Here is an excerpt of what *The Good Opera Guide* has to say about Cilea & rsquo;s Adriana Lecouvreur : & ldquo;The one about the star of stage and screen whose rival sends her a bouquet of poison gas violets. She sniffs it: snuffs it. & rdquo; *The Good Opera Guide* is not only for regular operagoers but also for people who are new to the world of opera, or indeed people who want to bluff their way through a performance! It is written with humor and is entertaining as well as informative. Where else would you find a & ldquo;dagger count & rdquo; for *La Gioconda*, and have Hansel and Gretel categorized as a & ldquo;Gingerbread Opera & rdquo;? From Adriana Lecouvreur to Mozart & rsquo;s *Die Zauberfl & ouml;te*, for each opera, Sir Denis details the plot and cast of characters, awarding stars to parts that are & ldquo;worth looking out for, & rdquo; & ldquo;really good, & rdquo; or, occasionally, & ldquo;stunning. & rdquo; He goes on to tell the history of each opera and its early reception. Finally, each work is graded from alpha to gamma, and Sir Denis has no qualms about

voicing his opinion. The guide also presents brief biographies of the great composers, conductors, and singers. A glossary of musical terms is included, as well as & ldquo;Operatica, & rdquo; or the essential elements of opera, from the proper place and style of the audience & rsquo;s applause (and boos) to the use of subtitles. & ldquo;The first guide to take the sensible decision of separating comments on the music (serious and helpful) from descriptions of the plot (invariably flippant and often funny). & rdquo; & mdash; *The Sunday Telegraph* Sir Denis Forman (1917 & ndash;2013) was for many years chairman and chief executive of Granada Television. He was also deputy chairman of the Royal Opera House for nine years. Other works include *The Good Wagner Guide*.

The Elements of Clear Thinking

The notion of ecology not only figures centrally in current debates around climate change, but also traverses contemporary discourses in the arts, the humanities, and the social and techno sciences. In its present reformulation it refers to the multi-layered and multi-dimensional nexus of reciprocities between living processes, technological and media practices, i.e. to the complex relations of human and nonhuman agents. The book *Hybrid Ecologies* understands ecology as an ambivalent notion, whose multivalence opens up new fields of action and yet, thanks precisely to this openness and vast applicability, at the same time raises questions not least concerning its

genealogy. The interdisciplinary contributions seek to explore the political and social effects that a rethinking of community in ecological and thus also in biopolitical terms may provoke, and which consequences the contemporary notion of ecology might entail for artistic and design practices in particular. The present publication is the result of the fifth annual program of the cx centre for interdisciplinary studies, which was conceived in cooperation with the Chair of Philosophy | Aesthetic Theory at the Academy of Fine Arts in Munich.

For the first time in a book, this monograph describes relativistic and charge-displacement self-channelling, which is the major finding in the physics of superintense laser beams. It also presents general nonlinear models of lasers - plasma interactions specifically in the case of extremely high intensities.
