Perspectives CRC Press

From the first seconds Following the Big Bang, to our best guesses for the fate of the universe and humanity, science provides stunning new perspectives about the place of humanity in the cosmos. Humans may live on one planet in one small corner of the Milky Way, itself one of billions of other galaxies, but Earth may be unique in one respect. Earth is teaming with life, one species of which, through chance and natural selection, developed an extraordinary brain, gifted with imagination, curiosity and a compulsion to understand ourselves and the universe. Perspectives is a journey through deep time, from the creation of the universe to the beginnings of life, our human origins and later the rise of culture and religion. It explores what it means to be human, and where our technology could take us in the years and centuries to come....

Completely revised and updated in a second edition, this volume represents the only book ever written that analyzes sports writing and presents it as "exceptional" writing. Other books discuss sports writers as "beat reporters" in one area of journalism, whereas this book shows aspiring sports writers a myriad of techniques to make their writing stand out. It takes the reader through the entire process of sports writing: observation, interviewing techniques, and various structures of articles; types of "leads;" transitions within an article; types of endings; use of statistics; do's and don'ts of sports writing; and many other style and technique points. This text provides over 100 examples of leads drawn from newspapers and magazines throughout the country, and also offers up-to-date examples of sports jargon from virtually every major and minor sport played in the U.S.

This book addresses the evolving crisis in agriculture and sketches the 'community economy' that grounds agricultural enterprise more accurately than the industrial model. In its current practice, agriculture is (in the United States but increasingly in the rest of the world) unsustainable and destructive. The most immediately unsustainable feature of industrial agriculture is its dependence on the products of petroleum—as feedstock for fertilizers, herbicides, and pesticides, and as fuel for the farm machinery and transport of agricultural products into the cities. The problems of agriculture and in general the food systems to which it is attached range from the vulnerability of monocultures to new and stronger pests to the emerging medical problem of obesity. The need for agricultural reform is widely acknowledged; one

part of the new work being done suggests that food production in the cities may solve several of its problems at once. This book is suitable for both undergraduate and graduate students in agriculture and environmental studies.

?This book covers the theory, design and applications of computer networks, distributed computing and information systems. Networks of today are going through a rapid evolution, and there are many emerging areas of information networking and their applications. Heterogeneous networking supported by recent technological advances in low-power wireless communications along with silicon integration of various functionalities such as sensing, communications, intelligence and actuations is emerging as a critically important disruptive computer class based on a new platform, networking structure and interface that enable novel, low-cost and high-volume applications. Several of such applications have been difficult to realize because of many interconnections problems. To fulfill their large range of applications, different kinds of networks need to collaborate, and wired and next-generation wireless systems should be integrated in order to develop high-performance computing solutions to problems arising from the complexities of these networks. The aim of the book "Advanced Information Networking and Applications" is to provide latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications.

The Sports Writing Handbook Cengage Learning

A prominent and esteemed critic challenges widely held beliefs about children and

parenting, revealing that underlying each myth is a deeply conservative ideology that is, ironically, often adopted by liberal parents. Somehow a set of deeply conservative assumptions about children—what they're like and how they should be raised—has congealed into the conventional wisdom in our society. Parents are accused of being both permissive and overprotective, unwilling to set limits and afraid to let their kids fail. Alfie Kohn systematically debunks these beliefs, not only challenging erroneous factual claims but also exposing the troubling ideology that underlies them. Complaints about pushover parents and coddled kids are hardly new, he shows, and there is no evidence that either phenomenon is especially widespread today—let alone more common than in previous generations. Moreover, new research reveals that helicopter parenting is quite rare and, surprisingly, may do more good than harm when it does occur. The major threat to healthy child development, Kohn argues, is parenting that is too controlling rather than too indulgent. With the same lively, contrarian style that marked his influential books about rewards, competition, and education, Kohn relies on a vast collection of social science data, as well as on logic and humor, to challenge assertions that appear with numbing regularity in the popular press and are often accepted uncritically, even by people who are politically liberal. These include claims that young people • suffer from inflated self-esteem • are entitled and narcissistic • receive trophies, praise, and A's too easily • are in need of more self-discipline and "grit" Kohn's invitation to reexamine these and other assumptions is particularly timely; his book has the potential to change our culture's conversation about kids and the people who raise them.

Contemporary Issues in Global Criminal Justice provides a holistic analysis of modern criminal justice issues, encompassing the pre-trial, investigative, and post-conviction stages of criminal justice in legal settings across the world. The contributors acknowledge and examine the vast array of challenges in global criminal justice, from the role of the International Criminal Court to policing, the integration of technology, and how marginalized groups, such as sex workers and those with addictions, are treated in the courts. With contributions from scholars in England and Wales, New Zealand, Croatia, Spain, the Netherlands, Canada, and The Republic of North Macedonia, this book is not limited to one jurisdiction, and highlights that criminal justice is very much a global issue in a state of crisis. From policing to the courts, it is in urgent need of reform. Without a competent criminal justice system, justice does not exist. This book would be of interest to scholars in the legal, criminal justice, and criminology fields.

As you study criminal justice today, it's likely that you do not want to simply learn about the world; you want to change it. Gaines/Miller's CRIMINAL JUSTICE IN ACTION, 11E provides a template for that change. This magazine-style presentation focuses on big questions that you've probably already been asking yourself about police tactics, incarceration policies and other major issues in criminal justice. Captivating content, lifted from the latest headlines, and numerous smaller investigations help you better understand how criminal justice in the U.S. impacts everyone. You learn to think critically, ethically and practically about key criminal justice issues. You also gain skills beneficial for a career in criminal justice or any other field, as you actively explore the counterbalancing interests, concepts and theories that characterize today's criminal justice system. Master the concepts, techniques and soft skills necessary for professional success with this riveting book.
