Using Lady Morgan's *The Wild Irish Girl* as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps the genealogy of this development in fiction, political discourse, and the popular press, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s.

This book not only records the significant events of Canadian aviation but also pays tribute to the 'forgotten flyers who flew by guess and by God or with calculating caution - for the sheer love of flying - in the early days.' The opening chapter recounts the first tentative experiments with that overgrown monster, the flying machine - at this stage, the glider. Next come the Barnstormers, the first professional airmen, trying desperately to wrest a living from the air, pioneering in the field of practical flying as little more than vaudeville performers. These were the days of daring aero-acrobatics and tense and crowded air-meets. The First World War saw a tremendous advance in technical manoeuvres and in pilot skill; the first aviation school was established in Toronto, where the War Birds learned to fly. An unparalleled boom in aviation followed the war. Public interest had been aroused by the celebrated achievement of Canada's Air Force, and many young men, the restlessness of the war still in them, were obsessed by the itch to fly again. The dollar-a-minute days marked the beginning of passenger travel and a steady increase in experimental flying, to bear its practical fruit in days to come. The next chapter is one of heroic enterprise - the conquest of the Atlantic and the spanning of the Continent. No less epic is the history of the bush pilots who tamed the Canadian North. We must be grateful to Mr. Ellis for rescuing from obscurity this important chapter

in our history.

Some of the finest military warbirds in American aviation history are still flying in the Southern State of Alabama. Many of them are on display in a number of excellent air museums, or they have been mounted on pylons to stand as memorials to the many military aviators who called Alabama home. This handbook is designed to provide aviation enthusiasts with a simple locating guide on where to find Alabamays retired warbirds within the state. Many of the aircraft can be found in the Southern Museum of Flight, Birmingham; the United States Army Aviation Museum; the US Space and Rocket Center at Huntsville; Battleship Memorial Park at Mobile; Maxwell AFB Park at Montgomery; or in the hands of private owners and collectors. The handbook provides photographs of many of the aircraft preserved in Alabama, along with a brief description and history of its service within the US armed forces. The aircraft are listed alphabetically by manufacturer, number and aircraft type. Famous aircraft found on display in Alabama include the Lockheed A-12 Blackbird, and a number of very rare flying machines such as the gigantic one of a kind Boeing Vertol XCH-62 Heavy Lift Helicopter not found in other aviation museums.

The reissue of this definitive biography heralds the one-hundredth anniversary of the Wright brothers' first flight. Brilliant, self-trained engineers, the Wright brothers had a unique blend of native talent, character, and family experience that perfectly suited them to the task of invention but left them ill-prepared to face a world of skeptics, rivals, and officials. Using a treasure trove of Wright family correspondence and diaries, Tom Crouch skillfully weaves the story of the airplane's invention into the drama of a

unique and unforgettable family. He shows us exactly how and why these two obscure bachelors from Dayton, Ohio, were able to succeed where so many better-trained, better-financed rivals had failed.
