Educational systems worldwide are facing an enormous shift as a result of sociocultural, political, economic, and technological changes. The technologies and practices that have developed over the last decade have been heralded as opportunities to transform both online and traditional education systems. While proponents of these new ideas often postulate that they have the potential to address the educational problems facing both students and institutions and that they could provide an opportunity to rethink the ways that education is organized and enacted, there is little evidence of emerging technologies and practices in use in online education. Because researchers and practitioners interested in these possibilities often reside in various disciplines and academic departments the sharing and dissemination of their work across often rigid boundaries is a formidable task. Contributors to Emergence and Innovation in Digital Learning include individuals who are shaping the future of online learning with their innovative applications and investigations on the impact of issues such as openness, analytics, MOOCs, and social media. Building on work first published in Emerging Technologies in Distance Education, the contributors to this collection harness the dispersed knowledge in online education to provide a one-stop locale for work on emergent approaches in the field. Their conclusions will influence the adoption and success of these approaches to education and will enable researchers and practitioners to conceptualize, critique, and enhance their understanding of the foundations and applications of new technologies.

Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C. where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

While most children learn to read fairly well, there remain many young Americans whose futures are imperiled because they do not read well enough to meet the demands of our competitive, technology-driven society. This book explores the problem within the context of social, historical, cultural, and biological factors. Recommendations address the identification of groups of children at risk, effective instruction for the preschool and early grades, effective approaches to dialects and bilingualism, the importance of these findings for the professional development of teachers, and gaps that remain in our understanding of how children learn to read. Implications for parents, teachers, schools, communities, the media, and government at all levels are discussed. The book examines the epidemiology of reading problems and introduces the concepts used by experts in the field. In a clear and readable narrative, word identification, comprehension, and other processes in normal reading development are discussed. Against the background of normal progress, Preventing Reading Difficulties in Young Children examines factors that put children at risk of poor reading. It explores in detail how literacy can be fostered from birth through kindergarten and the primary grades, including evaluation of philosophies, systems, and materials commonly used to teach reading. Profiles in Operations Research: Pioneers and Innovators recounts the development of the field of Operations Research (OR), the science of decision making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted our daily lives: when making an airline or hotel reservation, waiting in line at a bank, getting the correctly blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements—OR helped the Allies win the war. The scientific field that emerged from these studies was called operational research in the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals—interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines. The Editors: Arjang A. A brilliant psychoanalyst and professor of literature invites us to contemplate profound questions about the human experience by focusing on some of the best-known characters in literature—from how Virginia Woolf ’ s Mrs. Dalloway copes with the inexorability of midlife disappointment to Ruth's embodiment of adolescent rebellion in Kazuo Ishiguro ’ s Never Let Me Go. “ So beautiful ... a fantastic book. ” —Zadie Smith, best-selling author of White Teeth In supple and elegant prose, and with all the expertise and insight of his dual professions, Josh Cohen explores a new way for us to understand ourselves. He helps us see what Lewis Carroll ’ s Alice and Harper Lee ’ s Scout Finch can teach us about childhood. He delineates the mysteries of education as depicted in Jane Eyre and as seen through the eyes of Sandy Stranger in The Prime of Miss Jean Brodie. He discusses the need for adolescent rebellion as embodied in John Grimes in James Baldwin ’ s Go Tell It on the Mountain and in Ruth in Kazuo Ishiguro ’ s Never Let Me Go. He makes clear what Goethe ’ s Young Werther and Sally Rooney ’ s Frances have—and don ’ t have—in common as they experience first love; how Middlemarch ’ s Dorothea Brooke deals with the vicissitudes of marriage. Vis-a-vis old age and death, Cohen considers what wisdom we may glean from John Ames in

Marilynne Robinson ’ s Gilead and from Don Fabrizio in Giuseppe Tomasi di Lampedusa ’ s The Leopard. Featuring: • Alice—Lewis Carroll, Alice's Adventures in Wonderland / Through the Looking Glass • Scout Finch—Harper Lee, To Kill a Mockingbird • Jane Eyre—Charlotte Bront ë , Jane Eyre • John Grimes—James Baldwin, Go Tell It on the Mountain • Ruth—Kazuo Ishiguro, Never Let Me Go • Vladimir Petrovitch—Ivan Turgenev, First Love • Frances—Sally Rooney, Conversations with Friends • Jay Gatsby—F. Scott Fitzgerald, The Great Gatsby • Esther Greenwood—Sylvia Plath, The Bell Jar • Clarissa Dalloway—Virginia Woolf, Mrs. Dalloway • And more!

What ’ s a Cellphilmm? explores cellphone video production for its contributions to participatory visual research. There is a rich history of integrating participants ’ videos into community-based research and activism. However, a reliance on camcorders and digital cameras has come under criticism for exacerbating unequal power relations between researchers and their collaborators. Using cellphones in participatory visual research suggests a new way forward by working with accessible, everyday technology and integrating existing media practices. Cellphones are everywhere these days. People use mobile technology to visually document and share their lives. This new era of democratised media practices inspired Jonathan Dockney and Keyan Tomaselli to coin the term cellphilmm (cellphone + film). The term signals the coming together of different technologies on one handheld device and the emerging media culture based on people ’ s use of cellphones to create, share, and watch media. Chapters present practical examples of cellphilmm research conducted in Canada, Hong Kong, Mexico, the Netherlands and South Africa. Together these contributions consider several important methodological questions, such as: Is cellphilming a new research method or is it re-packaged participatory video? What theories inform the analysis of cellphilms? What might the significance of frequent advancements in cellphone technology be on cellphilms? How does our existing use of cellphones inform the research process and cellphilmm aesthetics? What are the ethical dimensions of cellphilmm use, dissemination, and archiving? These questions are taken up from interdisciplinary perspectives by established and new academic contributors from education, Indigenous studies, communication, film and media studies.

Ernesto Macaro brings together a wealth of research on the rapidly expanding phenomenon of English Medium Instruction. Against a backdrop of theory, policy documents, and examples of practice, he weaves together research in both secondary and tertiary education, with a particular focus on the key stakeholders involved in EMI: the teachers and the students. Whilst acknowledging that the momentum of EMI is unlikely to be diminished, and identifying its potential benefits, the author raises questions about the ways it has been introduced and developed, and explores how we can arrive at a true cost – benefit analysis of its future impact. “ This state-of-the-art monograph presents a wide-ranging, multi-perspectival yet coherent overview of research, policy, and practice of English Medium Instruction around the globe. It gives a thorough, in-depth, and thought-provoking treatment of an educational phenomenon that is spreading on an unprecedented scale. ” Guangwei Hu, National Institute of Education, Singapore Additional online resources are available at [www.oup.com/elt/teacher/emi](http://www.oup.com/elt/teacher/emi) Ernesto Macaro is Professor of Applied Linguistics at the University of Oxford and is the founding Director of the Centre for Research and Development on English Medium Instruction at the university.
