This book highlights the sustainability aspects of additive manufacturing (AM) in two separate volumes. It describes the details of this technology and its implications on the entire product life cycle sustainability, as well as embedded carbon and the further research needed to move this technology towards sustainable, mainstream production. Sustainability is not new for any area of industry, including additive manufacturing, and there are currently a number of ongoing research projects, both in industry and in academic institutions, that are investigating sustainability, embedded carbon and research activities which would need to be done in the future to move this technology towards sustainable mainstream production.

Let us Java Butterworth-Heinemann

A celebration of the life and engineering achievements of Isambard Kingdom Brunel by two of the world's foremost authorities. In his lifetime, Isambard Kingdom Brunel towered over his profession. Today, he remains the most famous engineer in history, the epitome of the volcanic creative forces which brought about the Industrial Revolution - and brought modern society into being. Brunel's extraordinary talents were drawn out by some remarkable opportunities - above all his appointment as engineer to the new Great Western Railway at the age of 26 - but it was his nature to take nothing for granted, and to look at every project, whether it was the longest railway yet planned, or the largest ship ever imagined, from first principles. A hard taskmaster to those who served him, he ultimately sacrificed his own life to his work in his tragically early death at the age of 53. His legacy, though, is all around us, in the railways and bridges that he personally designed, and in his wider influence. This fascinating new book draws on Brunel's own diaries, letters and sketchbooks to understand his life, times, and work.

How to Rebuild Your Volkswagen Air-Cooled Engine Brooklands Books Limited

It was invented immediately after the war, in the factory a far-sighted English military man had set up to turn the German economy from making machines of warfare to more pacific products. By the seventies that dream had been amply fulfilled, as the VW Campervan became the conveyance of choice for West Coast hippies, Australian surf bums and Europeans taking the overland route to find enlightenment and good karma in India. It had also become – indeed, still is – the first choice for any couple, or family, seeking a cheap camping holiday with wheels attached. So never mind the oddly off-centre driving wheel, the vagaries of the aircooled rear engine – the VW Campervan had become more than a vehicle – it had truly become a way of life. Mike Harding 's first ride in a Volkswagen Camper Van was back in 1961, when it was the carrying around the gear and bandmembers of his rock band the Manchester Rainmakers. Finally, in 2009, he could wait no longer, and bought his own, a 2001 Type

Naturally aspirated Mopar Wedge big-blocks are quite capable of producing between 600 to 900 horsepower. This book covers how to build Mopar's 383-, 400-, 413-ci, 440-ci engines to these power levels. Discussed is how to select a stock or aftermarket block for the desired performance level. The reciprocating assembly is examined in detail, so you select the right design and material for durability and performance requirements. Cylinder heads and valve train configurations are crucial for generating maximum horsepower and torque and this volume provides special treatment in this area. Camshafts and lifters are compared and contrasted using hydraulic flat tappet, hydraulic roller and solid flat tappet cams. Also, detailed engine builds at 600, 700, 800, and 900 horsepower levels provide insight and reveal what can be done with real-world component packages.
