the Gulf War in 1991, in operations over Iraq from 1991-2009, in the Kosovo conflict in 2000 and latterly during the war in Afghanistan, firstly with the Tornado GR4 and then with the Shadow R1. Today the Squadron operates in great secrecy in an Intelligence, Surveillance, Target Acquisition and Reconnaissance role.æ Having had access to log-books, contemporary diaries, maps and photographs, as well as oral and written accounts from a large number of ex-Squadron members, the author has been able to produce as complete an account as is presently possible of the operational history of 14 Squadron in the second half of the twentieth century and the opening years of the twenty-first.

For the last 150 years the historiography of the Crusades has been dominated by nationalist and colonialist discourses in Europe and the Levant. These modern histories have interpreted the Crusades in terms of dichotomous camps, Frankish and Muslim. In this revisionist study, Ronnie Ellenblum presents an interpretation of Crusader historiography that instead defines military and architectural relations between the Franks, local Christians,

Muslims and Turks in terms of continuous dialogue and mutual influence. Through close analysis of siege tactics, defensive strategies and the structure and distribution of Crusader castles, Ellenblum relates patterns of crusader settlement to their environment and demonstrates the influence of opposing cultures on tactics and fortifications. He argues that fortifications were often built according to economic and geographic considerations rather than for strategic reasons or to protect illusory 'frontiers', and that Crusader castles are the most evident expression of a cultural dialogue between east and west.

The Fourth Crusade was the first, and most famous of the 'diverted' Crusades, which saw the Crusade diverted from its original target, Ayyubi Egypt, to attack the Christian city of Zadar in modern Croatia instead, an attack that was little more than a mercenary action to repay the Venetians for their provision of a fleet to the Crusaders. This book examines the combined action and sacking of the city of Zara, which saw the Crusaders temporarily excommunicated by the Pope. It goes on to evaluate how the influence of the Venetians prompted an attack on Constantinople, analyses the siege that followed and describes the naval assault and sacking of the city which saw the Crusaders place Count Baldwin of Flanders on the Byzantine throne.

The approaches and methods developed in this project contribute to advancing the field of Intelligence and Security Informatics (ISI). Such advances will help related stakeholders to perform terrorism research and facilitate international security and peace. This monograph aims to provide an overview of the Dark Web landscape, suggest a systematic, computational approach to understanding the problems, and illustrate with selected techniques, methods, and case studies developed by the University of Arizona AI Lab Dark Web team members. This work aims to provide an interdisciplinary and understandable monograph about Dark Web research along three dimensions: methodological issues in Dark Web research; database and computational techniques to support information collection and data mining; and legal, social, privacy, and data confidentiality challenges and approaches. It will bring useful knowledge to scientists, security professionals, counterterrorism experts, and policy makers. The monograph can also serve as a reference material or textbook in graduate level courses related to information security, information policy, information assurance, information systems, terrorism, and public policy.

Death by fire - Death by ice.  
These were the twin threats confronting the seamen on the North Atlantic convoys: fire

from the Luftwaffe's bombs, and from the torpedoes of the lurking U-Boats: ice in the deadly cold waters that could kill in three minutes, five minutes at most. Between these two hells lived another threat: the slow paralyzing hand of fear.
