From flammable tap water and sick livestock to the recent onset of hundreds of earthquakes in Oklahoma, the impact of fracking in the United States is far-reaching and deeply felt. In Fractivism Sara Ann Wylie traces the history of fracking and the ways scientists and everyday people are coming together to hold accountable an industry that has managed to evade regulation. Beginning her story in Colorado, Wylie shows how nonprofits, landowners, and community organizers are creating novel digital platforms and databases to track unconventional oil and gas well development and document fracking's environmental and human health impacts. These platforms model alternative approaches for academic and grassroots engagement with the government and the fossil fuel industry. A call to action, Fractivism outlines a way forward for not just the fifteen million Americans who live within a mile of an unconventional oil or gas well, but for the planet as a whole.

"Some Japanese stories end violently. Others never end at all, but only cut away, at the moment of extreme crisis, to a butterfly, or the wind, or the moon."--Brian Phillips Visitors from the West look with amazement, and sometimes concern, at Japan's social structures and unique, complex culture industry; the gigantic scale of its tech corporations and the resilience of its traditions; the extraordinary diversity of the subcultures that flourish in its "post-human" megacities. The country nonetheless remains an intricate and complicated jigsaw puzzle, an inexhaustible source of inspiration for stories, reflections, and reportage. The subjects in this volume range from the Japanese veneration of the dead to the Tokyo music scene, from urban alienation to cinema, from sumo to toxic masculinity. Caught between an ageing population and extreme post-modernity, Japan is an ideal observation

point from which to understand our age and the one to come.
