Edinburgh, 1844. Beautiful Aileana Kameron only looks the part of an aristocratic young lady. In fact, she's spent the year since her mother died developing her ability to sense the presence of Sithichean, a faery race bent on slaughtering humans. She has a secret mission: to destroy the faery who murdered her mother. But when she learns she's a Falconer, the last in a line of female warriors and the sole hope of

preventing a powerful faery population from massacring all of humanity, her quest for revenge gets a whole lot more complicated. The first volume of a trilogy from an exciting new voice in young adult fantasy, this electrifying thriller blends romance and action with steampunk technology and Scottish lore in a deliciously addictive read.

Hungarian Princess Jadwiga (Yahd VEE gah) has been prepared from birth to put the peace and prosperity of nations above her own desires. Betrothed in 1378 at the age of five to Prince William of Austria, their education has included spending time in each other ' s court for careful training as future rulers. When the balance of power in Central Europe unexpectedly shifts, the Council from faraway Poland demands that Jadwiga become their monarch. The eleven-year-old girl is soon traveling north to Krakow where she is crowned queen in Wawel Cathedral, swearing " to keep and maintain the rights and liberties granted by the righteous Christian kings of Poland. " And she means to do it. However, when Poland ' s Council insists upon her marrying the fierce pagan Prince Jagiello of Lithuania instead of William, Jadwiga passionately resists. The intense struggle in which this young queen lays down her personal hopes and gives her entire life to the fulfillment of a peaceful union between Poland and Lithuania—long referred to as " The wedding ring of Jadwiga " —will have far-reaching consequences in her own time and in the years to come. Jadwiga, " White Dove of Poland, " was canonized a saint in 1997 by Pope John Paul II. Includes an Author ' s Note Historical Insight article by Daria Sockey

Grid-Scale Energy Storage Systems and Applications provides a timely introduction to state-of-the-art technologies and important demonstration projects in this rapidly developing field. Written with a view to real-world applications, the authors describe storage technologies and then cover operation and control, system integration and battery management, and other topics important in the design of these storage systems. The rapidly-developing area of electrochemical energy storage technology and its implementation in the power grid is covered in particular detail. Examples of Chinese pilot projects in new energy grids and micro grids are also included. Drawing on significant Chinese results in this area, but also including data from abroad, this will be a valuable reference on the development of grid-scale energy storage for engineers and scientists in power and energy transmission and researchers in academia. Addresses not only the available energy storage technologies, but

---

also topics significant for storage system designers, such as technology management, operation and control, system integration and economic assessment. Draws on the wealth of Chinese research into energy storage and describes important Chinese energy storage demonstration projects. Provides practical examples of the application of energy storage technologies that can be used by engineers as references when designing new systems.

The book corrects many of the historical myths that have appeared in earlier Lotus books, and adds many previously unknown facts. It includes, for the first time, period photographs and sketches taken from the personal albums and drawing boards of those who were there. In addition, contemporary illustrations clarify some of the more unusual and innovative techniques used to overcome the engineering problems that they faced. An extensive appendix offers complete race results and specifications (1951-54). Lotus The Early Years tells the story of what might be called the amateur years of Lotus, before Colin Chapman and Mike Costin gave up their day jobs and worked for Lotus full time. Colin relied on enthusiasts for motor sport who were attracted to him partly because of his charm, but mainly because he was so obviously going places and made things

happen very fast. This is their story, told by as many of them who are still around 50 years later, based very much on records kept by the Allen brothers, and the daily diary kept by the author at the time. That they should have created a car that beat the world leaders in the 1500cc Class seemed astonishing at the time, but subsequent history showed that these humble beginnings were based on an ability and drive which took Colin to the top. - The true story of Lotus and how it all began by those who were there - Details the beginnings of Lotus during the fifties - Historic photographs taken from the personal archives of the author - Original engineering drawings/sketches shown here for the first time - Extensive appendix with complete race results and specifications (1951-54) About the Author Peter Ross, was a de Havilland Aircraft apprentice in the 1940's, and went on to a career in British European Airways. He knew Colin Chapman from the very start, helped build the Lotus IIIb and the Lotus Mk VIII prototype, and was Team Manager for Lotus at the 1955 Dundrod TT. From 1953 he was a spare time volunteer draughtsman to Colin up to 1959, when he was posted by BEA to Belgium. He was a regular camp follower at the early Grands Prix from 1958-62, usually to be found doing the lap scoring in the Lotus pit. After retiring from the airline in 1987, he spent 11 years manufacturing some 300 of his own design of recumbent pedal tricycle, the Trice, which he still uses for shopping and leisure rides.

Heinz Kohut's work represents an

---

important departure from the Freudian tradition of psychoanalysis. A founder of the Self Psychology movement in America, he based his practice on the belief that narcissistic vulnerabilities play a significant part in the suffering that brings people for treatment. Written predominantly for a psychoanalytic audience Kohut's work is often difficult to interpret. Siegel uses examples from his own practice to show how Kohut's innovative theories can be applied to other forms of treatment.

According to the Council of Graduate Schools, only 57 percent of students who start their Ph.D.s complete them within ten years, and many times it's the thesis or dissertation that is holding them back. In this book, you will gain insight regarding the entire research process, from organizing your literature and materials most effectively to analyzing and evaluating the big picture for defense. You will learn how to locate and recognize a topic that is appropriate for your thesis or dissertation, and you will discover how to expand on the subject matter to ensure it's unique and distinct from any other research out there. This book will ensure that your argument is strong, sound, and persuasive throughout

your entire thesis or dissertation, from the introductory chapter through the summarizing conclusive statements, and you will learn how to do so without plagiarizing or cutting corners. You will master how to write ethically, objectively, and properly according to your academic subject's standards. With this book as your guide, you will even find out how your research can take you from a proposal to a published writing career. With this book, you will learn everything from the ground-level basics to the more detailed breakdown of the research process. You will gain a strong understanding of the difference between a thesis and dissertation, and you will grasp the components expected of your work regardless of the subject matter of your research. This book will walk you through the entire process step-by-step, teaching you how to structure a planning and writing schedule that will keep the process manageable and not overwhelming. When I decided to make a chess puzzle book I had many ideas in mind: The puzzles should be challenging but not so difficult that a chessboard is needed they can be solved on the train, plane or wherever

---

you happen to be when you have a few minutes to spare. The positions should be educational with some instructive point to the solution. I have generally stuck to that, but I also selected many puzzles just because they were fun. The positions are all from fairly recent games, so that the reader will not have seen them before in older puzzle books. John Shaw is a chess grandmaster who has been Scottish Chess Champion three times.
