"Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed. . . . This must-have book will help teachers learn to implement improved, equity-focused grading for impact." --Zaretta Hammond, Author of *Culturally Responsive Teaching & The Brain* Crack open the grading conversation Here at last—and none too soon—is a resource that delivers the research base, tools, and courage to tackle one of the most challenging and emotionally charged conversations in today's schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and opportunity gaps among our students. With *Grading for Equity*, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias-resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates, *Grading for Equity* provides a critical historical backdrop, describing how our inherited system of grading was originally set up as a sorting mechanism to provide or deny opportunity, control students, and endorse a "fixed mindset" about students' academic potential—practices that are still in place a century later. A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a "true north" orientation toward equitable grading practices. Specific grading practices

that are more equitable, along with teacher examples, strategies to solve common hiccups and concerns, and evidence of effectiveness. Reflection tools for facilitating individual or group engagement and understanding. As Joe writes, "Grading practices are a mirror not just for students, but for us as their teachers." Each one of us should start by asking, "What do my grading practices say about who I am and what I believe?" Then, let's make the choice to do things differently . . . with *Grading for Equity* as a dog-eared reference.

**Non-Interpretive Skills for
Radiology: Case Review E-Book**

Lippincott Williams & Wilkins
This Special Issue is a
collection of selected papers
from the 3rd European
Congress on Imaging Infection
and Inflammation ([www.nuclear
medicinediscovery.org/events.
asp](http://www.nuclearmedicinediscovery.org/events.asp)) and results of consensus
sessions by major experts in
the field including Nuclear
Medicine physicians,
Radiologists, Clinicians and
microbiologists. The Journal
of Clinical Medicine (JCM)
provides an opportunity to
publish data that were
presented and discussed at
the meeting in Rome in
December 2019. One of the
extremely important missions
of this meeting was to
present the recently
published guidelines on
diagnostic imaging of
infections, and find a
consensus agreement on some
still controversial issues.
With this in mind, the aim of
the present Special Issue is
to publish selected papers
on: • Overviews on published
guidelines • Review on recent
development of diagnostic
imaging of infections •
Consensus document on the use
of FDG and WBC in infections
• Consensus document on the
requirement for new
radiopharmaceuticals for
imaging bacteria
