Tales of the Cryptids Untold Publishing

cryptozoology (n.) The search for and study of animals whose existence or survival is unsubstantiated or in dispute, such as Sasquatch, the Loch Ness Monster, fish with human hands, the Yeti, the Thunderbird, the Ape-Man Monster of Tennessee, and the 'Thing' at Dutchman's Rig. For three decades, when American men had questions about the Yeti, the Loch Ness Monster, Bigfoot, and other weird beasts from the strange world of cryptozoology, they found answers in the hard-hitting pages of men's adventure magazines. Now, collected here for the first time ever, are samples of sensational period reporting and wild, "true" accounts of savage, fist-to-claw duels between man and Sasquatch, man and fishman, man and monster! Plus full-color vintage pulp artwork that accompanied the stories' original publication, rare archival discoveries, men's pulp history, expert analysis, cryptid-by-cryptid commentary, and much, much more. This latest installment in the Men's Adventure Library is edited by Robert Deis of MensPulpMags.com, David Coleman (THE BIGFOOT FILMOGRAPHY) and Wyatt Doyle (STOP REQUESTED), and includes contributions from

luminaries in the field such as Sir Arthur C. Clarke, John Keel, and many others. CRYPTOZOOLOGY ANTHOLOGY is packed with 13 biting tales of creatures notorious and obscure, and this limited hardcover includes bonus material exclusive to this edition, including an additional wild story rescued from obscurity. Don't leave civilization without it!

Monsters of Massachusetts Llewellyn Worldwide

Welcome to a carnival unlike anything that you have ever read about, visited, or even imagined before. Here, before your very eyes, you will encounter bizarre, anomalous creatures of every conceivable (and inconceivable!) kind--a veritable menagerie of cryptozoological mysteries to dazzle and delight, tantalize and terrify. For this is Mirabilis--a realm of marvels, wonders, miracles...and monsters! Peer through the shadows and see what you may. Was that scuttling horror a spider the size of a puppy? Did that fallen tree trunk suddenly sprout a pair of alligator jaws? Was that a living toad that leapt out of that split-asunder block of stone? Did those flowers abruptly put forth wings and fly away as tiny birds? Behold Trunko, the hairy marine elephant-bear that supposedly battled whales off the coast of South Africa almost a century ago. Look around in every direction and witness the very last giant lemurs brought to you from the rainforests of Madagascar, the very same unicorn that was once encountered by Julius Caesar, dinosaur-sized crocodiles from the swamps of the Congo, the elephantine harpoon-tusked

sukotyro of Sumatra, gargantuan prehistoric beavers resurrected in modern-day North America, illusive Germanic horned hares and elusive Liberian micro-squirrels, a giant sea snail with antlers and paws from the Sarmatian Sea and a veritable whale-fish from a forgotten Swedish lake, a vanished striped mystery steed from Iberia, enormous toothless freshwater sharks from South America, flying turtles from China and a hippoturtleox from Tibet, sea dragons and pseudo-pterodactyls, and the world's only known tusked megalopedus. Let us not tarry even a moment longer. The miracles and marvels of *Mirabilis* await you.

ABOUT THE AUTHOR Born and still living in the West Midlands, England, Karl P.N. Shuker graduated from the University of Leeds with a Bachelor of Science (Honors) degree in pure zoology, and from the University of Birmingham with a Doctor of Philosophy degree in zoology and comparative physiology. He now works full-time as a freelance zoological consultant to the media, and as a prolific published writer. Shuker is currently the author of 19 books and hundreds of articles, principally on animal-related subjects, with an especial interest in cryptozoology and animal mythology, on which he is an internationally recognized authority, but also including a poetry volume. In addition, he has acted as consultant for several major multi-contributor volumes as well as for the world-renowned Guinness Book of Records/Guinness World Records (he is currently its Senior Consultant for its Life Sciences section); and he has compiled questions for the BBC's long-running cerebral quiz Mastermind. He is also the editor of the Journal of Cryptozoology, the world's only existing peer-reviewed scientific journal devoted to mystery animals. Shuker has travelled the world in the course of his researches and writings, and has appeared regularly on television and radio. Aside from work, his diverse range of interests include motorbikes, the life and career of James Dean, collecting masquerade and carnival masks, quizzes, philately, poetry, travel, world mythology, and the history of animation. He is a Scientific Fellow of the prestigious Zoological Society of London, and a Fellow of the Royal Entomological Society. He is Cryptozoology Consultant to the Centre for Fortean Zoology, and is also a Member of the Society of Authors."

Abominable Science Weiser Books

For years, scientists and researchers have studied, speculated about, and searched for an enigmatic creature that is legendary in the annals of American folklore. Now, learn the truth about... BIGFOOT! In this fascinating and comprehensive look at the fact, fiction, and fable of the North American "Sasquatch," award-winning author Loren Coleman takes readers on a journey into America's biggest mystery -- could an unrecognized "ape" be living in our midst? Drawing on over forty years of investigations, interviews, and fieldwork on these incredible beasts, Coleman explores the modern debates about these powerful, ape-like creatures, why they have remained a

mystery for so long, and what we can learn about ourselves from these animals, our nearest cousins! From reports of Bigfoot's existence found in ancient Native American traditions, to the controversial Patterson-Gimlin film of a Bigfoot in the wild, to today's Internet sites that record the sightings almost as soon as they occur, Coleman uncovers the past, explains the present, and considers the future of one of the greatest unsolved mysteries in the natural world.

"Cryptozoology is the study of mysterious creatures that fall between the realm of real and imaginary on the scientific spectrum. *Cryptid Creatures: A Field Guide* offers a closer look at fifty of these amazing creatures, examining the best possible evidence for each, including scientific papers, magazine and newspaper articles, and credible eyewitness accounts. The fifty cryptids are arranged in order alphabetically, and in addition to speculative illustrations, include details like when they were first reported, whether they are terrestrial, aerial, or aquatic, and each have a reality rating of 1 to 6, in which 1 means that the cryptid has been confirmed as a hoax, and 6 means the cryptid has been proven as real. This page-turning guide will inspire curious readers to investigate more on their own, and maybe even help to prove if a cryptid is a hoax or is real." --

Explores the truth and the myths behind such legendary creatures as the Loch Ness monster and Sasquatch

Monster Hunt Sterling Publishing Company, Inc.

A study of dozens of hidden animals—from the chupacabra to Mongolian death worms—drawing on eyewitness accounts from around the world. This informative book includes information, interviews, and stories about forty different cryptids seen around the world by credible eyewitnesses like policemen, rangers, and doctors. Readers will learn where and how to find flying humanoids, hairy humanoids, giants of all kinds including rabbits, bats, and spiders, goblins, vampires, werewolves, demons, aliens, and ghosts. Cryptozoology—a term coined in the 1950s by a French zoologist named Bernard Heuvelmans—is the study of hidden or unknown animals not recognized in standard zoology. From traditional cryptids like Big Foot, the Abominable Snowman, and Nessie, to mythical cryptids like

unicorns, vampires, dragons, and werewolves, to lesser-known cryptids like bunyips (waterhorses), Encantado (Dolphin Men of Brazil), thunderbirds, mothmen, and chupacabra, these creatures are very much alive, says expert Deena West Budd, if beyond the realm of normal perception. The Weiser Field Guide to Cryptozoology includes a brief history of the field and surveys all the creatures for which any credible amount of research exists—as well as giving tips on how to spot these creatures and cautionary advice on how to interact with them. Includes two dozen line drawings rendered from eyewitness descriptions

Discover the science of (not so) imaginary creatures *Adventures in Cryptozoology* is the perfect resource for the explorer who loves Josh Gates's Expedition Unknown and *Cryptozoology A to Z*. Explore the world through its most unlikely creatures: Cryptozoology, the study of hidden, monstrous, and legendary animals, is truly the art of discovering the unknown. Richard Freeman, Zoological Director of Centre for Fortean Zoology, has explored the corners of the five continents on the search for creatures that many people believe are non-existent. In this book, he shares the exciting stories of his investigations of the Yeti, Mongolian Deathworm, Loch Ness Monster, Orang-Pendak, Ninki-Naka, and more. The line between myth and reality may be more narrow than you think: Cryptozoologists throughout the years have studied unknown species of reptiles, lake and sea creatures, apes, and hominins. The science and history of this field of study includes examples of creatures that were once thought to be mythological, but that have since been proven to exist. Our monsters, ourselves: The history of fabulous beasts and our searches for them is a history of the cultures of the world and the secrets we keep. If you're ready to begin your search for Sasquatch and learn to hunt monsters, *Adventures in Cryptozoology* is your guide. In these pages you'll find: Tales of mythical, extinct, and out-of-place creatures Hints about Bigfoot and other ape-men And tips for equipping your own cryptozoology adventure, including all the gear, field craft, and resources you'll need to record your findings

This true story of Texas millionaire Tom Slick's quest for the Abominable Snowman and other cryptids—creatures unknown to science—reveals a life made for the movies. Fascinating stories of Slick's early brushes with adventure such as his stepfather's abduction by George "Machine Gun" Kelly in 1933 and his creation of a research facility near Loch Ness are followed by his later expeditions into Nepal and the Pacific Northwest in search of the yeti and its counterpart,

the Sasquatch. The story of Slick's amazing, fanatic, and driven search for the stuff of legends takes readers on a whirlwind journey from the dense temperate rainforests of Washington State to the icy peaks of the Himalayas—and shows that sometimes cryptids leave the halls of the imagination and are found and captured, as proved by the giant panda and the Komodo dragon, leaving readers to wonder what more there is to be discovered.

The Cryptid ABC Book Columbia University Press

Only six weeks after a handful of teenage sorcerers defeated a team of anti-magic mercenaries called the Euclideans, Trish, Owen, and Perry are called back into action when they discover that the world's cryptids (aka magical creatures) are disappearing. They're partnered with brusque team leader Jacinda Greyeyes and their former nemesis Bryan Ferretti in a mission to travel all over North America, collecting famous cryptids like the jackalope, the chupacabra, and the altamaha-ha. But when another team of teenage sorcerers suddenly vanishes, the spell casters set out for Germany, Egypt, and the Seychelles to uncover why the Euclideans have been abducting and experimenting on magical creatures like the unicorn and the sphinx. The secrets they uncover threaten to divide them, and reveal a truth that will permanently upend the way the world sees sorcery.
