When I decided to make a chess puzzle book I had many ideas in mind: The puzzles should be challenging but not so difficult that a chessboard is needed they can be solved on the train, plane or wherever you happen to be when you have a few minutes to spare. The positions should be educational with some instructive point to the solution. I have generally

stuck to that, but I also selected many puzzles just because they were fun. The positions are all from fairly recent games, so that the reader will not have seen them before in older puzzle books. John Shaw is a chess grandmaster who has been Scottish Chess Champion three times.

William of Austria, their education has included spending time in each other's court for careful training as future rulers. When the balance of power in Central Europe unexpectedly shifts, the Council from faraway Poland demands that Jadwiga become their monarch. The eleven-year-old girl is soon traveling north to Krakow where she is crowned queen in Wawel Cathedral, swearing "to keep and maintain the rights and liberties granted by the righteous Christian kings of Poland." And she means to do it. However, when Poland's Council insists upon her marrying the fierce pagan Prince Jagiello of Lithuania instead of William, Jadwiga passionately resists. The intense struggle in which this young queen lays down her personal hopes and gives her entire life to the fulfillment of a peaceful union between Poland and Lithuania—long referred to as "The wedding ring of Jadwiga"—will have far-reaching consequences in her own time and in the years to come.
