Dispute resolution: Commercial litigation in Netherlands ...

We want Daimler to not only stand for safe cars but also set the standard in data protection. For that reason, we view it as our duty, as an international corporation, to comply with the various legal regulations around the world that govern the collection and processing of personal data.

Gates of Vienna

European competition law is the competition law in use within the European Union. It promotes the maintenance of competition within the European Single Market by regulating anti-competitive conduct by companies to ensure that they do not create cartels and monopolies that would damage the interests of society. European competition law today derives mostly from articles 101 to 109 of the ...

Daimler Data Protection Policy

We develop and provide a transparent life cycle inventory of conventional and electric vehicles and apply our inventory to assess conventional and EVs over a range of impact categories. We find that EVs powered by the present European electricity mix offer a 10% to 24% decrease in global warming potential (GWP) relative to conventional diesel or gasoline vehicles assuming lifetimes of 150,000 km.

What the EU does. The EU's health policy focuses on tackling serious EU-wide health threats, preventing diseases and ensuring an equal chance of good health and quality healthcare for all. A population in good health is also good for the economy, and therefore the EU's ambition is to ensure the accessibility, effectiveness and resilience of health systems in the EU.

Pilkington Optiwhite™ is the perfect choice for external applications such as facades. One of the most attractive features of Pilkington Optiwhite™ is its ability to achieve greater brilliance and transparency, allowing a clear and true representation of colours when viewed through the glass.

Une (ou un) blockchain, ou chaîne de blocs [1], [2], est une technologie de stockage et de transmission d'informations sans organe de contrôle. Techniquement, il s'agit d'une base de données distribuée dont les informations envoyées par les utilisateurs et les liens internes à la base sont vérifiés et groupés à intervalles de temps réguliers en blocs, formant ainsi une chaîne [3].
