Dealer says it's a 350 big cam cummins. How can I confirm? What is the difference between a 350 and a 400? Are there any easy hp/reliability mods? Ive read about changing a spring and fuel return line, but no details were given. It's supposed to make fuel pressure even between all cylinders creating a smoother running engine.

A Cummins NHC 250 and a Cummins NTC both use a 855 block. The 290 will be a step up for sure. What is it's running condition? how is it sitting now? Is it in a running truck or in a frame? You may want to check a few things before buying it. Is it a small cam or big cam? is it a really a 290? is it a formula motor? does it have piston squirters?
