This edition is once again a new, thoroughly revised version of Christian Ethics II. In some portions the subject matter has been reorganized more organically, and recent theological developments and documents of the magisterium have been integrated. New themes have been added, others further developed, such as deepening the concept and content of mission, as well as ecumenical participation. Also, questions in bioethics have been supplemented, such as the duty to preserve life, topics of prenatal medicine, reproductive and therapeutic cloning, genetic alteration, and euthanasia. Other issues raised concern the discrimination against women, civil marriage of homosexuals, compassion in

prison care, the right of asylum, humanitarian interventions, the fostering of peace after conflicts, empowerment of the poor in development projects, and the treatment of animals. The author hopes that this new edition will be a contribution to the ongoing aggiornamento of moral theology and that it will continue to meet the expectations of its readers.

[Absolutes in Moral Theology?](#) Fortress Press

Extraordinary social and moral shifts have taken place in Western societies. Sex is no longer the exclusive province of husband and wife set within

monogamous married family life. The world is awash in sex: advertising, books, magazines, movies, sex clubs, internet pornography, etc. Parents, traditionally responsible for guiding their children's moral and social development, have been effectively side-lined by commercial and governmental interests. This volume pursues a detailed study of how changes in social life dating from the sexual revolution of the 1960s have affected the family. Cherry shows that attempts to redefine the family away from the marital union of husband and wife come with real costs: social, emotional, psychological, and financial. He argues that while political campaigns have fuelled attempts to undermine the traditional family, to pretend it possesses no basic biological, social, or moral reality, such ideologically driven undertakings are injurious to society. Acting as if there are no consequential differences between traditional marriage and other sexual lifestyles ignores significant data demonstrating the importance of the traditional

biological family to the well-being of men and women, and the successful raising of children. The family possesses a biological and moral being that is foundational; an essential building block of society. Cherry argues that the family is the most incontrovertible field of conflict in the culture wars; others might conclude that it is the decisive battleground.

Long before this work, here in an edition containing three volumes, two of them of biographical nature, was first published, the authors cherished the hope that it could be a genuine narrative history of the county and wanted to be personally instrumental in achieving so important a result. Their attention was especially directed to the matter by their observations during their connection with the schools, from which they became convinced of the extremely elementary

character of the general knowledge of this county's history, even in relation to the Revolution, whereof, indeed, anything like a well-coordinated understanding is most exceptional among the people, and quite incapable of being taught to the young because of the unsuitability for that purpose of all books heretofore published that bear on the subject. In formulating the plan for the present work they had fundamentally in view a lucid continuous narrative, thorough in its treatment of the outlines of the subject and reasonably attentive to local details without extending to minuteness. These lines have been

followed throughout. This is volume two out of three, containing the first part of the biographies of hundreds of important persons.
