In this original study of intellectual property rights (IPR) in relation to state capacity, Dimitrov analyzes this puzzle by offering the first systematic analysis of all IPR enforcement avenues in China, across all IPR subtypes. He shows that the extremely high volume of enforcement provided for copyrights and trademarks is unfortunately of a low quality, and as such serves only to perpetuate IPR violations. In the area of patents, however, he finds a low volume of high-quality enforcement. In light of these findings, the book develops a theory of state capacity that conceptualizes the Chinese state as simultaneously weak and strong. The book draws on extensive fieldwork in China and five other countries, as well as on 10 unique IPR enforcement datasets that exploit previously unexplored sources, including case files of private investigation firms.

"This bilingual volume brings together the first comprehensive compilation of Afro-Brazilian literature produced by the Quilombhoje group over three decades of their existence as a cultural and political movement in Brazil. Comparable to the Black Arts Movement of the 1960s and 1970s in the United States, Quilombhoje continues the tradition of the Quilombo, a communal sense of cultural resistance, survival and renewal assumed by descendants of Africans who refused to be enslaved. In producing poetry and prose through the Cadernos Negros series, contemporary Afro-Brazilian writers make a cogent statement against the stereotypical images of blackness while formulating a defiant and regenerative counter-discourse informed by Black pride, dignity, and Pan-African consciousness. Contributors include Cuti (Luiz Silva), Carlos de Assumpção, Geni Guimarães, Arnaldo Xavier, Miriam Alves, Abílio Ferreira, Márcio Barbosa, Jamu Minka, Conceição Evaristo, Esmeralda Ribeiro, Landê Onawale, Oliveira Silveira, Jônatas Conceição, Oswaldo de Camargo, Éle Semog, José Limeira, Cristiane Sobral, Waldemar Pereira, Thyko de Souza, Lepê Correia, Oubi Inaê Kibuko, Marcos Dias, and Alzira Rufino among others."--Page 4 of cover.

Dziga Vertov was one of the greatest innovators of Soviet cinema. The radical complexity of his work—in both sound and silent forms—has given it a central place within contemporary theoretical inquiry. Vertov's writings, collected here, range from calculated manifestos setting forth his heroic vision of film's potential to dark ruminations on the inactivity forced upon him by the bureaucratization of the Soviet state.

A psychological thriller in the tradition of Patricia Highsmith about two couples caught in a web of conflicting passions while deep-sea diving off the beautiful Canary Islands In the late 1990s, Sven Fiedler and his girlfriend, Antje, left Germany for the island of Lanzarote, rejecting what Sven considered a vulgar culture of materialism and judgment. The young couple set up a diving service catering to tourists eager to bask in the warm sunshine and explore the silent, gleaming marine paradise that makes this otherwise barren volcanic island such a remarkable retreat. Sven's approach was simple: take the mechanics of diving seriously, instruct his clients clearly, and stay out of their personal business as best he can. And life on the island goes smoothly until two German tourists--Jola von der Pahlen, a daytime soap star on the verge of cinematic success, and Theo Hast, a stalled novelist--engage Sven for a high-priced, intensive two-week diving experience. Staying in a guest house on Sven and Antje's property, the two visitors and their hosts quickly become embroiled in a tangle of jealousy and suspicion. Sven is struck by Jola's beauty, her evident wealth, and her apparently volatile relationship with the much older Theo. Theo quickly leaps to the conclusion that Sven and Jola are having an affair, but, oddly, he seems to facilitate it rather than trying to intervene. Antje, looking on, grows increasingly wary of these particular clients. As the point of view shifts from one character to the next, the reader is constantly kept guessing about who knows what, and, more important, who is telling the truth. A brutal game of delusion, temptation, and manipulation plays out, pointing toward a violent end. But a quiet one, down in the underwater world beneath the waves.

Dziga Vertov PHI Learning Pvt. Ltd.

With its distinctive design, the PBY Catalina flying boats soared through World War II and into history as one of the most resourceful aircraft ever flown. Other books concentrate on the Catalina's wartime feats, but this is the first full account of the PBY's colorful operational history outside of the war. Catalina expert David Legg offers an exhaustive country-by-country survey of both the military and commercial uses of this adaptable aircraft with detailed listings of their registration, type, place of manufacture, and construction numbers. Intriguing historical notes on an individual aircraft's adventures while fighting fires, performing survey work, and flying in support of Cold War communications networks, round out the volume. Everyone interested in flying boats will find the details of this work not only informative, but entertaining as well.

The Porsche 911's little brother... In 1969 a very special sports car was born. The 914 rose from a marriage of convenience of Volkswagen and Porsche, because both companies wanted a small, modern and affordable sports car in their product range, but for little cost. Thus, it was decided to combine the skills of both manufacturers. The result was a light mid-engine sports car with a lively road performance and even 50 years after its launch, it pleases the eye with a fresh design. Back then it was often ridiculed as a 'housewife Porsche' or 'Volks-Porsche', but now, the 914 has come out of the shadow of its big brother the 911 and has a

huge fan base; today it lives on in the Boxster and Cayman models. This volume includes: the result of thorough research in the Porsche and VW archives; rich photography; all technical data; development, production, model history and racing appearances.

Cold and Ultracold Collisions in Quantum Microscopic and Mesoscopic Systems PHI Learning Pvt. Ltd.

Cold and ultracold collisions occupy a strategic position at the intersection of several powerful themes of current research in chemical physics, in atomic, molecular and optical physics, and even in condensed matter. The nature of these collisions has important consequences for optical manipulation of inelastic and reactive processes, precision measurement of molecular and atomic properties, matter-wave coherences and quantum-statistical condensates of dilute, weakly interacting atoms. This crucial position explains the wide interest and explosive growth of the field since its inception in 1987. The author reviews elements of the quantum theory of scattering theory, collisions taking place in the presence of one or more light fields, and collisions in the dark, below the photon recoil limit imposed by the presence of any light field. Finally, it reviews the essential properties of these mesoscopic quantum systems and describes the key importance of the scattering length to condensate stability.

Designed specifically for undergraduate students of Electronics and Electrical Engineering and its related disciplines, this book offers an excellent coverage of all essential topics and provides a solid foundation for analysing electronic circuits. It covers the course named Electronic Devices and Circuits of various universities. The book will also be useful to diploma students, AMIE students, and those pursuing courses in B.Sc. (Electronics) and M.Sc. (Physics). The students are thoroughly introduced to the full spectrum of fundamental topics beginning with the theory of semiconductors and p-n junction behaviour. The devices treated include diodes, transistors—BJTs, JFETs and MOSFETs—and thyristors. The circuitry covered comprises small signal (ac), power amplifiers, oscillators, and operational amplifiers including many important applications of those versatile devices. A separate chapter on IC fabrication technology is provided to give an idea of the technologies being used in this area. There are a variety of solved examples and applications for conceptual understanding. Problems at the end of each chapter are provided to test, reinforce and enhance learning.

Over the last 50 years, literally millions of GM cars and trucks have been built with Turbo 400 automatic transmissions. While these transmissions are respected for their durability and versatility, there always comes a point where the old transmission shows signs of wear. At some point, even the best transmissions need to be rebuilt. Respected automotive technical author Cliff Ruggles takes readers through the complex rebuild procedure of GM's most popular rear-wheel drive automatic transmission in this great new book. Enthusiasts have embraced the reliable GM Turbo Hydra-Matic 400 three-speed automatics for years, and the popularity of these transmissions is not slowing down. With his proven style, Ruggles walks through the step-by-step rebuild and performance upgrade procedures in a series of full-color photos for each of these models. Time saving tips are part of every buildup. This is a welcome addition to your automotive library. Amateurs and professionals alike will appreciate the advice and guidance offered on every page. Even if you end up deciding to have a professional take care of your transmission repair and performance needs, this information is crucial to understanding how the power gets from the engine to the road.

"Penguin Books is delighted to announce the forthcoming publication of a List of the Lost, Morrissey's extraordinary novel, on 24 September. High-octane, ferociously lyrical, a List of the Lost shows a side of Morrissey never seen before. Beware the novelist . . . intimate and indiscreet . . . pompous, prophetic airs . . . here is the fact of fiction . . . an American tale where, naturally, evil conquers good, and none live happily ever after, for the complicated pangs of the empty experiences of flesh-and-blood human figures are the reason why nothing can ever be enough. To read a book is to let a root sink down. a List of the Lost is the reality of what is true battling against what is permitted to be true." a Morrissey"
