This comic, serious inquiry into the nature of art takes its technical vocabulary from Alice 's Adventures in Wonderland and Through the Looking-Glass. It is ridiculous to think of poems, paintings, or films as distinct from other things in the world, including people. Talking about art should be contiguous with talking about other relevant matters.

This book brings together contributions from global experts who have helped to facilitate the exciting and rapid advances that are taking place in microbial metabolomics. The main application of this field is in clinical and veterinary microbiology, but there is a great potential to apply metabolomics to help to better understand complex biological systems that are dominated by multiple-species microbial populations exposed to changing growth and nutritional conditions. In particular, environmental (e.g., water, soil), food (e.g., microbial spoilage, food pathogens), and agricultural and industrial applications are seen as developing areas for microbial metabolomics. As such, the book includes contributions with clinical, environmental, and industrial perspectives.

Recently, the Army forecast that it would experience a 4.5-million-acre training land shortfall by 2013 and proposed to purchase additional land adjacent to certain existing training ranges. In response to a congressional request, GAO reviewed the Army's approach for acquiring training land. This report (1) evaluates the Army's approach to the acquisition of training land, (2) describes the Army's consideration of alternatives and assessment of the environmental and economic effects, and (3) analyzes the Army's effectiveness in communicating its approach for making decisions to pursue these acquisitions before the Office of the Secretary of Defense's (OSD) approval. GAO reviewed the Army strategic plan for training lands and other relevant documents, and focused on all five land acquisitions since 2002 at Fort Irwin, California; three training sites in Hawaii; and the proposed expansion of the Pi ñ on Canyon Maneuver Site in Colorado. GAO recommends that (1) the Army develop and implement a process to update periodically its strategic plan for training ranges to reflect current needs and (2) OSD and the Army jointly review their strategies for communicating major land acquisitions and agree on a common practice that would address concerns about early disclosure and provide the Army and the other services some flexibility to engage the public. DOD generally agrees with the recommendations to view the full product, including and the Army jointly review their strategies for communicating major land acquisitions and agree on a common practice that would address concerns about early disclosure and provide the Army and the other services some flexibility to engage the public.
