Supplement your social studies curriculum with 180 days of daily geography practice! This essential classroom resource provides teachers with weekly geography units that build students' geography knowledge, and are easy to incorporate into the classroom. In a world that is becoming more connected and globalized, 21st century students must have the skills necessary to understand their world and how geography affects them and others. Students will develop their map and spatial skills, learn how to answer text- and photo-dependent questions, and study the 5 themes of geography. Each week covers a particular topic and introduces students to a new place or type of map. The first two weeks consist of a mini-unit that focuses entirely on map skills. For additional units, students will study various places, and how culture and geography are related. With a focus on the six populated continents, students will explore various types of maps including physical maps, political maps, topographic maps, thematic maps, climate maps, regional maps, and various topics including scale, legends, cardinal directions, latitude and longitude, and more. Aligned to state standards and National Geography Standards, this resource includes digital materials.

In 'Stanford Achievement Test, Ed. 1922,' Truman Lee Kelley and his co-authors Lewis M. Terman and G. M. Ruch deliver a quintessential and detailed assessment tool designed to measure the academic accomplishments of students in grades four through eight. The work is not simply a testament to early 20th-century educational standards but is also a rich cultural artifact reflecting the pedagogical priorities and methodologies of the time. Meticulously reproduced by DigiCat Publishing, this edition furnishes educators, historians, and scholars with authentic insights into the evaluative techniques once pervasive throughout the American educational system. Its style, anchored firmly in the empirical educational movement, provides a window into the historical framework surrounding scholastic assessment and achievement. Truman Lee Kelley, a pioneering psychometrician and statistician, channeled his expertise into the formulation of this comprehensive tool. Kelley's foray into educational psychology is informed by the nascent but rapidly growing arena of standardized testing, heavily influenced by the work of his contemporaries, including Terman, an eminent psychologist known for revising the Stanford-Binet IQ test. This collaboration is grounded in the burgeoning scientific approach to education that underscored the early twentieth century, a time when psychometrics was in its infancy and the need for objective measurement of student performance was becoming increasingly clear. 'DigiCat's republishing of 'Stanford Achievement Test, Ed. 1922' offers educators, historians of education, and students of psychometrics an invaluable resource. Not only does it provide a foundational perspective on standardized testing, but it also serves as an exemplar of early educational assessment methodologies. This publication is recommended for

those who wish to gain a deeper understanding of the historical context of academic testing and appreciate its evolution. Its enduring relevance is a testament to the intellectual rigor and foresight of its authors, which continues to influence and inform contemporary educational practices.

Zimbabwe invested in much human and material development of education from independence in 1980. Many innovative ideas have been explored to improve the quality of education, with a particular focus on reading literacy. In 1988, Zimbabwe joined 31 other countries in a reading literacy research study at primary and junior secondary school levels, under the International Association for the Evaluation of Educational Achievement. Data is taken from 143 schools and over 2000 students.
