In 2132, "We the people ..." means nothing, and it hasn't for a hundred years. Like all the citizens of the American Union, eighteen-year-old Erianna Keating is not to ask questions. She is not to believe anything except what the A.U. tells her. More importantly, she's not supposed to know what she doesn't know, nor that she's a pawn. Like everyone else, though, she is, and like everyone else, she is a hundred percent oblivious to what's going on. Or is

she? Are they? Erianna thinks going to Perry Road and joining the national registration program is her next step toward adulthood; the 2132 candidates for adult-classification, though, are in for a big surprise. Especially Erianna. Thanks to Zane Warren, an awkward but hot guy who won't shut up about a history that doesn't-or shouldn't-matter anymore, Erianna will know. Will learn. That includes finding out what actually happens after registration and doing something, anything, about it. Fixing what went wrong, what caused the U.S.A. to split into two countries, though, is not on Erianna's bucket list, but as she faces her future, she must decide whether to fall in line with the American Union's plan for her, or to consider that

Zane might not be wrong, and the time for revolution begins now.

The imperative of happiness dictates the conduct and direction of our lives. There is no escape from the tyranny of positivity. But is happiness the supreme good that all of us should pursue? So says a new breed of so-called happiness experts, with positive psychologists, happiness economists and self-development gurus at the forefront.

With the support of influential institutions and multinational corporations, these self-proclaimed experts now tell us what governmental policies to apply, what educational interventions to make and what changes we must undertake in order to lead more successful, more meaningful and healthier lives. With a healthy scepticism, this book documents the powerful social impact of the science and industry of happiness, arguing that the neoliberal alliance between psychologists, economists and self-development gurus has given rise to a new and oppressive form of government and control in which happiness has been woven into the very fabric of power.

Why are we often convinced that we're right even when we're wrong? Why are we jealous, or paranoid, even when we have absolutely no reason to be? Why is it so easy for fake news to spread around the globe and fool us? It's because we don't see the world as it is, rather we reconstruct it in our mind. Reality is way too complex and multiple to be apprehended by our capacities of attention, which are quite limited, as well as our brain abilities. That is why our perception of the world is subjective and various elements influence the way we acquire knowledge and form opinions. Our brain is recreating the world in its own way - most of the time for our own good: how hard would it be if, before making a choice, we had to know about all the options available in a given situation? It would take us forever to choose an item of clothing in a store, or a meal in a restaurant! Luckily, our brain can estimate: even if it makes us imperfect and subject to illusion, delusion and error, it allows us to reconstruct the world as we know it, and live in it. However, these very useful mechanisms can sometimes mislead us and have a rather negative impact on our actions, beliefs and opinions: when our brain behaves that way, we say it is biased. Albert Moukheiber gives us tips and tricks to fight against these cognitive biases - the

first one being not to trust ourselves too much and to always doubt our thinking processes, especially in this era where social networks spread information like an epidemic. In this book, filled with multiple examples from our daily lives and psychosocial experiments, Moukheiber explores the building blocks of our perception, cognition and behaviour, which are involved in acquiring knowledge or forming opinions.

Some great teachers are born, but most are self-made. And the way to make yourself a great teacher is to learn to think and act like one. In this updated second edition of the best-selling *Never Work Harder Than Your Students*, Robyn R. Jackson reaffirms that every teacher can become a master teacher. The secret is not a specific strategy or technique, nor it is endless hours of prep time. It's developing a master teacher mindset—rigorously applying seven principles to your teaching until they become your automatic response: Start where you students are. Know where your students are going. Expect to get your students there. Support your students along the way. Use feedback to help you and your students get better. Focus on quality rather than quantity. Never work harder than your students. In her conversational and candid style, Jackson explains the mastery principles and how to start using them to guide planning, instruction, assessment, and classroom management. She answers questions, shares stories from her own practice and work with other teachers, and provides all-new, empowering advice on navigating external evaluation. There's even a self-

assessment to help you identify your current levels of mastery and take control of your own practice. Teaching is hard work, and great teaching means doing the right kind of hard work: the kind that pays off. Join tens of thousands of teachers around the world who have embarked on their journeys toward mastery. Discover for yourself the difference that Jackson's principles will make in your classroom and for your students.

Ways of Being Alive HarperCollins

Do the dead have rights? In a persuasive argument, Don Herzog makes the case that the deceased 's interests should be protected This is a delightfully deceptive work that starts out with a simple, seemingly arcane question—can you libel or slander the dead?—and develops it outward, tackling larger and larger implications, until it ends up straddling the borders between law, culture, philosophy, and the meaning of life. A full answer to this question requires legal scholar Don Herzog to consider what tort law is actually designed to protect, what differences death makes—and what differences it doesn' t—and why we value what we value. Herzog is one of those rare scholarly writers who can make the most abstract

argument compelling and entertaining.

For readers of Fox & I comes " a fable very much for our time. " —The TIMES

" Unusual and fascinating... Read this book and enter into another world."— Jane

Goodall In this sensuous and moving memoir, a young man forms a powerful connection with deer while living alone in the woods for seven years.

Geoffroy Delorme does not fit in the human world. As a boy, he dreams of transforming into a fox so he can escape into the forest. As he gets older, he disappears into the woods at night, drawn to the rhythms of animal life. One night, an encounter with a deer changes his life: from then on, he knows he wants to live among them. Delorme becomes a creature of the forest. He learns to live without a tent or sleeping bag and forage for whatever food he can find. He blends in with the deer and, slowly, they accept him into their world. He witnesses their births and deaths, courtship and battles, ostracism and friendship over the cycles of their lives. Among the deer, he experiences the beauty, pain, fear, and joy of a life lived as a part of nature, not separate from it. In his final year in the forest, Delorme meets a woman walking through the trees. He knows he can stay in the forest and die

with his friends—or he can leave, and speak their truth to a human world that desperately needs to hear it. *Deer Man* is a moving story of what it 's like to be an outsider and how forming connections with the natural world can help us feel less alone. A unique and powerful window into how far one human is willing to go to understand an animal, *Deer Man* asks us to never take for granted the flora and fauna of our world, and to work for their protection in whatever ways we can.

Rescue Me Between the Lines Queer Masculinities: A Critical Reader in Education is a substantial addition to the discussion of queer masculinities, of the interplay between queer masculinities and education, and to the political gender discourse as a whole. Enriching the discourse of masculinity politics, the cross-section of scholarly interrogations of the complexities and contradictions of queer masculinities in education demonstrates that any serious study of masculinity—hegemonic or otherwise—must consider the theoretical and political contributions that the concept of queer masculinity makes to a more comprehensive and nuanced understanding of masculinity itself. The essays adopt a range of approaches from empirical studies to reflective theorizing, and address themselves to three separate educational realms: the K-12 level, the collegiate level, and the level in popular culture, which could be called ' cultural

pedagogy ' . The wealth of detailed analysis includes, for example, the notion that normative expectations and projections on the part of teachers and administrators unnecessarily reinforce the values and behaviors of heteronormative masculinity, creating an institutionalized loop that disciplines masculinity. At the same time, and for this very reason, schools represent an opportunity to ' provide a setting where a broader menu can be introduced and gender/sexual meanings, expressions, and experiences boys encounter can create new possibilities of what it can mean to be male ' . At the collegiate level chapters include analysis of what the authors call ' homosexualization of heterosexual men ' on the university dance floor, while the chapters of the third section, on popular culture, include a fascinating analysis of the construction of queer

' counternarratives ' that can be constructed watching TV shows of apparently hegemonic bent. In all, this volume ' s breadth and detail make it a landmark publication in the study of queer masculinities, and thus in critical masculinity studies as a whole.

In this dark southern gothic novel, a young woman meets a man who may be more than he seems. After the death of her mother, 17-year-old Rave Weathersby gives up her dream of becoming a fashion designer, barely surviving life in the South Carolina lowlands. To make ends meet, Raven works after school as a seamstress creating stunning works of fashion that often rival the great names of the day. Instead of making things easier on the high school senior, her stepdad's

drinking leads to a run in with the highly reclusive heir to the Maddox family fortune, Gideon Maddox. But Raven's stepdad is drying out and in no condition to attend the meeting with Maddox. So Raven volunteers to take his place and offers to repay the debt in order to keep the only father she's ever known out of jail. Gideon Maddox agrees, outlining an outrageous demand: Raven must live in his home for a year while she designs for Maddox Industries' clothing line, signing over her creative rights. Her handsome young captor is arrogant and infuriating to the nth degree, and Raven can't imagine working for him, let alone sharing the same space for more than five minutes. But nothing is ever as it seems. Is Gideon Maddox the monster the world believes him to be? And can he stand to let the young seamstress see him as he really is?

The Myth of "ethnic Conflict"

University Press of Kentucky

We undertake an extended discussion of the latest developments about the existing and new estimation methods of the shadow economy. New results on the shadow economy for 158 countries all over the world are presented over 1991 to 2015. Strengths and weaknesses of these methods are assessed and a critical comparison and

evaluation of the methods is carried out. The average size of the shadow economy of the 158 countries over 1991 to 2015 is 31.9 percent. The largest ones are Zimbabwe with 60.6 percent, and Bolivia with 62.3 percent of GDP. The lowest ones are Austria with 8.9 percent, and Switzerland with 7.2 percent. The new methods, especially the new macro method, Currency Demand Approach (CDA) and Multiple Indicators Multiple Causes (MIMIC) in a structured hybrid-model based estimation procedure, are promising approaches from an econometric standpoint, alongside some new micro estimates. These estimations come quite close to others used by statistical offices or based on surveys.
