Employability Skills for Law Students is designed to help you: * identify the academic, practical and transferable skills that can be developed whilst studying for a law degree; * recognise the value of those skills to employers (within both law and non-law professions);

* identify any gaps in your skills portfolio; * maximise opportunities to develop new skills through participation in a range of activities; * effectively demonstrate your skills to potential employers; * improve your employability prospects on graduation from university. Whether you are in your first year or your last, this book will ensure you make the most of your time at university, developing skills inside and outside the lecture theatre, so that you are in the best possible position to pursue your

chosen career on graduation - as a solicitor, barrister, or a completely different profession. An interactive Online Resource Centre provides a range practical activities designed to give you opportunities to practise and receive feedback upon the skills you are developing.

Applications of Geomatics in Civil Engineering
CRC Press

This book constitutes the proceedings of the Second International Conference on Mining Intelligence and Knowledge Exploration, MIKE 2014, held in Cork, Ireland, in December 2014. The 40 papers presented were carefully reviewed and selected from 69 submissions. The papers cover topics such as information retrieval, feature selection, classification, clustering, image processing, network security, speech processing, machine learning, recommender systems, natural language processing, language, cognition and computation, and business intelligence.

Digital Organizations Manufacturing Guilford Publications

More than 40 articles provide an extensive coverage of clinical and basic science advances over the last three years of research on subarachnoid hemorrhage-induced brain injuries. Early brain injury, the new frontier of subarachnoid research, which may be a key contributor to the high mortality

and morbidity, promotes collaborative efforts from neurosurgery, neurology, neuro-ICU into other interrelated fields and basic neurosciences. For the first time, subarachnoid hemorrhage research is almost equally divided by early brain injury and cerebral vasospasm, mechanistic investigations and therapeutic approaches, demonstrating a translational feature of the future direction.

Artificial Intelligence and Heuristics for Smart Energy Efficiency in Smart Cities Springer Science & Business Media

The latest inventions in computer technology influence most of human daily activities. In the near future, there is tendency that all of aspect of human life will be dependent on computer applications. In manufacturing, robotics and automation have become vital for high quality products. In education, the model of teaching and learning is focusing more on electronic media than traditional ones. Issues related to energy savings and environment is becoming critical. Computational Science should enhance the quality of human life, not only solve their problems. Computational Science should help humans to make wise decisions by presenting choices and their possible consequences. Computational Science should help us make sense of observations, understand natural language, plan and reason with extensive background knowledge. Intelligence

with wisdom is perhaps an ultimate goal for human-oriented science. This book is a compilation of some recent research findings in computer application and computational science. This book provides state-of-the-art accounts in Computer Control and Robotics, Computers in Education and Learning Technologies, Computer Networks and Data Communications, Data Mining and Data Engineering, Energy and Power Systems, Intelligent Systems and Autonomous Agents, Internet and Web Systems, Scientific Computing and Modeling, Signal, Image and Multimedia Processing, and Software Engineering.

Hydrodynamics VI: Theory and Applications Guilford Publications

Ever get the feeling that the new jobs are not always advertised? You'd be right. To give yourself the best chance of landing that dream job you can't rely on responding to job ads and waiting for the headhunter to call. The new edition of bestselling *Killer CVs and Hidden Approaches* is the perfect aid to developing your creative job campaign. 2020/2021 Edition Springer Science & Business Media

For more than 15 years, The Academic Job Search Handbook has assisted job seekers in all academic disciplines in their search for faculty positions. The guide includes information on aspects of the search that are common to all levels, with invaluable tips for those seeking their first or second faculty

position. This new edition provides updated advice and addresses hot topics in the competitive job market of today, including the challenges faced by dual-career couples, job search issues for pregnant candidates, and advice on how to deal with gaps in a CV. The chapter on alternatives to academic jobs has been expanded, and sample resumes from individuals seeking nonfaculty positions are included. The book begins with an overview of the hiring process and a timetable for applying for academic positions. It then gives detailed information on application materials, interviewing, negotiating job offers, and starting the new job. Guidance throughout is aimed at all candidates, with frequent reference to the specifics of job searches in scientific and technical fields as well as those in the humanities and social sciences. Advice on seeking postdoctoral opportunities is also included. Perhaps the most significant contribution is the inclusion of sample vitas. The Academic Job Search Handbook describes the organization and content of the vita and includes samples from a variety of fields. In addition to CVs and research statements, new in this edition are a sample interview itinerary, a teaching portfolio, and a

sample offer letter. The job search correspondence section has also been updated, and there is current information on Internet search methods and useful websites. CVs and Applications Springer Science & Business Media
The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice

site The Professor is In, she has helped countless Ph.D. ' s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more. Intelligent Systems Design and Applications Springer
Featuring expert advice for applying to graduate school in clinical and counseling psychology--as well as profiles of more than 300 doctoral programs--this authoritative resource has now been updated for 2020/2021. More than 150,000 prospective students have used the Insider's Guide to find the programs that meet their needs and maximize their chances of getting in. Profiles include each program's specializations or tracks, admission requirements, acceptance rates, financial aid, research areas, and clinical opportunities. A detailed time line and multiple worksheets help students complete key prerequisites, decide where to apply, develop their credentials, put together strong applications, and make an informed final decision. The 2020/2021 Edition includes

profiles of 14 additional programs, plus updates about the application process.
