A Short Philosophy of Birds HarperCollins

The imperative of happiness dictates the conduct and direction of our lives. There is no escape from the tyranny of positivity. But is happiness the supreme good that all of us should pursue? So says a new breed of so-called happiness experts, with positive psychologists, happiness economists and self-development gurus at the forefront. With the support of influential institutions and multinational corporations, these self-proclaimed experts now tell us what governmental policies to apply, what educational interventions to make and what changes we must undertake in order to lead more successful, more meaningful and healthier lives. With a healthy scepticism, this book documents the powerful social impact of the science and industry of happiness, arguing that the neoliberal alliance between psychologists, economists and self-development gurus has given rise to a new and oppressive form of government and control in which happiness has been woven into the very

fabric of power.

Hopeless. Freak. Elephant. Pitiful. These are the words of Skinny, the vicious voice that lives inside fifteen-year-old Ever Davies's head. Skinny tells Ever all the dark thoughts her classmates have about her. Ever knows she weighs over three hundred pounds, knows she'll probably never be loved, and Skinny makes sure she never forgets it. But there is another voice: Ever's singing voice, which is beautiful but has been silenced by Skinny. Partly in the hopes of trying out for the school musical - and partly to try and save her own life - Ever decides to undergo a risky surgery that may help her lose weight and start over. With the support of her best friend, Ever begins the uphill battle toward change. But demons, she finds, are not so easy to shake, not even as she

sheds pounds. Because Skinny is still around. And Ever will have to confront that voice before she can truly find her own. Donna Cooner brings warmth, wit, and startling insight to this unforgettable debut.

My Body in Pieces Faber & Faber

Senior Year. Middle of nowhere. What's the new girl to do? For Piper Marks, the answer is simple. She's determined to have her photography rock the cover of National Geographic someday, and moving to Clarkton, Iowa for her last year of high school is not going to stop her. Even if her usual subjects have changed from bright lights and skyscrapers to fields, cows...and more fields. But when photographer at the local paper quits in a huff, she steps into his spot. Her new job keeps Piper busy capturing tackles, and zooming in on first downs and end zone dances, not to mention putting her directly in the path of varsity football

star Les Williams IV. Her new friends warn her off, but she can't resist the pull she feels toward this mysterious country boy. But this small town is keeping a secret, and it's one that could destroy any chance they have to be together. It's up to Piper to decide what to do with the distorted truth. Can she risk exposing her heart? It might be worth it, 'cause Les is about to change her world from black and white to fully saturated color. Praise for Pixelated: "In Pixelated, L.S. Murphy weaves a complex web of secrets and lies with a 'will they or won't they' romance that kept me turning pages and holding my breath!" ~ Julie Reece, author of *The Artisans* and *Crux* "Beautifully written, with a full spectrum of emotion and complex characters, Pixelated will tug at all your heartstrings. I easily lost myself in the world L.S. Murphy created and couldn't stop reading because I needed to see how the story

ended." ~ Kelly Oram, author of *Cinder & Ella*
"L.S. Murphy brings something for every reader

By portraying the circumstances of people living with chronic conditions in radically different contexts, from Alzheimer's patients in the UK to homeless people with

psychiatric disorders in India, *Managing Chronicity in Unequal States* offers glimpses of what dealing with medically complex conditions in stratified societies means. While in some places the state regulates and intrudes on the most intimate aspects of chronic living, in others it is utterly and criminally absent. Either way, it is a present/absent actor that deeply conditions people's opportunities and strategies of care. This book explores how individuals, groups and communities navigate uncertain

and unequal healthcare systems, in which inherent moral judgements on human worth have long-lasting effects on people's wellbeing. This is key reading for anyone wishing to deconstruct the issues at stake when analysing how care and chronicity are entangled with multiple institutional, economic, and other circumstantial factors. How people access the available informal and formal resources as well as how they react to official diagnoses and decisions are important facets of the management of chronicity. In the arena of care, people with chronic conditions find themselves negotiating restrictions and handling issues of power and (inter)dependency in relationships of inequality and proximity. This is particularly relevant in current times, when care has given in to the lure of the market, and the possibility of living a long and fulfilling life has been drastically reduced, transformed into a 'reward' for the few who have been deemed worthy of it.

Do the dead have rights? In a persuasive argument, Don Herzog makes the case that the deceased's interests should be protected. This is a delightfully deceptive work that starts out with a simple, seemingly arcane question—can you libel or slander the dead?—and develops it outward, tackling larger and larger implications, until it ends up straddling the borders between law, culture, philosophy, and the meaning of life. A full answer to this question requires legal scholar Don Herzog to consider what tort law is actually designed to protect, what differences death makes—and what differences it doesn't—and why we value what we value. Herzog is one of those rare scholarly writers who can make the most abstract argument compelling and entertaining.

Pretty Dark Sacrifice Thomas Bouregy & Company

A deeply emotional graphic memoir of a young woman's struggles with self-esteem and body image issues. All Marie-Noëlle wants is to be thin and beautiful. She wishes that her thighs were slimmer, that her stomach lay flatter. Maybe then her parents wouldn't make fun of her eating habits at family dinners, the girls at school

wouldn't call her ugly, and the boy she likes would ask her out. This all-too-relatable memoir follows Marie-Noëlle from childhood to her twenties, as she navigates what it means to be born into a body that doesn't fall within society's beauty standards. When, as a young teen, Marie-Noëlle begins a fitness regime in an effort to change her body, her obsession with her weight and size only grows and she begins having suicidal thoughts. Fortunately for Marie-Noëlle, a friend points her in the direction of therapy, and slowly, she begins to realize that she doesn't need the approval of others to feel whole. Marie-Noëlle Hébert's debut graphic memoir is visually stunning and drawn entirely in graphite pencil, depicting a deeply personal and emotional journey that encourages us to all be ourselves without apology. It's been five weeks, two days, and eight hours since the demons forced Quinn to throw herself into the raging river, since Aaron sacrificed himself to save her, since his body disappeared without a trace.

Everyone wants her to move on, but Quinn can't, not after his spirit—or something—appears to her at his memorial, convincing her he's still alive. When a mysterious box materializes on the very spot Aaron disappeared, Quinn finds she's at the center of an ancient prophesy of betrayal, revenge, and sacrifice that takes her to the depths of the underworld to face Lilith—Adam's first wife. If Quinn can stop Lilith from unleashing the demon horde Eve trapped inside the box during the Battle of Eden millennia ago, she will save the human realm and free Aaron from an eternity in torment. All it will cost is her blood.

We undertake an extended discussion of the latest developments about the existing and new estimation methods of the shadow economy. New results on the shadow economy for 158 countries all over the world are presented over 1991 to 2015. Strengths and weaknesses of these methods are assessed and a critical comparison and evaluation of the methods is carried out. The average size of the shadow economy of the 158 countries over 1991 to 2015

is 31.9 percent. The largest ones are Zimbabwe with 60.6 percent, and Bolivia with 62.3 percent of GDP. The lowest ones are Austria with 8.9 percent, and Switzerland with 7.2 percent. The new methods, especially the new macro method, Currency Demand Approach (CDA) and Multiple Indicators Multiple Causes (MIMIC) in a structured hybrid-model based estimation procedure, are promising approaches from an econometric standpoint, alongside some new micro estimates. These estimations come quite close to others used by statistical offices or based on surveys.

The Ghosts of Songs is the first book-length exploration of the work of the Black Audio Film Collective. The collective, founded in 1982 and dissolved in 1998, comprised John Akomfrah, Lina Gopaul, Reece Auguiste, Avril Johnson, Trevor Mathison, Edward George and David Lawson, and for sixteen years their films addressed the social, political and racial crises of Thatcher's Britain and beyond. However, it would be limiting their achievement to see them either as merely challenging the hegemonic forms of mass media, or conversely as polemicist film activists. In films such as Expeditions, Handsworth Songs, Seven Songs for Malcolm X and Twilight City the collective explored and developed a

black film aesthetic. The book begins by America, Asia, and beyond. This describing the difference between approach fits with the established educational cultures that praise dominance of global multimedia students for "right answers," and

the law school culture that rewards nuanced analysis of ambiguous situations in which more than one approach may be correct. Enormous care is devoted to explaining precisely how and why legal analysis frequently produces such perplexing situations. But the authors don't stop with mere description. Instead, *Getting to Maybe* teaches how to excel on law school exams by showing the reader how legal analysis can be brought to bear on examination problems. The book contains hints on studying and preparation that go well beyond conventional advice. The authors also illustrate how to argue both sides of a legal issue without appearing wishy-washy or indecisive. Above all, the book explains why exam questions may generate feelings of uncertainty or doubt about correct legal outcomes and how the student can turn these feelings to his or her advantage. In sum, although the authors believe that no exam guide can substitute for a firm grasp of substantive material, readers who devote the necessary time to learning the law will find this book an invaluable guide to translating learning into better exam performance. Its clear, insightful, fun to read, and right on the money." – Duncan Kennedy, Carter Professor of General Jurisprudence, Harvard Law School "Finally a study aid that

The ecological crisis is a very real crisis for the many species

that face extinction but it is also a crisis of sensibility –

that is, a crisis in our relationships with other living

beings. We have grown accustomed to treating other living beings as

the material backdrop for the drama of human life: the animal

world is regarded as part of 'nature', juxtaposed to the world

of human beings who pursue their aims independently of other

species. Baptiste Morizot argues that the time has come for us to

jettison this nature?human dualism and re-think our relationships

with other living beings. Animals

are not part of a separate, natural world: they are cohabitants of the Earth, with whom we share a common ancestry, the enigma of being alive, and the responsibility of living decent lives together. By accepting our identity as living beings and reconnecting with our own animal nature, we can begin to change our relationships with other animals, seeing them not as inferior life-forms but as living creatures who have different ways of being alive. This powerful plea for a new understanding of our relationships with other animals will be of great interest to anyone concerned about the ecological crisis and the future of different species, including our own.

In 1891, when coal companies in eastern Tennessee brought in cheap convict labor to take over their jobs, workers responded by storming the stockades, freeing the prisoners, and loading them onto freight trains. Over the next year, tactics escalated to include burning company property and looting company stores. This was one of the largest insurrections in US working-class history. It happened at the same time as the widely publicized northern labor war in Homestead, Pennsylvania. And it was

largely ignored, then and now. Dixie Be Damned engages seven similarly "hidden" insurrectionary episodes in Southern history to demonstrate the region's long arc of revolt. Countering images of the South as pacified and conservative, this adventurous retelling presents history in the rough. Not the image of the South many expect, this is the South of maroon rebellion, wildcat strikes, and Robert F. Williams's book Negroes with Guns, a South where the dispossessed refuse to quietly suffer their fate. This is people's history at its best:

slave revolts, multiracial banditry, labor battles, prison uprisings, urban riots, and more. Neal Shirley grew up in Winston-Salem, North Carolina, and now lives in Durham, NC, where he is involved in several anti-prison initiatives and runs a small publishing project called the North Carolina Piece Corps. Saralee Stafford was born in the Piedmont of North Carolina. Her recent political work has focused on connecting the struggles of street organizations with those of anarchists in the area. She teaches gender-related health in Durham, North Carolina.
