When young Mister Ethan Cole took over as the lead engineer on his first ship, the last thing he was expecting was to be usurped by the roguish Cecil Goode. Forced to share responsibility and living arrangements, the pair rub each other the wrong way before being hijacked by pirates. Will the pair be able to find their love before their ship crashes?

Marine Diesel Engines SAE International
How Cool Are Penguins is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain

The mysteries of the versatile LS series engines are unlocked in the Haynes Techbook Cummins Diesel Engine Manual. Covering everything from engine overhaul, cylinder head selection and modification, induction and fuel systems, camshafts and valve train, to beefing-up the bottom end, turbo and supercharger additions, engine swaps and extreme builds, this manual will help you get the most from your LS-powered vehicle.

Boating Elsevier

The dory has long fascinated boat lovers. Of the simplest design, built from the most common materials, the dory has the ability to handle the most demanding tasks. The variations on the basic dory design are legion. Over the years the dory has seen duty as a fishing boat, a lumberman's log-driving batteau, a lifeboat, a recreational rowing boat, and a racing sailboat. This book is the most comprehensive book on dories ever published. More than a decade in the making, it is at once a history of the dory, a practical handbook on how to build a dory, and a compendium of dory designs with full construction details. On these pages can be found details about some of the legendary dory types: Bank dories, Swampscotts, gunning dories, semi-dories, St. Pierre dories, flat-irons, dory skiffs, and bateaux. The author and the illustrator are two of the foremost living experts on the history, building, and use of dories. John Gardner has spent a lifetime studying and building dories. His plans, published for years in the National Fisherman, have sparked a resurgence of interest in this boat type. Samuel F. Manning, who has probably propelled dories more miles with oar and sail than any but a surviving Grand Banks fisherman, is a professional illustrator who specializes in maritime subjects. His step-

by-step illustrations of exceptional clarity make this book unique. Book jacket.

National RV Trader, July 2009 Haynes Manuals N. America, Incorporated "Fitrah: Man's Natural Disposition" is a translation of the Persian book "Fi?rat" by the great Muslim thinker and reformer, Ayatollah Murtada Mutahhari. "Fitrah" is the theme of a 10-session lecture series given the martyred thinker in 1976-77. With ample citations from the Qur'an and other traditional Islamic sources, Mutahhari discusses the concept of 'fitrah' or man's natural disposition. The author does not confine himself to Islamic references as he continuously engages with the views of a wide range of philosophers including Plato, William James, Russell, Nietzsche, Marx, Feuerbach, Auguste Comte, Spencer, Will Durant, and Durkheim, among others. Mutahhari's ontological discussion covers a range of issues, including the literal and technical meaning of 'fitrah', sacred inclinations, love and worship, and the evolution of human originality. He also examines materialism and provides a theistic approach to some issues pertaining to the theories on the origin of religion, the evolution of human society, intrinsic and acquired guidance, and intuitive and sensory dispositions. This book lays a significant interconnected and deep foundation in Islamic theology and an understanding of human psychology, sociology and anthropology fully supported by the holy Quran, ahadith, logic and philosophy. The reader will leave with a holistic understanding of Islam and a true connection with the Almighty (SWT) through one own self.

The Northern Logger and Timber Processor Adlard Coles

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by

Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'
