A classic text since it was first published in 1974, the Lippincott Manual for Nursing Practice (LMNP) has provided essential nursing knowledge and up-to-date information on patient care for nearly 40 years. Now in its 10th edition, this full-color text continues to serve as the most comprehensive reference for practicing nurses and nursing students worldwide. Often referred to as the 'Lippincott Manual' or simply the 'Lippincott', the LMNP is widely used as a procedure manual for many healthcare institutions (contains 157 Nursing Procedure Guidelines). It is also widely regarded as the Gold Standard for nursing practice in the classroom. Organized into five major parts, LMNP presents a comprehensive reference for all types of core nursing care. Part 1: Nursing Process & Practice; Part 2: Medical-Surgical Nursing; Part 3: Maternity & Neonatal Nursing; Part 4: Pediatric Nursing; Part 5: Psychiatric Nursing. Content is evidence-based with supporting articles highlighted in actual entries and procedure guidelines. Official Guidelines that shape practice are incorporated in to the content and include those from the National Institutes of Health, American Diabetes Association, American Heart Association, American Nurses Association, Joint Commission, AWHONN, and others. A companion Website includes full text, an image bank, and drug-related NCLEX®-style questions, FDA updates, and new clinical studies.

Made to Live depicts a physician's journey to save lives. Dr. Paul Saba begins his story with the battle to save the life of his baby girl, Jessica, who was born with a severe congenital cardiac malformation. He describes the challenges of facing difficult diagnoses through both his personal experiences and those of his patients. This book debunks the myths of euthanasia and assisted suicide. Dr. Saba's battle has taken him to the Canadian courts, where he has been silenced from challenging Canada's euthanasia laws. He has been forbidden from utilizing the Canadian Constitution or presenting his arguments in court to oppose euthanasia and assisted suicide. Dr. Saba believes no one can know what the future holds. Hope and loving support can overcome many obstacles in life's journey. In the end, we are all "made to live," as his daughter Jessica inscribed on one of her paintings at seven years old.

Comprehensive Neonatal Nursing Care, Sixth Edition Lippincott Williams & Wilkins
Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

International Criminal Procedure: Principles and Rules is a comprehensive study of international criminal proceedings written by over forty leading experts in the field. The book offers a systematic overview and detailed comparison of the standards governing the conduct of proceedings in all major international and internationalized criminal courts from the Nuremberg and Tokyo Tribunals to the recently established Cambodian Extraordinary Chambers and the Special Tribunal for Lebanon. Based on a major research project, the study covers all procedural phases from the initiation of investigation to the appeals process. It pays special attention to the crosscutting themes which shape the contemporary discourse on international criminal justice, including the law of evidence, the defence issues, the procedural role of victims, and negotiated dismissal of international crime cases. The book not only takes stock of the procedural legacy of the UN ad hoc Tribunals for the former Yugoslavia and Rwanda and the International Criminal Court, but also reflects on the future directions of international criminal procedure. Investigating the tribunals' procedural law and practice through the prism of human rights law, domestic legal traditions, and tribunals' special objectives, the expert group puts forth proposals on how the challenges facing international criminal jurisdictions can best be met. International Criminal Procedure will be an indispensable work for practitioners involved in the adjudication of serious crimes on both national and international level, as well as international law students and academics.
