Something Special

Presents equations for  
predicting the flow of  
compressible and  
incompressible fluids  
through control  
valves. The equations  
for compressible  
fluids are for use with  
gas or vapor and are  
not intended for use  
with multiphase  
streams such as gas-  
liquid, vapor-liquid  
or gas-solid mixtures.  
The equations for  
incompressible flow  
are based on  
standard  
hydrodynamic  
equations for  
Newtonian

incompressible fluids  
and are not intended  
for use when non-  
Newtonian fluids,  
fluid mixtures,  
slurries, or liquid-solid  
conveyance systems  
are encountered.

In this book, Dr. Li  
and his author team  
plan to emphasize

why mouse models  
are useful in vivo  
systems for  
understanding  
disease mechanisms  
and developing  
therapeutic  
strategies in blood  
cancers. The  
authors do not  
intend to cover all  
types of blood  
cancers; instead,  
they will focus on  
some major ones  
such as leukemias  
and lymphomas.  
However, the  
authors will try to  
cover as much as  
they can the cancer  
types and point out  
that many blood  
cancers need to be  
studied in mouse  
disease models  
although they are  
still not available at  
present. A major  
focus in the book

---

will be to show what we can or cannot learn from mouse disease models and to also show the critical contributions of mouse models in therapeutic drug development.

Isa-75.01.01-2002 (Iec 60534-2-1 Mod) - Flow Equations for Sizing Control Valves

A broken family finds its way back together in this captivating story from the author of Church of the Dog

A charismatic author with a voice and message all her own, Kaya McLaren has become beloved in the book world as much for her upbeat energy as

for her rich storytelling. In *On the Divinity of Second Chances*, she portrays a family on the brink of dissolution—a mother besieged by middle age, a distant father lost in daily life, and their three teenage children struggling in various ways with the family's disintegration even as they conceal a secret that could send their parents further over the edge. With the help of a group of tap-dancing old ladies, a sensual tango teacher, and a lot of luck, this family is about to learn that everyone gets a second chance which, as McLaren beautifully reminds

us in this inspiring novel, is sometimes even better than the first.

Empaths and Narcissists
