Examining one of the most crucial issues in the modern world: human induced climate change, here Clive Spash provides a refreshing interdisciplinary perspective, pulling together strands of natural science, economics and ethics. Described by John Gowdy as 'the best exposition to date on

the political economy of climate policy', this remarkable volume poses serious questions and gives intelligent answers. The issues it addresses are relevant to a range of environmental problems, and it covers themes such as: How do we deal with uncertainty and ignorance? What roles do science and economics play in policy formation? To what extent should individuals take responsibility for the society in which they and their descendants live? By rigorously examining international and governmental sources, and key contemporary issues, Spash provides an up-to-date and informative analysis. A well-organized study (including a glossary and helpful acronym list), this book will be of strong interest to students and academics in the fields of ecological and environmental economics, and is essential reading for all those to whom climate change is a professional or personal concern. *Greenhouse Economics* John Wiley & Sons

When children become entangled with the law, their lives can be disrupted irrevocably. When those children are underrepresented minorities, the potential for disruption is

even greater. *The Legacy of Racism for Children: Psychology, Law, and Public Policy* examines issues that arise when minority children's lives are directly or indirectly influenced by law and public policy. Uniquely comprehensive in scope, this trailblazing volume offers cutting-edge chapters on the intersections of race/ethnicity within the context of child maltreatment, child dependency court, custody and adoption, familial incarceration, school discipline and the "school-to-prison pipeline," juvenile justice, police/youth interactions, and jurors' perceptions of child and adolescent victims and defendants. The book also includes chapters focused on troubling situations that are less commonly researched, but growing in importance, including the role of race and racism in child sex trafficking and US immigration law and

---

policy. Thus, individual chapters explore myriad ways in which law and policy shape the lives of marginalized children and adolescents - racial and ethnic minorities - who historically and presently are at heightened risk for experiencing disadvantageous consequences of law and policy. In so doing, *The Legacy of Racism for Children* can help social scientists to understand and work to prevent the perpetuation of racial discrimination in American laws and public policies.
