A Curious Man John Wiley & Sons
A New York Times / National Bestseller "America's funniest science writer" (Washington Post) Mary Roach explores the science of keeping human beings intact, awake, sane, uninfected, and uninfested in the bizarre and extreme circumstances of war. Grunt tackles the science behind some of a soldier's most challenging adversaries—panic, exhaustion, heat, noise—and introduces us to the scientists who seek to conquer them. Mary Roach dodges hostile fire with the U.S. Marine Corps Paintball Team as part of a study on hearing loss and survivability in combat. She visits the fashion design studio of U.S. Army Natick Labs and learns why a zipper is a problem for a sniper. She visits a repurposed movie studio where amputee actors help prepare Marine Corps medics for the shock and gore of combat wounds. At Camp Lemmonier, Djibouti, in east Africa, we learn how diarrhea can be a threat to national security. Roach samples caffeinated meat, sniffs an archival sample of a World War II stink bomb, and stays up all night with the crew tending the missiles on the nuclear submarine USS Tennessee. She answers questions not found in any other book on the military: Why is DARPA interested in ducks? How is a wedding gown like a bomb suit? Why are shrimp more dangerous to sailors than sharks? Take a tour of duty with Roach, and you ' ll never see

our nation ' s defenders in the same way again.

New Material â e" In addition to general updating, there are more examples involving middle and secondary school teaching, more examples linking creativity to technology, new information on the misdiagnosis of creative students as ADHD, and more material on cross-cultural concepts of creativity, collaborative creativity, and linking creativity to state standards. Pedagogy & Design â e" Chapter-opening vignettes, within-chapter reflection questions and activities, sample lesson ideas from real teachers, and end-of-chapter journaling activities help readers adapt content to their own teaching situations. Also, a larger trim makes the layout more open and appealing and a single end-of-book reference section makes referencing easier. Elements of Argument The Saylor Foundation When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better understand how such choices might arise in your own writing. The idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are influencing your own responses as a reader. What is it about the way this text is written that makes you feel and respond the way you do?

Learning in the Cloud Pearson

A Curious Man is the marvelously compelling biography of Robert "Believe It or Not" Ripley, the enigmatic cartoonist turned globetrotting millionaire who won international fame by celebrating the world's strangest oddities, and whose outrageous showmanship taught us to believe in the unbelievable. As portrayed by acclaimed biographer Neal Thompson, Ripley's life is the stuff of a classic American fairy tale. Buck-toothed and cursed by shyness, Ripley turned his sense of being an outsider into an appreciation for the strangeness of the world. After selling his first cartoon to Time magazine at age eighteen, more cartooning triumphs followed, but it was his "Believe It or Not" conceit and the wildly popular radio shows it birthed that would make him one of the most successful entertainment figures of his time and spur him to search the globe's farthest corners for bizarre facts, exotic human curiosities, and shocking phenomena. Ripley delighted in making outrageous declarations that somehow always turned out to be true—such as that Charles Lindbergh was only the sixty-seventh man to fly across the Atlantic or that "The Star Spangled Banner" was not the national anthem. Assisted by an exotic harem of female admirers and

by ex-banker Norbert Pearlroth, a devoted researcher who spoke eleven languages, Ripley simultaneously embodied the spirit of Peter Pan, the fearlessness of Marco Polo and the marketing savvy of P. T. Barnum. In a very real sense, Ripley sought to remake the world's aesthetic. He demanded respect for those who were labeled "eccentrics" or "freaks"—whether it be E. L. Blystone, who wrote 1,615 alphabet letters on a grain of rice, or the man who could swallow his own nose. By the 1930s Ripley possessed a vast fortune, a private yacht, and a twenty-eight room mansion stocked with such "oddities" as shrunken heads and medieval torture devices, and his pioneering firsts in print, radio, and television were tapping into something deep in the American consciousness—a taste for the titillating and exotic, and a fascination with the fastest, biggest, dumbest and most weird. Today, that legacy continues and can be seen in reality TV, YouTube, America's Funniest Home Videos, Jackass, MythBusters and a host of other pop-culture phenomena. In the end Robert L. Ripley changed everything. The supreme irony of his life, which was dedicated to exalting the strange and unusual, is that he may have been the most amazing oddity of all.
