The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

How Change Happens Arcadia Publishing

Tortoises disappear from a Madagascar reserve and reappear in the Bronx Zoo. A dead iguana floats in a jar, awaiting its unveiling in a Florida court. A viper causes mayhem from Ethiopia to Virginia. In Stolen World, Jennie Erin Smith takes the reader on an unforgettable journey, a dark adventure over five decades and six continents. In 1965, Hank Molt, a young cheese salesman from Philadelphia, reinvented himself as a “specialist dealer in rare fauna,” traveling the world to collect exquisite reptiles for zoos and museums. By the end of the decade that followed, new endangered species laws had turned Molt into a convicted smuggler, and an unrepentant one, who went on to provide many of the same rare reptiles to many of the same institutions, covertly. But Molt soon found a rival in Tommy Crutchfield, a Florida carpet salesman with every intention of usurping Molt as the most accomplished reptile smuggler in the country. Like Molt, Crutchfield had modeled himself after an earlier generation of natural-history collectors celebrated for their service to science, an ideal that, for Molt and Crutchfield, eclipsed the realities of the new wildlife-protection laws. Zoo curators, caught between a desire for rare animals and the conservation-minded focus of their institutions, became the smugglers’ antagonists in court but also their best customers, sometimes simultaneously. Crutchfield forged ties with a criminally inclined Malaysian wildlife trader and emerged a millionaire, beloved by some of the finest zoos in the world. Molt, following a string of inventive but disastrous smuggling schemes in New Guinea, was reduced to hanging around Crutchfield’s Florida compound, plotting Crutchfield’s demise. The fallout from their feud would result in a major federal investigation with tentacles in Germany, Madagascar, Holland, and Malaysia. And yet even after prison, personal ruin, and the depredations of age, Molt and Crutchfield never stopped scheming, never stopped longing for the snake or lizard that would earn each his rightful place in a world that had forgotten them—or rather, had never recognized them to begin with.

Electronics Buying GuideThe Ghost of Crutchfield Hall

Discover how those who change the world do so with this thoughtful and timely book Why do some changes occur, and others don't? What are the factors that drive successful social and environmental movements, while others falter? How Change Happens examines the leadership approaches, campaign strategies, and ground-level tactics employed in a range of modern

social change campaigns. The book explores successful movements that have achieved phenomenal impact since the 1980s—tobacco control, gun rights expansion, LGBT marriage equality, and acid rain elimination. It also examines recent campaigns that seem to have fizzled, like Occupy Wall Street, and those that continue to struggle, like gun violence prevention and carbon emissions reduction. And it explores implications for movements that are newly emerging, like Black Lives Matter. By comparing successful social change campaigns to the rest, How Change Happens reveals powerful lessons for changemakers who seek to impact society and the planet for the better in the 21st century. Author Leslie Crutchfield is a writer, lecturer, social impact advisor, and leading authority on scaling social innovation. She is Executive Director of the Global Social Enterprise Initiative (GSEI) at Georgetown University ’ s McDonough School of Business, and co-author of two previous books, Forces for Good and Do More than Give. She serves as a senior advisor with FSG, the global social impact consulting firm. She is frequently invited to speak at nonprofit, philanthropic, and corporate events, and has appeared on shows such as ABC News Now and NPR, among others. She is an active media contributor, with pieces appearing in The Washington Post. Fortune.com, CNN/Money and Harvard Business Review.com. Examines why some societal shifts occur, and others don't Illustrates the factors that drive successful social and environmental movements Looks at the approaches, strategies, and tactics that changemakers employ in order to effect widescale change Whatever cause inspires you, advance it by applying the must-read advice in How Change Happens—whether you lead a social change effort, or if you ’ re tired of just watching from the outside and want to join the fray, or if you simply want to better understand how change happens, this book is the place to start.

From the founders of nonprofits Water.org & WaterEquity Gary White and Matt Damon, the incredible true story of two unlikely allies on a mission to end the global water crisis for good On any given morning, you might wake up and shower with water, make your coffee with water, flush your toilet with water—and think nothing of it. But around the world, more than three-quarters of a billion people can’t do any of that—because they have no clean water source near their homes. And 1.7 billion don’t have access to a toilet. This crisis affects a third of the people on the planet. It keeps kids out of school and women out of work. It traps people in extreme poverty. It spreads disease. It’s also solvable. That conviction is what brought together movie actor Matt Damon and water expert and engineer Gary White. They spent years getting the answer wrong, then halfway right, then almost right. Over time, they and their organization, Water.org, have found an approach that works. Working with partners across East Africa, Latin America, South Asia, and Southeast Asia, they’ve helped over 40 million people access water and/or sanitation. In The Worth of Water, Gary and Matt take us along on the journey—telling stories as they uncover insights, try out new ideas, and travel between the communities they serve and the halls of power where decisions get made. With humor and humility, they illuminate the challenges of

launching a brand-new model with extremely high stakes: better health and greater prosperity for people allover the world. The Worth of Water invites us to become a part of this effort—to match hope with resources, to empower families and communities, and to end the global water crisis for good. All the authors’ proceeds from the sale of this book will be donated to Water.org.

Popular Science Independently Published

Walk into Hinkle Fieldhouse, and you feel it--that palpable sense of history known as the Hinkle mystique. Indiana's basketball cathedral has stood in all its glory at Butler University since 1928. John Wooden, Oscar Robertson and Larry Bird played on its floor. Jesse Owens sprinted to a record at Hinkle, and athletes from around the globe have brought Olympic-level competition to crowds gathered under its steel arches. It was the setting for the climactic scene in Hoosiers, arguably the greatest sports movie ever made. It has hosted evangelists, ice shows, tennis matches, bike races and even roller derbies. Author Eric Angevine gets inside the paint in this complete Hinkle history, featuring archival photographs of the iconic structure and words from those who know it best.

Sound & Vision Simon and Schuster

A quiet visit with her grandparents turns into a lesson in the fluidity of time for Polly O’Keefe when she meets several strangers from overlapping temporal planes and, with them, plays a key role in a prehistoric confrontation. Simultaneous.
