If You Should Go at Midnight JRP Ringier On every continent and in every nation, animals unrecognized by modern science are reported on a daily basis. People passionately pursue these creatures--the name given to their field of study is cryptozoology. Coined in the 1950s, the term literally means the science of hidden animals. When the International Society of Cryptozoology (ISC) was formed in 1982, the founders declared that the branch of science is also concerned with "the possible existence of known animals in areas where they are not supposed to occur (either now or in the past) as well as the unknown persistence of presumed extinct animals to the present time or to the recent past...what makes an animal of interest to cryptology is that it is unexpected." This reference work presents a "flesh and blood" view of cryptozoology. Here, 2,744 entries are listed, the majority of which each

describe one specific creature or type of creature. Other entries cover 742 places where unnamed cryptids are said to appear; profiles of 77 groups and 112 individuals who have contributed to the field; descriptions of objects and events important to the subject; and essays on cryptotourism and hoaxes, for example. Appendices offer a timeline of zoological discoveries, annotated lists of movies and television series with cryptozoological themes, a list of crypto-fiction titles and a list of Internet websites devoted to cryptozoology.

Join a Fascinating Adventure on the Hunt for Mythical Animals #1 New Release in Dinosaurs, Mammals, and Hunting From animals long believed extinct, to monsters that we thought never existed—this book acts as both a guide to, and unbelievably true account of legendary cryptids. Globetrotting adventure for mythical animals. Cryptozoologist Richard Freeman has spent years researching and tracking down mythical monsters. In this book, he recounts riveting monster hunt stories; through the dense forests of Sumatra on the trail

of a mystery ape known as the orang-pondok, to Tasmania in search of the thylacine or Tasmanian wolf. Every corner of Earth has its own monster—even in the traceless Gobi Desert as he searches for the Mongolian death worm, a creature so feared by the nomads that it can send a whole community into a panic. Expert advice to start your own hunt. The author provides you with excellent advice on how to carry out your own cryptozoological expeditions from scratch. This includes advice on what equipment to take, inoculations, how to choose which mythical animals to hunt, planning ahead and the importance of getting good local guides to name a few. Inside, you ' ll find: A deep dive into whether extinct animals are truly extinct A journey beyond a textbook definition of the world ' s largest animals A ton of advice, including information on how to join the Centre for Fortean Zoology If you enjoyed Richard Freemans previous book, *Adventures in Cryptozoology*; or liked titles such as *The Compendium of Magical Beasts*, *The Zoologist ' s Guide to the Galaxy*, or *Chasing*

Factoid Attack: Inherent sadistic streak in dentists confirmed! The electric chair was invented by a dentist, Dr. Alfred Southwick. Not surprising, dentists have been perfecting torture devices for centuries. Factoid Attack: Galaxy at risk! Intelligent life in short supply! In 1961, Astronomer Frank Drake

estimated the number of probable intelligent civilizations inhabiting our galaxy. Using conservative numbers, that estimate came to 10,000. Unfortunately, we are not included in that total. Factoid Attack: Colorblind bulls hate all matadors equally! The color of a matador's cape, or muleta, is traditionally red, which is widely believed to irritate the bull. In reality, bulls are colorblind, so it is irrelevant what color cape a matador uses to antagonize them. Shot in the dark, but maybe it's the being stabbed with swords bit that pisses them off. Forget Fringe, Warehouse 13, and The X-Files. In this book, you'll find more weird and wacko truths than in all those combined. From golden poison dart frogs with enough venom to kill ten grown humans to cockroaches that can survive radiation 15 times stronger than what kills people, scary and strange just got scarier—and stranger!

A Natural History of the Unnatural World

Bloomsbury Publishing USA

Tonight, across America, countless people will embark on an adventure. They will prowl among overgrown headstones in forgotten graveyards, stalk through darkened woods and wildlands, and creep down the crumbling corridors of abandoned buildings. They have set forth in search of a profound paranormal experience and may seem to achieve just that. They are part of the growing cultural phenomenon called legend tripping. In If You Should Go at Midnight: Legends and Legend Tripping in America, author Jeffrey S. Debies-Carl guides readers through an exploration of legend tripping, drawing on years of scholarship, documentary accounts, and his own extensive fieldwork. Poring over old reports and legends, sleeping in haunted inns, and trekking through wilderness full of cannibal mutants and strange beasts, Debies-Carl provides an in-depth analysis of this practice that has long fascinated scholars yet remains a mystery to many observers. Debies-Carl argues that legend trips are important social practices. Unlike traditional rites of passage, they reflect the modern world, revealing both its problems and its virtues. In society as well as in legend tripping, there is ambiguity, conflict, crisis of meaning, and the substitution of

debate for social consensus. Conversely, both emphasize individual agency and values, even in spiritual matters. While people still need meaningful and transformative experiences, authoritative, traditional institutions are less capable of providing them. Instead, legend trippers voluntarily search for individually meaningful experiences and actively participate in shaping and interpreting those experiences for themselves.

Cryptozoology is best understood as the study of animals which, in the eyes of Western science, are extinct, unclassified or unrecognised. In consequence, and in part because of its selective methods and lack of epistemological rigour, cryptozoology is often dismissed as a pseudo-science. However, there is a growing recognition that social science can benefit from engaging with it, for as social scientists are very well aware, 'scientific' categorisation and explanation represents just one of a myriad of systems used by humans to enable them to classify and make sense of the world around them. In many cultural contexts, myth, folk classification and lived experience challenge the 'truth' expounded by scientists. With a reflexive, anthropological approach and drawing on rich empirical and ethnographic studies from around the world, this volume engages with the theoretical and methodological issues raised by

reported sightings of unrecognised animals. Bringing into sharp focus the anthropological value and challenges for methodology posed by beliefs about unclassified creatures,

Anthropology and Cryptozoology: Exploring encounters with mysterious creatures will be of interest to anthropologists, sociologists and geographers working in the fields of research methods, anthrozoology, mythology and folklore and human-animal interaction.

Welcome to the United States of Cryptids, where mysterious monsters lurk in the dark forests, deep lakes, and sticky swamps of all fifty states. From the infamous Jersey Devil to the obscure Snallygaster, travel writer and chronicler of the strange J. W. Ocker uncovers the bizarre stories of these creatures and investigates the ways in which communities embrace and celebrate their local cryptids. Readers will learn about:

- Batsquatch of Washington, a winged bigfoot that is said to have emerged

from the eruption of Mount Saint Helens

- Nain Rouge of Michigan, a fierce red goblin that has been spotted before every major city disaster in Detroit
- Flatwoods Monster of West Virginia, a robotic extraterrestrial that crash-landed in rural Appalachia
- Lizard Man of South Carolina, a reptilian mutant that attacked a teenager in the summer of 1988
- Gloucester Ghoul of Rhode Island, a fire-breathing dragon that guards a hoard of pirate treasure
- And many more!

Whether you believe in bigfoot or not, this fully illustrated compendium is a fun, frightening, fascinating tour through American folklore and history, exploring the stories we tell about monsters and what those stories say about us.

Mystery Creatures of China Univ. Press of Mississippi
This fascinating book uncovers the history behind urban legends and explains how the contemporary iterations of familiar fictional tales provide a window into the modern concerns—and digital advancements—of our society. What

do ghost hunting, legend tripping, and legendary monsters have in common with email hoaxes, chain letters, and horror movies? In this follow-up to Libraries Unlimited's Tales, Rumors, and Gossip: Exploring Contemporary Folk Literature in Grades 7 – 12, author Gail de Vos revisits popular urban legends, and examines the impact of media—online, social, and broadcast—on their current iterations. What Happens Next? Contemporary Urban Legends and Popular Culture traces the evolution of contemporary legends from the tradition of oral storytelling to the sharing of stories on the Internet and TV. The author examines if the popularity of contemporary legends in the media has changed the form, role, and integrity of familiar legends. In addition to revisiting some of the legends highlighted in her first book, de Vos shares new tales in circulation which she sees as a direct result of technological advancements.
