The Dennis company has been building vehicles since 1895, making it the oldest continuously producing British manufacturer. From its origins in a small Guildford shop, the company has grown to become a major bus manufacturer with its products selling around the world. This book discusses the company's highs and lows, through two world wars, challenging markets and ownership changes. It documents the vehicles produced and their innovative design features, from early cars and street-cleaning machines to vans, buses, trucks, fire engines and ambulances. First-hand descriptions of how, and why, some of the company's most successful products such as the Dart, Trident and Enviro

buses evolved. It explains why their once market-leading fire engines are no longer made. It also analyses the reasons why some products were less successful and explores what happened to parts of the company that were sold over the years. Finally, the company's future opportunities and challenges are considered. The author, Andy Goundry, has not only drawn on his own personal experience of almost twenty years of employment with the company but he has drawn on what is left of the company archives, private collections and first-hand accounts, to produce this book as a salutation of over 125 years of continuous manufacturing.

With 100 recipes, this is the first book to explore the vibrant food culture of Macau--an east-meets-west melting pot of Chinese, Portuguese, Malaysian, and Indian foodways--as seen through the lens of the cult favorite Chicago restaurant, Fat Rice. An hour's ferry ride from Hong Kong, on the banks of the Pearl River in China, lies Macau--a modern, cosmopolitan city with an unexpected history. For centuries, Macau was one of the world's greatest trading ports: a Portuguese outpost and crossroads along the spice route, where travelers from Europe, Southeast Asia, South Asia, and mainland China traded resources, culture, and food. The Adventures of Fat Rice is the story of how two Chicago chefs discovered and fell in love with this fascinating and, at least until now, unheralded cuisine. With dishes like Minchi (a classic Macanese meat hash), Po Kok Gai (a Portuguese-influenced chicken curry with chouriço and olives), and Arroz Gordo (if paella and fried rice had a baby), now you, too, can bring the eclectic and wonderfully unique--yet enticingly familiar--flavors of Macau into your own kitchen.
