Winner of the 2011 James Beard Foundation Award for International Cooking, this is the authoritative guide to stir-frying: the cooking technique that makes less seem like more, extends small amounts of food to feed many, and makes ingredients their most tender and delicious. The stir-fry is all things: refined, improvisational, adaptable, and inventive. The technique and tradition of stir-frying, which is at once simple yet subtly complex, is as vital today as it has been for hundreds of years—and is the key to quick and tasty meals. In *Stir-Frying to the Sky's Edge*, award-winning author Grace Young shares more than 100 classic stir-fry recipes that sizzle with heat and pop with flavor, from the great Cantonese stir-fry masters to the culinary customs of Sichuan, Hunan, Shanghai, Beijing, Fujian, Hong Kong, Macau, Taiwan, Singapore, and Malaysia, as well as other countries around the world. With more than eighty stunning full-color photographs, Young's definitive work illustrates the innumerable, easy-to-learn possibilities the technique offers—dry stir-fries, moist stir-fries, clear stir-fries, velvet stir-fries—and weaves the insights of Chinese cooking philosophy into the preparation of beloved dishes as Kung Pao Chicken, Stir-Fried Beef and Broccoli, Chicken Lo Mein with Ginger Mushrooms, and Dry-Fried Sichuan Beans.

Culture refers to not only the arts but also other manifestations of human intellectual achievement regarded collectively. It similarly refers to the customs, institutions, and achievements of a social group, a people, or a nation. Innovation refers to the action or process of change, alteration, or revolution; a new method of idea creation or product that may bring about change. It is easy to assume that innovation may be juxtaposed to the preservation of culture and time-tested rituals. Yet as human settlements grew; and as streets and squares evolved through the diverse exchanges of people trading, celebrating, rallying and socially interacting, it should come as little surprise that cities and its places would become, and continue to be, centres of culture and innovation that can be inextricably linked. Culture and Innovation in cities can potentially take on different complexions if viewed through the lens of academics and practitioners drawn from different geographies, disciplines, or fields of expertise when addressing particular urban challenges. It is through this complexity of views that this book seeks to provide a broad perspective on culture and innovation in the context of global cities today; and a rich cornucopia of insights from thought

leaders within their respective fields to shape the cities of tomorrow.

In the years after invading Iraq and Afghanistan, the US military realized that it had a problem: How does a military force set the economic conditions for security success? This problem was certainly not novel-the military had confronted it before in such diverse locations as Grenada, Haiti, Bosnia, and Kosovo. The scale and complexity of the problem, however, were unlike anything military planners had confronted beforehand. This was especially the case in Iraq, where some commentators expected oil production to drive reconstruction. When the fragile state of Iraq's infrastructure and a rapidly deteriorating security situation prevented this from happening, the problem became even more vexing: Should a military force focus on security first, or the economy? How can it do both? This is the challenge of Stability Economics. This volume on Stability Economics begins to fill the gap that expeditionary economics did not: the operational details. What is the theoretical relationship between economics and security? What strategic, political, and environmental contexts do military planners need to consider in order to write economic development lines of effort into operations? At what point do economic development efforts pass from being necessary to achieve the security mission to being humanitarian aid mission creep? Stability Economics also puts the CERP effectiveness and force structure debates into their proper operational context. With respect to CERP effectiveness and money as a weapon system, Stability Economics recognizes that setting the economic conditions for security success entails more than targeting money effectively; it also entails a thorough appreciation of the social, political, and geographic conditions of the fight in which a military unit is engaged. In fact, armed with a robust theory of how economies grow in turbulent post-conflict environments, commanders could recognize that there are times when it is actually better to not spend money. By broadening the theoretical aperture, Stability Economics gives commanders and planners the perspective they need set the economic conditions for security success. It is about more than spending money. It is about understanding the unique characteristics of post-conflict economies.

When her husband is offered the assignment of U.S. Naval attaché in London in 1939, Lydia Chapin Kirk packs up her family and embarks on a lifelong journey, one in which she becomes a firsthand witness to the extraordinary world events of her time. Kirk's historical memoir offers a fascinating portrait of a remarkable life, told first from the perspective of a young girl in Erie, Pennsylvania, Paris, and Washington before World War I, and then from her husband's postings as U.S. naval attaché and then as U.S. ambassador to Belgium, the Soviet Union, and Taiwan during the cold war. She brings alive the unique challenges and complex managerial and social responsibilities of a diplomat's spouse, especially when facing the perils of looming war, the challenges of Stalin's Moscow, and lengthy separations from her husband and children. An accomplished author of four books published in the 1950s and 1970s, Lydia Kirk captures the places and times in which she lived, the youthful adventures and wartime disruptions. With colorful prose and vivid detail, she offers recollections of such prominent people as President Theodore Roosevelt, Soviet Foreign Minister Gromyko, and Madame Chiang Kai-shek. Kirk has an artist's eye for her surroundings, revealing candid perceptions of human nature. Here is the story of a woman of consequence living through a transitional time when wives' roles were different than they are now. Her memoir gives voice to the many strong women of her generation whose untold contributions will inspire readers of all backgrounds.

For much of the early 1990s, Haiti held the world's attention. A fiery populist priest, Jean Bertrand Aristide, was elected president and deposed a year later in a military coup. Soon thousands of desperately poor Haitians started to arrive in makeshift boats on the shores of Florida. In early 1993, the newly elected Clinton administration pledged to make the restoration of President Aristide one of the cornerstones of its foreign policy. But that fall the U.S. let supporters of Haiti's ruling military junta intimidate America into ordering the USS Harlan County and its cargo of UN peacekeeping troops to scotch plans and return to port. Less than a year later, for the first time in U.S. history, a deposed president of another country prevailed on the United States to use its military might to return him to office. These extraordinary events provide the backdrop for *Plunging into Haiti: Clinton, Aristide, and the Defeat of Diplomacy*—Ralph Pezzullo's detailed account of the international diplomatic effort to resolve the political crisis. Through his father, Lawrence Pezzullo, who served as the U.S. special envoy to Haiti, Ralph Pezzullo gained access to important players on all sides. He tells the story of talented, committed men and women from the United States, France, Argentina, and Haiti who dedicated themselves to creating an outcome that would benefit Haiti and the rest of the world. With the energy of a political thriller, *Plunging into Haiti* fleshes out the central political struggle with threads of Haitian history and will engage readers with a general interest in Haiti as well as students of foreign policy. Using his unique perspective and access, Ralph Pezzullo covers the aftermath of the Clinton administration's diplomatic maneuvers to show an island still in turmoil. Ralph Pezzullo is an award-winning playwright, screenwriter, novelist, poet, and journalist. He is the author of several books including *Jawbreaker* and *At the Fall of Somoza* and has written articles for the *Wall Street Journal*, *Newsweek*, the *Washington Post*, *Sports Illustrated*, *Connoisseur*, *GQ*, *USA Weekend*, the *Miami Herald*, and other publications.

A "Century of Austrian Design" offers a highly accessible overview of Austrian design culture from 1900 to the present against the background of the country's extremely turbulent industrial history. In the process, the key aspects are explained in essays by celebrated experts. The book attempts to delineate a specifically "Austrian" formal language, citing as examples specific achievements in historical and contemporary design. As it does so, it also sheds light on other defining moments of Austria's design culture, including the enormous potential of its inventors, the phenomenon of semi-industrial manufacturing, and the innovative design solutions advanced by the Austrian sporting goods industry. A yellow pages section with selected design addresses rounds off the volume.
