High Performance Two-Stroke Engines analyses the technology of spark ignition two-stroke engines. The presentation is simple and comprehensive. The description of the operating cycle, the fluid dynamics, the lubrication and the cooling systems is followed by painstaking analysis of the mechanical organs, with the materials and the manufacturing processes employed to produce them. The book is completed by an overview of the history and evolution of these engines and by an examination of the principal types and the diverse fields in which they are employed. A section of the work is dedicated to an in-depth analysis of the ignition and combustion phases and the formation of the air-fuel mixture, with particular attention paid to the most recent injection systems.

Why do men abduct women? Are their motives sexual, economic, or social? How crucial is the use of violence? How important is the participation of others? What are the societal consequences of abduction? Answers to these questions can usefully be found in a historical case study of abductions as they occurred in Ireland between 1700 and 1850. **Forcibly Without Her Consent** describes in detail how abduction was a largely communally-sanctioned exercise in male violence against women, how it depended for success on a well established ritual, how it eluded suppression by the forces of law and order, and how it impacted class structure, marriage, and patterns of rural unrest. In fascinating detail, Thomas Power uncovers the causes and implications of abduction. Reading this book will give you a deep insight into the social origins of abduction.

For both contemporaries and later historians the Industrial Revolution is viewed as a turning point' in modern British history. There is no doubt that change occurred, but what was the nature of that change and how did affect rural and urban society? Beginning with an examination of the nature of history and Britain in 1700, this volume focuses on the economic and social aspects of the Industrial Revolution. Unlike many previous textbooks on the same period, it emphasizes British history, and deals with developments in Wales, Scotland, and Ireland in their own right. It is the emphasis on the diversity, not the uniformity of experience, on continuities as well as change in this crucial period of development, which makes this volume distinctive. In his companion title Richard Brown completes his examination of the period and looks at the changes that took place in Britain's political system and in its religious affiliations.

Katherine Snyder's study explores the significance of the bachelor narrator, a prevalent but little-recognised figure in premodernist and modernist fiction by male authors, including Hawthorne, James, Conrad, Ford and Fitzgerald. Snyder demonstrates that bachelors functioned in cultural and literary discourse as threshold figures who, by crossing the shifting, permeable boundaries of bourgeois domesticity, highlighted the limits of conventional masculinity. The very marginality of the figure, Snyder argues, effects a critique of gendered norms of manhood, while the symbolic function of marriage as a means of plot resolution is also made more complex by the presence of the single man. Bachelor figures made, moreover, an ideal narrative device for male authors who themselves occupied vexed cultural positions. By attending to the gendered identities and relations at issue in these narratives, Snyder's study discloses the aesthetic and political underpinnings of the traditional canon of English and American male modernism.

In the summer of 1949 fifteen smokejumpers parachuted into a remote Montana canyon called Mann Gulch. It started as a very small fire in rugged country but within two hours after landing, thirteen of these young men were caught in a raging inferno and were killed. They died bravely, together with their friends, and in the service of their country. Everyone was young and attractive, healthy and strong, enthusiastic and in love. They were bursting into the prime of their lives. There were no malcontents here. Everyone did their best but events overtook them. Until now the actual time line has never been connected to the people involved. Fire in Montana connects the lives of young smokejumpers who lived with a joy of life and expectations of shining futures, the forest rangers and volunteers who fought valiantly to rescue them, and their families, lovers, and friends who were forced to wait and pray, then face the devastating and heart wrenching loss.

The definitive book on steak has never been written-until now "Of all the meats, only one merits its own structure. There is no such place as a lamb house or a pork house, but even a small town can have a steak house." So begins Mark Schatzker's ultimate carnivorous quest. Fed up with one too many mediocre steaks, the intrepid journalist set out to track down, define, and eat the perfect specimen. His journey takes him to all the legendary sites of steak excellence-Texas, France, Scotland, Italy, Japan, Argentina, and Idaho's Pahsimeroi Valley-where he discovers the lunatic lengths steak lovers will go to consume the perfect cut. After contemplating the merits of Black Angus, Kobe, Chianina, and the prehistoric aurochs-a breed revived by the Nazis after four hundred years of extinction-Schatzker adopts his own heifer, fattens her on fruit, acorns, and Persian walnuts, and then grapples with ambivalence when this near-pet appears on his plate. Reminiscent of both Bill Bryson's and Bill Buford's writing, Steak is a warm, humorous, and wide-ranging read that introduces a wonderful new travel and food writer to the common table.

Contrary to popular belief, the capture of India was not accomplished by the British Army, but by the private armies of the East India Company, which grew in size to become larger than that of any European sovereign state. This is the history of its army, examining the many conflicts they fought, their equipment and training, with its regiments of horse, foot and guns, which rivalled those of most European powers. The development of their uniforms, which combined traditional Indian and British dress, is illustrated in detail in this colourful account of the private band of adventurers that successfully captured the jewel of the British Empire.

The book covers various aspects of dairying and milk products such as dairy farm establishment, management, production and utilisation of various dairy products. Information has been included on various aspects of dairy farming starting with selection and purchase of dairy cattle, their care and management, with respect to housing, feeding, breeding and health care during various physiological states such as growth, pregnancy and lactation and during different seasons. Details of health care management along with common diseases have been covered with all information required for educated farmers and technicians working in these areas. Various means for consistent improvement of the stock has also been included. Production of clean milk, its procurement, processing and distribution has been covered with more emphasis on common processing technologies such as pasteurisation and sterilisation. Different forms of liquid milk available in the market has been described along with its standards and other specifications for the knowledge of common man and technicians. Manufacturing methods of milk products have been included with appropriate flow chart wherever required and various categories of milk products have been covered in detail under different chapters under milk products. This book has been prepared with emphasis on second year syllabus of Vocational higher secondary course on milk products and dairying and considering the lack of a suitable textbook for this subject. Hence the book is expected to fill the gap of a textbook for the above said and similar courses. Also the book may be accepted as a textbook/manual for educated farmers, other teaching and training programmes covering similar syllabus like that of dairy farm instructors and as a handbook for Veterinary Students and Dairy Extension Officers. With these introductory notes, we presume that the book will satisfy its readers' requirements and form a valuable textbook/reference book for all those concerned with dairy animal production and

utilisation of their products ultimately benefiting the farming community.

The question of the relationships between universities and the state is one of considerable current concern and debate. This book studies the development of the modern university system in England from the mid-nineteenth century to the outbreak of the Second World War, focusing on the role of the state. In this formidable study, the author covers a range of key areas, including: \* a review of the reforms of the ancient universities, the creation of civic universities and the formation of the federal London University \* an examination of the co-ordinated system in the early years of the twentieth century and the inter-war period \* an analysis of universities as modernising agencies of the state \* a discussion of such issues as technical versus literary curricula, the clash between central and local authorities, and the output of universities in terms of the needs of the state and the economy. Students of history and education, academic historians will find this an informative and important text.

While the three ghosts that visited Ebenezer Scrooge was Charles Dickens' most famous apparitions, his interest in the supernatural did not end there. *Three Ghost Stories* is just that: a collection of three different stories that are true Gothic classics. The three stories, *The Signal Man*, *The Haunted House* and *The Trial for Murder* were sensational for their time and continue to hold up well, thanks to Charles Dickens' superb skills at storytelling. *The Signal Man* is the most well known of the three, chronicling the haunting of a railroad signal man who is visited by a ghost just before a tragic event is to happen on the railway. If you like Dickens and tales of spectres and the supernatural, you'll love *Three Ghost Stories*.
